

News/2016 12 14

When people should go to the ebook stores, search start by shop, shelf by shelf, it is in reality problematic. This is why we allow the books compilations in this website. It will unconditionally ease you to see guide news/2016 12 14 as you such as.

By searching the title, publisher, or authors of guide you in reality want, you can discover them rapidly. In the house, workplace, or perhaps in your method can be every best area within net connections. If you point toward to download and install the news/2016 12 14, it is very easy then, before currently we extend the link to purchase and create bargains to download and install news/2016 12 14 in view of that simple!

Foundations of Marketing, Loose-leaf Version William M. Pride 2018-10-03 Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Colonialism Is Crime Marianne Nielsen 2019-09-20 There is powerful evidence that the colonization of Indigenous people was and is a crime, and that that crime is on-going. In this book Nielsen and Robyn present an analysis of the relationship between these colonial crimes and their continuing criminal and socially injurious consequences that exist today.

China and the Middle East James M. Dorsey 2018-07-19 This book explores China's significant economic and security interests in the Middle East and South Asia. To protect its economic and security interests, China is increasingly forced to compromise its long-held foreign policy and defence principles, which include insistence on non-interference in the domestic affairs of others, refusal to envision a foreign military presence, and focus on the development of mutually beneficial economic and commercial relations. The volume shows that China's need to redefine requirements for the safeguarding of its national interests positioned the country as a regional player in competitive cooperation with the United States and the dominant external actor in the region. The project would be ideal for scholarly audiences interested in Regional Politics, China, South Asia, the Middle East, and economic and security studies.

The Trumping of America Pamela Hines 2018-08 Trump alone is not to blame... How does it reflect on North American societal values when wealth trumps humanity, selfish individualism trumps compassion, the need to be entertained and to win trumps the truth, and racism and misogyny are rewarded with the most powerful position in the world? The political rise of Donald Trump, from the cutthroat Republican primary process to his move to the White House, has ushered in a new age of politics in the United States. This is a comprehensive analysis of the events surrounding the 2016 presidential election and the unprecedented first year of Donald Trump's presidency. Pamela Hines highlights the growing distortion of American democracy, which threatens political systems around the world. As a Canadian living just across the border, Hines provides a unique perspective on the international impact of the election; explores the roles of religion, racism, nationalism, and gender bias; and critiques the media and its reckless coverage of Trump's ascension. The Trump presidency is a wake-up call to citizens of the free world. Democracy is at risk, yet power remains in the hands of the people. This assault on democracy can be curtailed only if voters make

informed decisions and understand the consequences of their choices—while they still have the right to choose.

Understanding Media Propaganda in the 21st Century Simon Foley 2021-09-02 First published in 1988, Herman and Chomsky's *Manufacturing Consent* remains the go-to book for those interested in understanding why the mainstream media act as vehicles for power-elite propaganda. The analytical heart of *Manufacturing Consent* lies in what it calls 'The Propaganda Model.' According to this model, there are five filters which all newsworthy stories have to pass through before reaching the public sphere. However, a lot has changed in the subsequent thirty-something years. Consequently, a key question that needs to be addressed is whether *Manufacturing Consent* is still fit for purpose. The conceit underpinning *Understanding Media Propaganda in the 21st Century: Manufacturing Consent Revisited and Revised* is that the election of Trump in 2016 constitutes the proverbial 'year zero' for fourth estate journalism. As a result of the 'journalistic' cultural revolution that ensued, it argues that the Propaganda Model needs to be overhauled if it is to retain its epistemological bona fides. To this end, this book is a radical—in the true critical sense of the word—intervention into the propaganda/fake news debate. For students (in the broadest sense of the term) of media studies, journalism, communication studies and sociology, it provides both a compelling critique of Herman and Chomsky's Propaganda Model, while at the same time proffering a new explanatory model to understand why MSM output typically replicates the 'stenographer for power' playbook.

Artificial Intelligence and the Future of Defense Stephan De Spiegeleire 2017-05-17 Artificial intelligence (AI) is on everybody's minds these days. Most of the world's leading companies are making massive investments in it. Governments are scrambling to catch up. Every single one of us who uses Google Search or any of the new digital assistants on our smartphones has witnessed first-hand how quickly these developments now go. Many analysts foresee truly disruptive changes in education, employment, health, knowledge generation, mobility, etc. But what will AI mean for defense and security? In a new study HCSS offers a unique perspective on this question. Most studies to date quickly jump from AI to autonomous (mostly weapon) systems. They anticipate future armed forces that mostly resemble today's armed forces, engaging in fairly similar types of activities with a still primarily industrial-kinetic capability bundle that would increasingly be AI-augmented. The authors of this study argue that AI may have a far more transformational impact on defense and security whereby new incarnations of 'armed force' start doing different things in novel ways. The report sketches a much broader option space within which defense and security organizations (DSOs) may wish to invest in successive generations of AI technologies. It suggests that some of the most promising investment opportunities to start generating the sustainable security effects that our polities, societies and economies expect may lie in the realms of prevention and resilience. Also in those areas any large-scale application of AI will have to result from a preliminary open-minded (on all sides) public debate on its legal, ethical and privacy implications. The authors submit, however, that such a debate would be more fruitful than the current heated discussions about 'killer drones' or robots. Finally, the study suggests that the advent of artificial super-intelligence (i.e. AI that is superior across the board to human intelligence), which many experts now put firmly within the longer-term planning horizons of our DSOs, presents us with unprecedented risks but also opportunities that we have to start to explore. The report contains an overview of the role that 'intelligence' - the computational part of the ability to achieve goals in the world - has played in defense and security throughout human history; a primer on AI (what it is, where it comes from and where it stands today - in both civilian and military contexts); a discussion of the

