Disaster Management and Human Health Risk VII G. Passerini 2022-01-18 Research presented at the 7th International Conference on Disaster Management and Human Health: Reducing Risk, Improving Outcomes is contained in this volume. These contributions from academics and experts focus on public health, security and disaster management with the goal to assess the potential risk from various types of disaster and highlight ways to prevent or alleviate any damage.

There is a need for academia and practitioners to exchange knowledge and experience on the way to handle the increasing risk of natural and human-made disasters. Recent major earthquakes, tsunamis, hurricanes, floods and other natural phenomena have resulted in huge losses in terms of human life and property destruction. A new range of human-made disasters have afflicted humanity in modern times; terrorist activities have been added to more classical disasters such as those due to the failure of industrial installations for instance. It is important to understand the nature of these global risks to be able to develop strategies to prepare for these events and plan effective responses in terms of disaster management and the associated human health impacts. The papers included in this volume cover such topics as Disaster analysis; Disaster monitoring and mitigation;

Emergency preparedness; Risk mitigation; Security decision making; Community recovery and resilience; Socio-economic issues; Public health risk; Disaster psychology; Human factors; Multi-hazard risk assessment; Crisis and communication; Learning from disasters; Terrorism and man-made disasters; Business and service continuity; Disaster risk reduction (DRR); New technologies and tools for disaster evaluation; Disaster governance policies; Environmental issues; Recovery and restoration; Disaster modelling; Surveillance and remote sensing; Disaster response.

Salt Wars Michael F. Jacobson 2021-09-14 How food industry lobbyists and a small group of scientists have successfully fought government efforts to reduce dangerous levels of sodium in our food. A high-sodium diet is deadly; studies have linked it to high blood pressure, strokes, and heart attacks. It's been estimated that excess sodium in the American diet causes as many as 100,000 deaths and many billions of dollars in avoidable health-care costs each year. And yet salt is everywhere in our diets--in packaged foods, fast foods, and especially meals at table-service restaurants. Why hasn't salt received the sort of public attention and regulatory action that sugar and fat have? In Salt Wars, Michael Jacobson explains how the American food industry and a small group of scientists have successfully fought government efforts

to reduce dangerous levels of sodium in our food.

John Beilein at Michigan Tim Rooney 2020-01-31

When John Beilein arrived at University of Michigan in 2007, the once-proud men's basketball program was adrift after failing to reach the NCAA Tournament for nine straight seasons. Over the next twelve years, he became the program's all-time winningest coach, reached two national championship games, won four Big Ten championships and produced eight NBA first-round draft picks. In an age of ethical lapses throughout college basketball, Beilein succeeded without a hint of impropriety. As much a teacher as a coach, he consistently identified undervalued recruits, taught them his innovative offensive system and carefully developed them into better players--an approach to the game that drove his unprecedented rise from high school junior varsity coach to head coach of the Cleveland Cavaliers. This book examines his tenure at Michigan in detail for the first time.

Power Jane Golley 2019-04-11 In 2018, the People's Republic of China (PRC) was, by most measures, more powerful than at any other time in its history and had become one of the most powerful countries in the world. Its economy faced serious challenges, including from the ongoing 'trade war' with the US, but still ranked as the world's second largest. Its Belt and Road Initiative, meanwhile, continued to carve paths of influence and economic integration across several continents. A deft combination of policy, investment,

and entrepreneurship has also turned the PRC into a global 'techno-power'. It aims, with a good chance of success, at becoming a global science and technology leader by 2049 – one hundred years from the founding of the PRC. In surveying the various ways in which the Party-state wields its hard, soft, and sharp power, the *China Story Yearbook: Power* offers readers a sense of the diversity of power at work both in China and abroad. Citizens of the PRC have long negotiated the state's influence; increasingly, diaspora communities and other actors are now being subject to its might. As with previous editions in the series, we place important developments in historical context, and adopt a cross-disciplinary approach: it is our view that economy and politics cannot be divorced from culture, history, and society. The Yearbook provides accessible analysis of the main events and trends of the year and is an essential tool for understanding China's growing power and influence around the world.