broad option space for DSOs it opens up; 12 illustrative use cases across that option space; and a set of recommendations for - especially - small- and medium sized defense and security organizations.

The Unwanted Don Brown 2018 In the tradition of Don Brown's critically acclaimed, full-color nonfiction graphic novels *The Great American Dust Bowl* and Sibert Honor winning *Drowned City*, *The Unwanted* is an important, timely, and eye-opening exploration of the ongoing Syrian refugee crisis, exposing the harsh realities of living in, and trying to escape, a war zone. Starting in 2011, refugees flood out of war-torn Syria in Exodus-like proportions. The surprising flood of victims overwhelms neighboring countries, and chaos follows.

Resentment in host nations heightens as disruption and the cost of aid grows. By 2017, many want to turn their backs on the victims. The refugees are the unwanted. Don Brown depicts moments of both heartbreaking horror and hope in the ongoing Syrian refugee crisis. Shining a light on the stories of the survivors, *The Unwanted* is a testament to the courage and resilience of the refugees and a call to action for all those who read.

The Persecution of Professors in the New Turkey Clyde R. Forsberg Jr. 2017-05-11

Scholars credit the European Renaissance and Enlightenment to the fall of Constantinople in 1453, when Greek scholars in particular were driven from the Byzantine capital, taking with them everything they had learned about their own Greek intellectual heritage and classical philosophical tradition, thanks, in part, to the scholarly enterprise of Islamic scholasticism and a spirit of intellectual cooperation that had existed until that time. The "expulsion of excellence" that followed closely on the heels of Mehmed II's military victory in 1453 proved problematic for an emergent, modern-Muslim, imperial power, which his capture of the Byzantine capital instigated, although it was a boon to European intellectual life. Five and a half centuries later, on the night of 15 July 2016, a failed coup attempt that took place in the twin Turkish capital cities of Istanbul and Ankara paved the way for another expulsion of excellence, this time the handiwork of the ruling AK Party and its strongman-cum-dictator, Recep Tayyip Erdoğan. This volume tells the story of an American academic, Clyde R. Forsberg Jr., living and working in the AKP heartland of Turkey. A distinguished Professor in the Department of Western Languages and Literatures at Karabük University at the time, having relocated his entire family to Turkey two years prior, his children becoming fluent in Turkish by this time, and his wife, a native of Kyrgyzstan, slated to enter medical school in just a month's time, the Forsbergs were forced to flee the country after he was detained by the police and tried for "aiding and abetting a terrorist organization." Subsequently found innocent of all charges, Forsberg was nonetheless sacked, forced to clear out his office as University cameras rolled, adding insult to injury. Local online newspapers followed suit, publishing false and misleading stories about his arrest, targeting him and thus putting him and his entire family in danger. Other foreign faculty at Karabük University were likewise falsely charged, imprisoned, and, despite being found innocent of all charges, dismissed and forced to leave the country. A professional historian, American Studies scholar, and Open Society Institute alumnus, Forsberg recounts the events leading up to and following his arrest, employing a media studies approach, which asks hard questions of the role of social media in the preservation of democratic freedoms, which, in the wrong hands, became a very effective tool of the Turkish State and its suppression of democratic freedoms. In Forsberg's case, his imprisonment and subsequent suspension were for the "crime" of posting a poem online that was critical of Karabük University and the country's ruling AK Party's so-called "purge" of foreign faculty.

Transnational Advocacy in the Digital Era Nina Hall 2022-06 This book explores the role of digital advocacy organizations, a major new addition to the international arena. It provides a

detailed investigation of the power that these organizations have, the ways in which they differ from traditional NGOs, their memberships and networks, and how their campaigns are launched and distributed.