After Suburbia Roger Keil 2022-08-31 *After Suburbia* presents a cross-section of state-of-the-art scholarship in critical global suburban research and provides an in-depth study of the planet's urban peripheries to grasp the forms of urbanization in the twenty-first century. Based on cutting-edge conceptual thought and steeped in richly detailed empirical work conducted over the past decade, *After Suburbia* draws on research from Asia, Africa, Australia, Europe, and the Americas to showcase comprehensive global

scholarship on the urban periphery. Contributors explicitly reject the traditional centre-periphery dichotomy and the prioritization of epistemologies that favour the Global North, especially North American cases, over other experiences. In doing so, the book strongly advances the notion of a post-suburban reality in which traditional dynamics of urban extension outward from the centre are replaced by a set of complex contradictory developments. After Suburbia examines multiple centralities and diverse peripheries which mesh to produce a surprisingly contradictory and diverse metropolitan landscape.

Coloniality and Racial (In)Justice in the University  
Sunera Thobani 2021-11-08 Re-defining the university as the site of colonial and racial injustice, this collection examines the numerous ways in which racialized and Indigenous women and queer scholars contest the institution's power and authority.

Animalkind Ingrid Newkirk 2021-01-19 The founder and president of PETA, Ingrid Newkirk, and bestselling author Gene Stone explore the wonders of animal life with “admiration and empathy” (The New York Times Book Review) and offer tools for living more kindly toward them. In the last few decades, a wealth of new information has emerged about who animals are: astounding beings with intelligence, emotions, intricate communications networks, and myriad abilities. In Animalkind, Ingrid Newkirk and Gene Stone present these findings in a concise and awe-inspiring way,

detailing a range of surprising discoveries, like that geese fall in love and stay with a partner for life, that fish “sing” underwater, and that elephants use their trunks to send subsonic signals, alerting other herds to danger miles away. Newkirk and Stone pair their tour through the astounding lives of animals with a guide to the exciting new tools that allow humans to avoid using or abusing animals as we once did. Whether it’s medicine, product testing, entertainment, clothing, or food, there are now better options to all the uses animals once served in human life. We can substitute warmer, lighter faux fleece for wool, choose vegan versions of everything from shrimp to marshmallows, reap the benefits of animal-free medical research, and scrap captive orca exhibits and elephant rides for virtual reality and animatronics. *Animalkind* provides a fascinating look at why our fellow living beings deserve our respect, and lays out the steps everyone can take to put this new understanding into action.

Polish Cinema Today Helena Goscilo 2021-08-19 This book examines recent innovations in Polish film. Monster of Their Own Making Jack Buckby 2020-04-

28 As a teenager in a working-class English town, Jack Buckby found himself at the center of the biggest nationalist movement in modern British history.

Looking for a political group that championed working people concerned about mass immigration, he stumbled into a world of anti-Semitism, racist paranoia, and extreme-right violence and terrorism. Through those experiences, Jack explains how both the left and the right fundamentally misunderstand what it means to be "far right" and why young men are becoming radicalized across the Western world. Through a three-pronged attack carried out by the media, negligent politicians, and far-left ideologues, the white working

class is being backed into a corner and forced to either be quiet, or get radical.

Lessons from Trump's Political Communication Marco Morini 2020-02-22 This book explores Donald Trump's political communication as a candidate and in the first two years in office. The 45th US President is dominating the media system and 'building the agenda' through the combined action of five strategies. He disintermediates his communication and manufactures a permanent campaign climate based on strong and inflammatory language to attract a constant and decisive media coverage. In disarticulating old-style political rhetoric, he privileges emotions over contents, slogans above thought. Trump's jokes, mockeries and distinct rhetoric – showing similarities to rhetorical strategies of Nazis during the 1930s – help him impersonate the populist 'everyday man' who fights against the elites. His dominance of the news cycle also reflects a desire for higher TV ratings and Web traffic numbers. Essentially, Trump has critically exploited the media's news logics and taken advantage of the American public's lack of trust in journalism.

Con Artist Dating Millie Osborne 2019-12-01 Whether you find your partner online or unplugged, it is important to know the subtle yet life changing behaviors common to people who want you to love them so that they can take advantage of your body, your will and your money. As a self-help guide, this

book will explore the well-concealed world of con artists operating on real people like you and me. This book will act as your personalized information tour, providing detailed and interactive views of how con artists bait, hook and assimilate people under their control. Sex is one of the most powerful ways to influence behavior. Con artists aggressively use sex early in relationships to strengthen their control over others. This guide will enlighten the reader to better understand and interpret what is seen and unseen, what is heard and not heard. Welcome to a unique journey into a facet of relationships where influence is so unbalanced as to brainwash and hijack free will. This self-help guide will empower you with the knowledge to judge accurately and confidently for yourself. This is how other readers describe Con Artist Dating: "In an age of countless internet and social media scams, relationship scams may be the cruelest of all, because they prey on the need we all feel for love and affection. The combination of a lonely heart and a con artist who is good at being convincing is a very dangerous one. In this book Millie Osborne wants to give not just potential victims but also their families the information they need to determine when it's not really love someone is after." -Tom Roussey, TV Reporter "Dr. Osborne is a psychiatrist, scholar and author who creates a portrait of a personality type personified by a lust for power and profit. Fascinating and often surprising, the book provides many valuable

insights and compelling examples of just what it is that defines a “con artist.” The book is a pleasure to read, enlightening readers with all degrees of experience, including parents; and an indispensable guide to anyone interested in the dynamics of con-artistry and its pernicious impact on the victims.” -Lorraine S. Roth, M.D., Editor of ‘Current Psychiatry’ and Henry J. Roth, Ph.D., Author of ‘Tales from Time Out’ and ‘Climbing Jacobs Ladder’ “Millie Osborne, M.D., psychiatric consultant, is expertly qualified to write a book that guides readers through the world of con artist dating. It has been her passion to relieve human suffering through knowledge and information that enlightens readers. Any woman or man hungry for love should read this unique self-help guide to personal growth and development. It could save them the heartache of emotional and financial harm that results from becoming a victim of deceit. Therapists might want to recommend this book to their heart-broken clients.” - John C. Russotto, Ph.D., Mental Health Consultant "Soul searching...a relentlessly honest and powerful guide that leaves you shaken and thankfully educated. This book takes a deep dive into illuminating the unforeseen, unanticipated and unsettling social and moral consequences involving manipulative behaviors. This is required reading that will leave you empowered and strengthened.” -Yvonne L. Taylor, Ph.D., MSN, NP “Human relationships are dominated by people who take advantage of human gullibility and perceived

needs masquerading as wants. As long as humans WANT to believe things for reasons having nothing to do with facts and evidence, there will ALWAYS be unscrupulous people who come along and take advantage of that by feeding such beliefs which do not require any demonstrable and credible evidence. Skepticism is the virtue which is far more likely to save one from being conned by creeps everywhere and in all aspects of life, not just dating. Finding the right people in life in whom you can place your trust is EVERYTHING, and the only way to find them is by seeing how well their actions match their words - basically facts and evidence, just like one would use to determine if a certain factor is the cause of an observed outcome. Anyone can say anything, but it is what one does - well THAT is your EVIDENCE.” -