Abuse of Power Fred V. Lucas 2020-08-18 “That the Left tried to undo the results of the 2016 by whatever means necessary is not in doubt. Fred Lucas reminds us of the dangers this approach poses to constitutional government as he dissects what President Trump has rightly called one of the greatest hoaxes in our history.” —Cal Thomas, syndicated columnist and bestselling author “A devastating and comprehensive takedown of Trump’s impeachment, and a thoughtful look at the historical context of past impeachments, with strong reporting and research to combat the Left’s inevitable rewrite of history.” —Sara Carter, Fox News Contributor, award-winning correspondent, host of The Sara Carter Show podcast “Fred Lucas goes beyond the tribalism to the truth. There doesn’t need to be any partisan spin here, because the facts of the coup the Democrats attempted speak for themselves.” —Steve Deace, host of the Steve Deace Show on TheBlaze TV Abuse of Power exposes:

- How Elizabeth Warren tried to set an impeachment trap for Trump even before the inauguration.
- Why the depths of the Biden family’s international conflict of interests are worthy of a federal investigation.
- Why Nancy Pelosi caved to The Squad to remain leadership.
- How Adam Schiff pushed Jerry Nadler out of the key spot to lead the impeachment.
- How Democrats abandoned what would have been a crowning leftwing achievement in gun control legislation in order to pursue an impeachment that was destined to fail in the Senate.
- How Mitt Romney’s vote to convict likely prevent three moderate Democrats from rebelling against party leaders.

National Security: Breakthroughs in Research and Practice Management Association, Information Resources 2019-02-01 The tactical organization and protection of resources is a vital component for any governmental entity. Effectively managing national security through various networks ensures the highest level of protection and defense for citizens and classified information. National Security: Breakthroughs in Research and Practice is an authoritative resource for the latest research on the multiple dimensions of national security, including the political, physical, economic, ecological, and computational dimensions. Highlighting a range of pertinent topics such as data breaches, surveillance, and threat detection, this publication is an ideal reference source for government officials, law enforcement, professionals, researchers, IT professionals, academicians, and graduate-level students seeking current research on the various aspects of national security.

Critical Incidents in Journalism Edson C. Tandoc Jr. 2020-12-08 This edited collection examines critical incidents journalists have faced across different media contexts, exploring how journalists and other key actors negotiate various aspects of their work. Ranging from the Rwandan genocide to the News of the World hacking scandal in the UK, this book defines a critical incident as an event that has led journalists to reconsider their routines, roles, and rules. Combining theoretical and practical analysis, the contributors offer a discussion of the key events that journalists cover, such as political turmoil or natural disasters, as well as events that directly involve and affect journalists. Featuring case studies from countries including Australia, Germany, Brazil, Kenya, and the Philippines, the book explores the discourses that critical events have generated, how journalists and other stakeholders have responded to them, and how they have reshaped (or are reshaping) journalistic norms and practices. The book also proposes a roadmap for studying such pivotal moments in journalism. This one-of-a-kind collection is a valuable resource for students and scholars across journalism studies disciplines, from journalism history, to

sociology of news, to digital journalism and political communication.

Synthetic Biology 2020: Frontiers in Risk Analysis and Governance Benjamin D. Trump 2019-11-28 Synthetic biology offers powerful remedies for some of the world's most intractable problems, but these solutions are clouded by uncertainty and risk that few strategies are available to address. The incentives for continued development of this emerging technology are prodigious and obvious, and the public deserves assurances that all potential downsides are duly considered and minimized accordingly. Incorporating social science analysis within the innovation process may impose constraints, but its simultaneous support in making the end products more acceptable to society at large should be considered a worthy trade-off. Contributing authors in this volume represent diverse perspectives related to synthetic biology's social sciences, and reflect on different areas of risk analysis and governance that have developed for the field. Such perspectives include leading scholarly discussion pertaining to risk assessment, governance, ethics, and communication. The chapters of this volume note that while the first twenty years of synthetic biology development have focused strongly on technological innovation and product development, the next twenty should emphasize the synergy between developers, policymakers, and publics to generate the most beneficial, well governed, and transparent technologies and products possible. Many chapters in this volume provide new data and approaches that demonstrate the feasibility for multi-stakeholder efforts involving policymakers, regulators, industrial developers, workers, experts, and societal representatives to share responsibilities in the production of effective and acceptable governance in the face of uncertain risk probabilities. A full consideration of such perspectives may prevent a world of draconian regulations based on an insufficient or incomplete understanding of the science that underpins synthetic biology, as well as any hesitancy or fear by the public to adopt its eventual products.

The People Are Going to Rise Like the Waters Upon Your Shore Jared Yates Sexton 2017-08-15 "Sexton grapples with the Trump campaign from the perspective of the crowds reveling in the candidate's presence and message. It is a useful vantage point given the increasingly blatant bigotry in the months since the election." —The Washington Post *The People Are Going to Rise Like the Waters Upon Your Shore* is a firsthand account of the events that shaped the 2016 presidential election and the cultural forces that powered Donald Trump into the White House. Includes an all new afterword that details the first year of the Trump presidency. "With a novelist's flair for the dramatic scene and evocative detail, Sexton expertly marries the quotidian tedium of the campaign trail (so many hotel room beers) and the outlandish circumstances of this particular election season with his astute observations about our polarized national condition." —Salon "This is the post-campaign book I was waiting for. Essential reading for understanding this country now and going forward." —Alexander Chee, author of *The Queen of the Night*

National Service In Singapore Shu Huang Ho 2018-11-29 National Service (NS) is one of Singapore's foundational public policies. First implemented by the British in 1954, amended in 1967 to provide a means to defend a fledgling independent nation, and codified into its present form in 1970, NS is a key pillar of Singapore's defence. Its significance, however, goes beyond defence. With over 1 million male Singapore citizens and permanent residents having served NS, and consequently involving many more — family members, friends, employers and colleagues — in different ways, NS is deeply woven into Singapore's political and social fabric. This volume brings together a range of scholarly perspectives on NS which explore its past, present and future in four sections: The history of NS, NS in practice, debates on NS and an international perspective. Comprising chapters by individuals from varied backgrounds, *National Service in Singapore* offers a broad account of one of

Singapore's oldest public policies.