100% Renewable Energy Transition Claudia Kemfert  
2020-01-23 Energy markets are already undergoing considerable transitions to accommodate new (renewable) energy forms, new (decentral) energy players, and new system requirements, e.g. flexibility and resilience. Traditional energy markets for fossil fuels are therefore under pressure, while not-yet-mature (renewable) energy markets are emerging. As a consequence, investments in large-scale and capital intensive (traditional) energy production projects are surrounded by high uncertainty, and are difficult to hedge by private entities. Traditional energy production

companies are transforming into energy service suppliers and companies aggregating numerous potential market players are emerging, while regulation and system management are playing an increasing role. To address these increasing uncertainties and complexities, economic analysis, forecasting, modeling and investment assessment require fresh approaches and views. Novel research is thus required to simulate multiple actor interplays and idiosyncratic behavior. The required approaches cannot deal only with energy supply, but need to include active demand and cover systemic aspects. Energy market transitions challenge policy-making. Market coordination failure, the removal of barriers hindering restructuring and the combination of market signals with command-and-control policy measures are some of the new aims of policies. The aim of this Special Issue is to collect research papers that address the above issues using novel methods from any adequate perspective, including economic analysis, modeling of systems, behavioral forecasting, and policy assessment. The issue will include, but is not be limited to:

- Local control schemes and algorithms for distributed generation systems
- Centralized and decentralized sustainable energy management strategies
- Communication architectures, protocols and properties of practical applications
- Topologies of distributed generation systems
- improving flexibility, efficiency and power quality
- Practical issues in the control design and

implementation of distributed generation systems

Creating Healthy Organizations Graham Lowe 2020-04-02  
How can you future-proof your organization by making it humanly sustainable? Creating Healthy Organizations answers this question, showing how to forge stronger links between employee well-being and the future success of any organization. The book makes a compelling case for resilient and humanly sustainable businesses by focusing on improving employees' well-being. Employee stress, burnout, work-life conflict, and disengagement remain significant workplace problems. Yet, there are important signs of progress. The healthy organization concept has begun moving into the mainstream of corporate wellness. Scholarly research has advanced beyond making a business case for workplace health promotion to showing how successful interventions are based on a culture of health and closer ties with occupational health and safety. More companies are addressing mental health issues, striving to make workplaces psychologically healthy and safe. Expanded environmental sustainability frameworks provide an opening for the more sustainable use of human resources. As well, extensive tools are now available in many countries to guide actions aimed at developing healthy, safe, and thriving workplaces. These recent workplace trends and resources highlight

the need for an updated, concise, integrated, and practical analysis of the challenges of creating a healthier organization, the hurdles that must be overcome along the way, and the key success factors that can guide the improvement process. *Creating Healthy Organizations, Revised and Expanded Edition* fills this gap in knowledge and practice, guiding those committed to making their organizations healthier.

Technology Leadership for Innovation in Higher Education Qian, Yufeng 2019-02-15 Higher education today faces several challenges including soaring cost, rising student debt, declining state support, and a staggering dropout rate. Digital technology enables numerous paths to innovation and promising solutions to these crises in higher education. However, few efforts have been made to look into the dynamic relationship between technology, innovation, and leadership and how they work together to transform

teaching and learning, campus life, student service and support, administration, and university advancement. *Technology Leadership for Innovation in Higher Education* is a pivotal reference source that provides vital research on the intersection of technology, innovation, and leadership in higher education by examining the role of technology in activating, promoting, and accelerating innovation and by identifying challenges regarding technology leadership. While highlighting topics such as blended teaching, faculty development, and university advancement, this publication is ideally designed for teachers, principals, educational and IT management and staff, researchers, students, and stakeholders in higher education seeking current research on critical leadership dimensions required for effective education leaders.

*Academic Misconduct and Plagiarism* Bernard Montoneri 2020-11-15 This book discusses the issue of academic misconduct and publication ethics in general and plagiarism in particular, with a focus on case studies in various universities around the world (notably in Japan, Singapore, Australia, USA, and Canada). We are especially interested in students' and teachers' perception of academic misconduct and their definition and understanding of plagiarism. Most chapters discuss undergraduates' understanding of academic dishonesty and students' experiences using plagiarism softwares. The book also analyzes

teachers' perception of cheating and how they respond to it. Writing is perceived by all of the teachers to be the most important form of assessment that required preventative measures in order to reduce the occurrence of academic dishonesty among students. Each chapter recommends strategies to fight plagiarism, such as establishing guidelines and regulations concerning academic integrity, awareness of the scale of the issue (scandals at all levels in most countries, even including famous scholars, administrators, and elected officials), assessing the damage done to academic reputation and credibility, developing trust and credibility on social media (especially with the recent disturbing growth of fake news and data), minimizing the proliferation of dishonest accreditation, of identity theft, of fake peer-reviews, and fighting the growing number of fake papers, with or without the use of computer-generated academic works.

**Adventures in the Chinese Economy: 16 Years from the Inside** Sven Agten 2021-05-04 This book provides an insightful overview of the social-economical trends in modern China, their global influence, and the disrupting consequences for businesses and countries all over the world. From Bureaucracy to Bullets Bree Akesson 2022-02-11 From Bureaucracy to Bullets uses eight compelling case studies--from five continents and spanning the 20th and 21st centuries--to explore the concept of extreme domicide, or the intentional destruction of home as a result of political violence. Moving beyond mere description, From Bureaucracy to Bullets identifies common factors that contribute to extreme domicide, thereby providing human rights actors with a framework to hold perpetrators accountable for their actions.

Southbound Anjali Enjeti 2021-04-15 A move at age ten from a Detroit suburb to Chattanooga in 1984 thrusts Anjali Enjeti into what feels like a new world

replete with Confederate flags, Bible verses, and whiteness. It is here that she learns how to get her bearings as a mixed-race brown girl in the Deep South and begins to understand how identity can inspire, inform, and shape a commitment to activism. Her own evolution is a bumpy one, and along the way Enjeti, racially targeted as a child, must wrestle with her own complicity in white supremacy and bigotry as an adult. The twenty essays of her debut collection, *Southbound*, tackle white feminism at a national feminist organization, the early years of the AIDS epidemic in the South, voter suppression, gun violence and the gun sense movement, the whitewashing of southern literature, the 1982 racialized killing of Vincent Chin, social media's role in political accountability, evangelical Christianity's marriage to extremism, and the rise of nationalism worldwide. In our current era of great political strife, this timely collection by Enjeti, a journalist and organizer, paves the way for a path forward, one where identity drives coalition-building and social change.

Oilcraft Robert Vitalis 2020-07-14 A bracing corrective to the myths that have shaped economic, military, and diplomatic policy, dispelling our oil-soaked fantasies of dependence. There is a conventional wisdom about oil—that the U.S. military presence in the Persian Gulf is what guarantees access to this strategic resource; that the "special" relationship with Saudi Arabia is necessary to stabilize an otherwise volatile market; and that these assumptions in turn provide Washington enormous leverage over Europe and Asia. Except, the conventional wisdom is wrong. Robert Vitalis debunks the myths to reveal "oilcraft," a line of magical thinking closer to witchcraft than statecraft. Oil is a commodity like any other: bought, sold, and subject to market forces. Thus, the first goal of this book is to expose the suspect fears of oil scarcity and conflict. The second goal is to investigate the significant geopolitical impact of these false beliefs. In particular, Vitalis shows how we can reconsider the question of the U.S.–Saudi special relationship, which confuses and traps many into unnecessarily accepting what they imagine is a devil's bargain. The House of Saud does many things for U.S. investors, firms, and government agencies, but guaranteeing the flow of oil, making it cheap, or stabilizing the price isn't one of them. Freeing ourselves from the spell of oilcraft won't

be easy—but the benefits make it essential.