Daily Skeptic 2016 Cody Scott 2016-12-19 The Daily Skeptic is a blog dedicated to investigating news articles, science, religion, politics, history articles, and book reviews. This book is a collection of those essays from 2016 with topics ranging from the 2016 election, to social unrest, to book reviews and historical investigation.

Ethical Restoration after Communal Violence Marguerite La Caze 2018-09-15 This book provides an account of ethical restoration in situations that bring ethical and political questions together. It shows how punishment as well as forgiveness and reconciliation are necessary to properly restore peace and justice in both transitional and democratic societies.

Carbon Criminals, Climate Crimes Ronald C. Kramer 2020-04-17 Carbon Criminals, Climate Crimes analyzes the looming threats posed by climate change from a criminological perspective. It advances the field of green criminology through a examination of the criminal nature of catastrophic environmental harms resulting from the release of greenhouse gases. The book describes and explains what corporations in the fossil fuel industry, the U.S. government, and the international political community did, or failed to do, in relation to global warming. Carbon Criminals, Climate Crimes integrates research and theory from a wide variety of disciplines, to analyze four specific state-corporate climate crimes: continued extraction of fossil fuels and rising carbon emissions; political omission (failure) related to the mitigation of these emissions; socially organized climate change denial; and climate crimes of empire, which include militaristic forms of adaptation to climate disruption. The final chapter reviews policies that could mitigate greenhouse gas emissions, adapt to a warming world, and achieve climate justice.

Portland's Good Life R Bruce Stephenson 2021-03-15 In Portland's Good Life, R. Bruce Stephenson discusses how Portland's investment in sustainability helped stave off climate change and COVID-19. Stephenson tells the timeless story of the city's private citizens who, devoted to the public good and grounded in the good life, built a city that honors their humanity.

American Horror Show Douglas Kellner 2017-06-09 American Horror Show describes the last weeks of the 2016 election, Trump's victory, his transition and construction of a scandal-ridden cabinet and administration, to his inaugural speech and the first 30 days of his presidency. The text uses a multidimensional analysis to explain Trump's victory, including his mobilization of an authoritarian populist movement, the use of fake news to attack Hillary Clinton, the intervention of FBI Director James Comey 11 days before the election, claiming that another investigation of Clinton's emails was underway, and the intervention of Russian hacking of Democratic Party email and the use of this email against Clinton. Questions are raised concerning relationships between the Russian hacking and attacks against Clinton and members of Trump's campaign. The remarkable positive remarks from Trump concerning Putin, followed by putting pro-Putin Republicans in key posts of his administration, raise questions about Trump administration relations and connections to Russia. Finally, the first 30 days of Trump's administration show that he is a rightwing billionaire and militarist who has carried out an extreme rightwing Republican agenda and is not a populist concerned about the working class.

Spygate Dan Bongino 2018-10-09 Everyone has an opinion about whether or not Donald Trump colluded with the Russians to defeat Hillary Clinton in 2016. The number of actors involved is staggering, the events are complicated, and it's hard to know who or what to believe. Spygate bypasses opinion and brings facts together to expose the greatest political scandal in American history. Former Secret Service agent and NYPD police officer Dan Bongino joins forces with journalist D.C. McAllister to clear away fake news and show you

how Trump's political opponents, both foreign and domestic, tried to sabotage his campaign and delegitimize his presidency. By following the names and connections of significant actors, the authors reveal: • Why the Obama administration sent a spy connected to the Deep State into the Trump campaign • How Russians were connected to the opposition research firm hired by the Clinton campaign to find dirt on Trump • How the FBI failed to examine DNC computers after they were hacked, relying instead on the findings of a private company connected to the DNC and the Obama administration • Why British intelligence played a role in building the collusion narrative • What role Ukrainians played in legitimizing the perception that Trump was conspiring with the Russians • How foreign players in the two events that kickstarted the Trump-Russia collusion investigation were connected to the Clinton Foundation, and • What motivated the major actors who sought to frame the Trump campaign and secure a win for Hillary Clinton