**Enemies and Allies: An Unforgettable Journey Inside the Fast-Moving & Immensely Turbulent Modern Middle East** Joel C. Rosenberg 2021-09-07 Do recent changes in the Middle East signal peace? One Arab country after another is signing historic, game-changing peace, trade, investment, and tourism deals with Israel. At the same time, Russia, Iran, and Turkey are forming a highly dangerous alliance that could threaten the Western powers. Meanwhile, the U.S. is drawing down its military forces in the Mideast and focusing on matters closer to home. Where's it all heading? New York Times bestselling author Joel C. Rosenberg, based in Jerusalem, skillfully and clearly explains the sometimes-encouraging, sometimes-violent, yet rapidly shifting landscape in Israel and the Arab/Muslim world. *Enemies and Allies* will take readers behind closed doors in the Middle East and introduce them to the very kings and crown princes, presidents and prime ministers who are leading the change. Includes exclusive, never-before-published quotes, insights, and analysis from the author's conversations with some of the most complex and controversial leaders in the world: Saudi Crown Prince Mohammed bin Salman (MBS) Egypt's President Abdel Fattah el-Sisi Jordan's King Abdullah II United Arab Emirates' Crown Prince Mohammed bin Zayed (MBZ) Israeli prime minister Benjamin Netanyahu

From the Ground Up Charles A. Gargano 2019-02-26

“Using each major lesson learned during the decade-plus of rebuilding lower Manhattan after 9/11—each achievement and setback—From the Ground Up offers Americans, for the first time, a comprehensive, practical, and inspiring plan for re-engineering the entire country. It’s about time.”—Governor George Pataki

Confronted with helping to rebuild the ruins of lower Manhattan in the aftermath of September 11, Ambassador Charles A. Gargano spent the next twelve years cleaning up and revitalizing Ground Zero and developing One World Trade Center. The experience was life affirming and provided a signature testament of hope in the shadow of one of the worst events of the twenty-first century. As a legendary real estate icon, engineer, and Republican strategist who served in the US government for three decades, Gargano has become a thought leader and pioneer in the field of re-engineering. He knows what does and doesn’t work and how to apply that experience to the foundation of America. Gargano’s approach to engineering powerful, beautiful structures and planting seeds of hope in our greatest cities has given him a distinct vantage point and unique voice. Seasoned with authority, his advice is indispensable for rebuilding an America at risk of ruin. Now, facing the most politically divisive moment in generations, Gargano applies his decades of experience in public service toward the

task of re-engineering our nation's political and moral infrastructure From the Ground Up with traditional, values-based leadership. In the words of Gargano, the only person who can get a grip on this off-course country—and steer it true—is you.

Research Anthology on Developing Effective Online Learning Courses Management Association, Information Resources 2020-12-18 In the current educational environment, there has been a shift towards online learning as a replacement for the traditional in-person classroom experience. With this new environment comes new technologies, benefits, and challenges for providing courses to students through an entirely digital environment. With this shift comes the necessary research on how to utilize these online courses and how to develop effective online educational materials that fit student needs and encourage student learning, motivation, and success. The optimization of these online tools requires a deeper look into curriculum, instructional design, teaching techniques, and new models for student assessment and evaluation. Information on how to create valuable online course content, engaging lesson plans for the digital space, and meaningful student activities online are only a few of many current topics of interest for promoting student achievement through online learning. The Research Anthology on Developing Effective Online Learning Courses provides multiple perspectives on how to develop

engaging and effective online learning courses in the wake of the rapid digitalization of education. This book includes topics focused on online learners, online course content, effective online instruction strategies, and instructional design for the online environment. This reference work is ideal for curriculum developers, instructional designers, IT consultants, deans, chairs, teachers, administrators, academicians, researchers, and students interested in the latest research on how to create online learning courses that promote student success.