Chinese Indonesians in Post-Suharto Indonesia Wu-Ling Chong 2018-10-02 Selfish, obscenely rich, insular, and opportunistic: these remain how Chinese minorities in Indonesia are perceived by the indigenous population. However, far from being passive victims of discrimination and marginalisation, Chong presents a forceful case in which Chinese Indonesians possess the agency to shape their future in the country, particularly in the changing political, business, and socio-cultural environment after the fall of Suharto. While a lack of good governance that promotes the rule of law and accountability allows or even encourages some Chinese to maintain the status quo by perpetuating corrupt business practices inherited from Suharto's New Order regime, there are other Chinese Indonesians who make full use of the democratic space opened up under the new administrations, acting as agents of reform by participating in electoral politics and establishing inter-ethnic socio-cultural organisations. Building on Anthony Giddens's structure-agency theory and Pierre Bourdieu's notions of habitus and field, Chong shows that the Chinese minorities have played an active role in the democratic process, even though they continue to occupy an ambivalent position in Indonesia. The Chinese Indonesians' diverse strategies to safeguard their personal interests and cultural identities make a stimulating case study of what an ethnic minority could do to make a difference. 'Backed by formidable research, Chong has produced an intriguing and original view of the political, social, and economic activity of the still precariously placed Chinese minority in Indonesia.' —Donald L. Horowitz, Duke University; author of *Constitutional Change and Democracy in Indonesia* 'In this illuminating study, Chong traces the political economy of Indonesia's ethnic Chinese minority as they navigate the country's post-1998 politics, which is more free but still lacks strong rule of law. Focusing especially on Medan and Surabaya, she analyses how some have strongly supported reforms while many continue old practices of surviving and profiting by participating in massive corruption and extortion.' —Jeffrey A. Winters, Northwestern University; author of *Oligarchy*

Human Trafficking and Trauma in the Digital Era Mirjam van Reisen 2017-02-13 Eritrean refugees crisscross between countries in the Horn of Africa and North Africa in search of a safe place. Along their journeys, they are looted, threatened, intimidated, violated, and held for ransom. This book revisits the human trafficking crisis that first emerged in the Sinai at the end of 2008 and examines the expansion of human trafficking of Eritrean refugees and other forms of exploitation beyond the Sinai. It focuses on the modus operandi of these practices and on identifying their key facilitators and beneficiaries. The book locates the origin of these practices within Eritrea; it reveals how a deliberate policy of impoverishment and human rights abuses has driven the people out of the country, and how individuals within Eritrea, and particularly within the ruling party, benefit from the smuggling and

trafficking of Eritrean refugees. The use of information communication technologies (ICTs) is identified as key to the new modus operandi of this criminal business and is found to further facilitate widespread collective trauma amongst Eritreans, who witness the abuse of their family members and fellow nationals through digital networks. An entire section in this book is dedicated to assessing the extent and effects of individual and collective trauma caused by Sinai trafficking and to examining potential approaches to healing. Other sections discuss the vulnerabilities of Eritrean minors and women, and the connections between human trafficking, terrorism and organ trafficking. The last section of the book raises the question of accountability. It examines and evaluates international responses to this forgotten crisis, and discusses the need for policies that tackle the problem where it emerges: in Eritrea.

The Syrian Information and Propaganda War Ben Cole 2022-02-22 This book focuses on the propaganda war between the Syrian government and the opposition movement, which excludes the Islamic State and the Kurdish-led SDF. Drawing on international relations, psychology, and media studies, the book encourages readers to question the dominant discourse on the war. The core of the book outlines the propaganda battles over the main paradigms and narratives that framed the war, exploring the shortcomings of those paradigms and narratives, identifying who won the propaganda war and why, and assessing what impact it had on the military side of the war. In particular, it focuses on the role of cognitive bias amongst primary and secondary sources in determining the outcome of the propaganda war, and whether the influence of this propaganda is best explained by effects or limited effects theory. Through explaining the dynamics of the propaganda war, the book encourages readers to critically question the dominant discourse on the war, assists them in understanding primary and secondary reporting on the war, and shows that the impact of the propaganda war is best understood in terms of limited effects theory. The book's main findings are that: i) the opposition won the international propaganda war but failed to win the propaganda war inside Syria; ii) propaganda had relatively little effect on shaping attitudes either inside Syria or internationally (instead, its main effect was to reinforce attitudes that had already been shaped by other factors); and iii) the reality of the war lies between the conflicting paradigms and narratives being promoted by each side.

Fundamentals of Collection Development and Management, Fourth Edition Peggy Johnson 2018-07-23 Technical Services Quarterly declared that the third edition "must now be considered the essential textbook for collection development and management ... the first place to go for reliable and informative advice." For the fourth edition expert instructor and librarian Johnson has revised and freshened this resource to ensure its timeliness and continued excellence. Each chapter offers complete coverage of one aspect of collection development and management, including numerous suggestions for further reading and narrative case studies exploring the issues. Thorough consideration is given to traditional management topics such as organization of the collection, weeding, staffing, and policymaking; cooperative collection development and management; licenses, negotiation, contracts, maintaining productive relationships with vendors and publishers, and other important purchasing and budgeting topics; important issues such as the ways that changes in information delivery and access technologies continue to reshape the discipline, the evolving needs and expectations of library users, and new roles for subject specialists, all illustrated using updated examples and data; and marketing, liaison activities, and outreach. As a comprehensive introduction for LIS students, a primer for experienced librarians with new collection development and management responsibilities, and a handy reference resource for practitioners as they go about their day-to-day work, the value and usefulness

of this book remain unequalled.

An Epistemic Theory of Democracy Robert E. Goodin 2018-05-03 Democracy has many attractive features. Among them is its tendency to track the truth, at least under certain idealized assumptions. That basic result has been known since 1785, when Condorcet published his famous jury theorem. But that theorem has typically been dismissed as little more than a mathematical curiosity, with assumptions too restrictive for it to apply to the real world. In *An Epistemic Theory of Democracy*, Goodin and Spiekermann propose different ways of interpreting voter independence and competence to make jury theorems more generally applicable. They go on to assess a wide range of familiar political practices and alternative institutional arrangements, to determine what constellation of them might most fully exploit the truth-tracking potential of majoritarian democracy. The book closes with a discussion of how epistemic democracy might be undermined, using as case studies the Trump and Brexit campaigns.

Archaeologists in Print Amara Thornton 2018-06-25 *Archaeologists in Print* is a history of popular publishing in archaeology in the nineteenth and twentieth centuries, a pivotal period of expansion and development in both archaeology and publishing. It examines how British archaeologists produced books and popular periodical articles for a non-scholarly audience, and explores the rise in archaeologists' public visibility. Notably, it analyses women's experiences in archaeology alongside better known male contemporaries as shown in their books and archives. In the background of this narrative is the history of Britain's imperial expansion and contraction, and the evolution of modern tourism in the Eastern Mediterranean and Middle East. Archaeologists exploited these factors to gain public and financial support and interest, and build and maintain a reading public for their work, supported by the seasonal nature of excavation and tourism. Reinforcing these publishing activities through personal appearances in the lecture hall, exhibition space and site tour, and in new media – film, radio and television – archaeologists shaped public understanding of archaeology. It was spadework, scripted. The image of the archaeologist as adventurous explorer of foreign lands, part spy, part foreigner, eternally alluring, solidified during this period. That legacy continues, undimmed, today. Praise for *Archaeologists in Print* This beautifully written book will be valued by all kinds of readers: you don't need to be an archaeologist to enjoy the contents, which take you through different publishing histories of archaeological texts and the authors who wrote them. From the productive partnership of travel guide with archaeological interest, to the women who feature so often in the history of archaeological publishing, via closer analysis of the impact of John Murray, Macmillan and Co, and Penguin, this volume excavates layers of fascinating facts that reveal much of the wider culture of the late nineteenth and twentieth centuries. The prose is clear and the stories compulsive: Thornton brings to life a cast of people whose passion for their profession lives again in these pages. Warning: the final chapter, on *Archaeological Fictions*, will fill your to-be-read list with stacks of new titles to investigate! This is a highly readable, accessible exploration into the dynamic relationships between academic authors, publishers, and readers. It is, in addition, an exemplar of how academic research can attract a wide general readership, as well as a more specialised one: a stellar combination of rigorous scholarship with lucid, pacy prose. Highly recommended!' Samantha Rayner, Director of UCL Centre for Publishing; Deputy Head of Department and Director of Studies, Department of Information Studies, UCL

To Change the Church Ross Douthat 2019-03-19 A New York Times columnist and one of America's leading conservative thinkers considers Pope Francis's efforts to change the church he governs in a book that is "must reading for every Christian who cares about the

fate of the West and the future of global Christianity” (Rod Dreher, author of *The Benedict Option*). Born Jorge Mario Bergoglio in 1936, today Pope Francis is the 266th pope of the Roman Catholic Church. Pope Francis’s stewardship of the Church, while perceived as a revelation by many, has provoked division throughout the world. “If a conclave were to be held today,” one Roman source told *The New Yorker*, “Francis would be lucky to get ten votes.” In his “concise, rhetorically agile...adroit, perceptive, gripping account (*The New York Times Book Review*), Ross Douthat explains why the particular debate Francis has opened—over communion for the divorced and the remarried—is so dangerous: How it cuts to the heart of the larger argument over how Christianity should respond to the sexual revolution and modernity itself, how it promises or threatens to separate the church from its own deep past, and how it divides Catholicism along geographical and cultural lines. Douthat argues that the Francis era is a crucial experiment for all of Western civilization, which is facing resurgent external enemies (from ISIS to Putin) even as it struggles with its own internal divisions, its decadence, and self-doubt. Whether Francis or his critics are right won’t just determine whether he ends up as a hero or a tragic figure for Catholics. It will determine whether he’s a hero, or a gambler who’s betraying both his church and his civilization into the hands of its enemies. “A balanced look at the struggle for the future of Catholicism...*To Change the Church* is a fascinating look at the church under Pope Francis” (*Kirkus Reviews*). Engaging and provocative, this is “a pot-boiler of a history that examines a growing ecclesial crisis” (*Washington Independent Review of Books*).

Pubertal Suppression in Transgender Youth Courtney Finlayson 2018-08-03 Offering current guidelines on the relatively new practice of puberty suppression for gender-dysphoric adolescents, *Pubertal Suppression in Transgender Youth* provides a succinct, easy-to-digest overview of this timely topic. This concise, clinically-focused resource by Dr. Courtney Finlayson covers all relevant topics, from a brief history of medical care of transgender youth to emerging developments in the field.

Discovering Precision Health Lloyd Minor 2020-03-16 Today we are on the brink of a much-needed transformative moment for health care. The U.S. health care system is designed to be reactive instead of preventive. The result is diagnoses that are too late and outcomes that are far worse than our level of spending should deliver. In recent years, U.S. life expectancy has been declining. Fundamental to realizing better health, and a more effective health care system, is advancing the disruptive thinking that has spawned innovation in Silicon Valley and throughout the world. That's exactly what Stanford Medicine has done by proposing a new vision for health and health care. In *Discovering Precision Health*, Lloyd Minor and Matthew Rees describe a holistic approach that will set health care on the right track: keep people healthy by preventing disease before it starts and personalize the treatment of individuals precisely, based on their specific profile. With descriptions of the pioneering work undertaken at Stanford Medicine, complemented by fascinating case studies of innovations from entities including the Chan Zuckerberg Biohub, GRAIL, and Impossible Foods, Minor and Rees present a dynamic vision for the future of individual health and health care. You'll see how tools from smartphone technology to genome sequencing to routine blood tests are helping avert illness and promote health. And you'll learn about the promising progress already underway in bringing greater precision to the process of predicting, preventing, and treating a range of conditions, including allergies, mental illness, preterm birth, cancer, stroke, and autism. The book highlights how biomedical advances are dramatically improving our ability to treat and cure complex diseases, while emphasizing the need to devote more attention to social, behavioral, and environmental factors that are often the primary determinants of health. The authors explore thought-provoking topics including: The unlikely

role of Google Glass in treating autism How gene editing can advance precision in treating disease What medicine can learn from aviation liHow digital tools can contribute to health and innovation Discovering Precision Health showcases entirely new ways of thinking about health and health care and can help empower us to lead healthier lives.

Prescription Drug Diversion and Pain John F. Peppin 2018-08-01 Prescription Drug Diversion and Pain provides an interdisciplinary overview of medications used to treat chronic pain, specifically the benefits and risks that are posed by long-term opioids use. These essential pain-relieving medications must be carefully managed to prevent serious side effects that may include physical dependence, addiction, and even death, which has led in recent years to increased attention on the development of alternative treatments for chronic pain. This book not only offers a single, comprehensive source for understanding the specialized field of the opioid crisis, but also addresses provocative topics including how pain drugs came to be regulated by the U.S. Government and the rarely-discussed aggressive marketing behind the spread of these drugs. Chapters are written by expert contributors from diverse backgrounds in medicine, psychiatry, pharmacy, nursing, health law, and ethics. Prescription Drug Diversion and Pain is a must-read for healthcare professionals, caregivers, policy makers, regulatory officials, law enforcement, and those in the pharmaceutical industry seeking to address the current and future opioid crisis.

The Oxford Handbook of Music and Medievalism Stephen C. Meyer 2020-03-13 The Oxford Handbook of Music and Medievalism provides a snapshot of the diverse ways in which medievalism--the retrospective immersion in the images, sounds, narratives, and ideologies of the European Middle Ages--powerfully transforms many of the varied musical traditions of the last two centuries. Thirty-three chapters from an international group of scholars explore topics ranging from the representation of the Middle Ages in nineteenth-century opera to medievalism in contemporary video game music, thereby connecting disparate musical forms across typical musicological boundaries of chronology and geography. While some chapters focus on key medievalist works such as Orff's *Carmina Burana* or Peter Jackson's *Lord of the Rings* films, others explore medievalism in the oeuvre of a single composer (e.g. Richard Wagner or Arvo Pärt) or musical group (e.g. Led Zeppelin). The topics of the individual chapters include both well-known works such as John Boorman's film *Excalibur* and also less familiar examples such as Eduard Lalo's *Le Roi d'Ys*. The authors of the chapters approach their material from a wide array of disciplinary perspectives, including historical musicology, popular music studies, music theory, and film studies, examining the intersections of medievalism with nationalism, romanticism, ideology, nature, feminism, or spiritualism. Taken together, the contents of the Handbook develop new critical insights that venture outside traditional methodological constraints and provide a capstone and point of departure for future scholarship on music and medievalism.

Let There Be Light! Robert S. Dutch 2017-06-16 Have you ever wondered what it is like to work on a nuclear power plant? Robert Dutch worked in the UK's nuclear industry for many years as a scientist and then as a tutor at a nuclear training center. He also holds degrees in theology. Drawing upon his qualifications and experience Robert addresses the controversial issue of nuclear power from a Christian perspective. In contrast to a negative nuclear narrative often portrayed, he presents a positive nuclear narrative alongside other ways of generating electricity. Be prepared to be challenged to think seriously about nuclear's merits in providing clean, low-carbon electricity.

The Abe Legacy James Brown 2021-11-17 This study of Japanese prime minister Abe Shinzô? (2012-2020) answers three questions: How could Abe Shinzô? remain in power for nearly a decade? What was the policy mix devised to keep voters happy yet try to promote

structural reforms and growth? What is his legacy as chief executive now that he has gone? Marketing Principles with Student Resource Access 12 Months William M. Pride 2017-09 This is the printed textbook, Marketing Principles. Marketing Principles combines a thorough and engaging overview of essential marketing principles. New, PRINT versions of this book come with bonus online study tools including animated activities and videos on the CourseMate Express platform.

Immunisation against infectious diseases David Salisbury 2006-12-11 This is the third edition of this publication which contains the latest information on vaccines and vaccination procedures for all the vaccine preventable infectious diseases that may occur in the UK or in travellers going outside of the UK, particularly those immunisations that comprise the routine immunisation programme for all children from birth to adolescence. It is divided into two sections: the first section covers principles, practices and procedures, including issues of consent, contraindications, storage, distribution and disposal of vaccines, surveillance and monitoring, and the Vaccine Damage Payment Scheme; the second section covers the range of different diseases and vaccines.

Reinventing Racism Jonathan D. Church 2020-12-03 The theory of white fragility is one of the most influential ideas to emerge in recent years on the topics of race, racism, and racial inequality. White fragility is defined as an unwillingness on the part of white people to engage in the difficult conversations necessary to address racial inequality. This “fragility” allegedly undermines the fight against racial inequality. Despite its wide acclaim and rapid acceptance, the theory of white fragility has received no serious and sustained scrutiny. This book argues that the theory is flawed on numerous fronts. The theory functions as a divisive rhetorical device to shut down debate. It relies on the flawed premise of implicit bias. It posits a faulty way of understanding racism. It has serious methodological problems. It conflates objectivity and neutrality. It exploits narrative at the expense of facts. It distorts many of the ideas upon which the theory relies. This book also offers a more constructive way to think about Whiteness, white privilege, and “white fragility,” pointing us to a more promising vision for addressing racial inequality.

From Bureaucracy to Bullets Bree Akesson 2022-02-11 As of 2019, there were over 70 million people displaced from their homes, the most displaced persons since the Second World War. This number continues to rise as solutions to stem large-scale violence and subsequent displacement continue to fail. Today, twenty-four people are displaced from their homes and communities every minute. The likelihood of the displaced returning to their homes is become increasingly unlikely as their homes may have been destroyed as a result of conflict and war. What are the impacts of loss of home upon children, adults, families, communities, and societies? If having a home is a basic human right, then why is the destruction of one's home not viewed as a violation of human rights and prosecuted accordingly? This book answers these questions and more by focusing on domicide, or the intentional destruction of the home, as a human rights issue.

Populism, Democracy and Community Development Kenny, Sue 2020-12-02 Using international perspectives and case studies, this book discusses the relationships between community development and populism in the context of today's widespread crisis of

democracy. It investigates the development, meanings and manifestations of contemporary forms of populism and explores the synergies and contradictions between the values and practices of populism and community development. Contributors examine the ways that the ascendancy of right-wing populist politics is influencing the landscapes within which community development is located and they offer new insights on how the field can understand and respond to the challenges of populism.

Asia-Pacific Regional Security Assessment 2022 The International Institute for Strategic Studies (IISS) 2022-06-10 The Asia-Pacific Regional Security Assessment examines key regional security issues relevant to the policy-focused discussions of the IISS Shangri-La Dialogue, Asia's premier defence summit convened by the International Institute for Strategic Studies. It is published each year in association with the Dialogue and the issues analysed within its covers are central to discussions at the event. Among the topics explored are: US Indo-Pacific strategy, alliances and security partnerships; Chinese perspectives on regional security; Taiwan's security and the possibility of conflict; the continuing challenges posed by North Korea's nuclear and missile programmes; the nuclear dynamics of Sino-American security relations; air and naval operations in the Asia-Pacific; Sino-American technology competition; Japan's competition and cooperation with China; India's role in the Quadrilateral Security Dialogue (Quad); the evolving regional security engagement of European states and the European Union; China's role as an upstream state in the Mekong sub-region; and the climate crisis and Asia-Pacific security. As this volume goes to press, the war in Ukraine overshadows the international security landscape and many chapters in this volume touch on the conflict's ramifications for security in the Asia-Pacific. Authors include leading regional analysts and academics at the forefront of research and analysis: Aidan Foster-Carter, James Crabtree, Peter A. Dutton, Brian Eyler, Michael Green, Sheryn Lee, Jeffrey G. Lewis, Tanvi Madan, Jeffrey Mazo, Ben Schreer, Yun Sun, Nicholas Szechenyi, Brendan Taylor, Ashley Townshend and Paul Triolo.