The College Affordability Crisis Laurie Collier Hillstrom  
2020-11-06 This volume provides a comprehensive and evenhanded overview of the escalating college affordability crisis in the United States. It explains how higher education became so expensive and explores the implications of high college loan debt for students and American society. The 21st Century Turning Point series is a one-stop resource for understanding the people and events changing America today. Each volume provides readers with a clear, authoritative, and unbiased understanding of a single issue or event that is driving national debate about our country's leaders, institutions, values, and priorities. This particular volume is devoted to the issue of the rising cost of higher education in the United States. The expense of pursuing a college degree has become so high for so many students, in fact, that the country is experiencing what many educators, economists,

parents, and students describe as a college affordability crisis. This work provides an accessible, accurate account of the factors driving this trend, including dramatic reductions in higher education spending by states; for-profit colleges; predatory, unscrupulous, and lightly regulated student loan service companies; and spiraling spending by colleges and universities competing to attract students. Entries devoted to specific events and milestones related to the student loan crisis Biographical profiles of important lawmakers, public officials, and reformers Essays that explore the lasting impact of the college affordability crisis on students, families, institutions of higher education, and American society as a whole Annotated bibliography of sources for further study

The Second Offline Hidenori Tomita 2021-09-01 This book presents current research on mobile Internet society. Past research was not able to show a clear analytical framework, thus was unable to close in on the fundamental changes in that society. This book, however, analyzes mobile Internet society by introducing the concept of “doubling of time and place” and the analytical framework of the “second offline.” The emergence of the smartphone has made Internet use easier, and now, people are constantly using online information in the midst of their daily lives. Our society is transitioning from the first offline society, a society without being connected to Internet, to the second offline society, where users are connected to the Internet at all times. In this second offline society, our sense of time and place are beginning to change. Broadcast and communication media have made possible the overlapping of different places, which has been called the doubling of place. Furthermore, virtual reality (VR) and augmented reality (AR) technologies have enabled the overlap of different times, which this book calls the doubling of time. The smartphone makes both possible. With the second offline and the doubling of time and place as keywords, the book takes into consideration research that includes, among other topics, the media usage of young adults, selfies,

education, social media usage, mobile games, work stations, and consumer activity in the mobile Internet society.

The Immigration Crisis in Europe and the U.S.-Mexico Border in the New Era of Heightened Nativism Victoria Carty 2020-11-24 In The Immigration Crisis in Europe and the U.S.-Mexico Border in the New Era of Heightened Nativism, Victoria Carty compares the immigration crises in the European Union and the United States. Beginning in 2014, the Arab Spring upheavals and failed states in Northern Africa and the Middle East overwhelmed many European countries which the European Union system was not prepared for. In the Americas, failed states in Central America such as Honduras, Guatemala, and El Salvador also led to an unexpected influx of immigrants to the United States, many of them unaccompanied minors, fleeing gangs, violence and poverty. In The Immigration Crisis in Europe and the U.S.-Mexico Border, Carty studies theories of immigration, social movements, and critical race theory to provide a better understanding of the current immigration crises in Europe and the United States. Carty shows that the high volume of immigration in both the EU and the United States has led to a resurgence of nativist sentiments and white supremacy groups.

Closing the Gap Sarah Thomas 2022-08-26 Three experts on equity and technology offer concrete, evidence-based strategies for classroom teachers to

move toward digital equity in K12 settings. Closing the Gap is an ISTE book series designed to reflect the contributions of multiple stakeholders seeking to ensure that digital equity is achieved on campuses, in classrooms, and throughout education. In this series, authors Nicol R. Howard, Sarah Thomas, and Regina Schaffer offer historical and philosophical insights while exploring challenges and solutions unique to teacher preparation programs, pre-service and in-service teachers, and instructional coaches. The second title in the Closing the Gap series, this book includes:

- Examination of digital equity and the “problem of practice” for teachers and coaches
- Strategies for connecting the ISTE Educator and Student Standards to practice
- Discussion of key challenges facing teachers in today’s classrooms, such as access, connectivity, limited resources, digital divide, and the homework gap
- Research-based vignettes from teachers who have encountered and conquered some of the challenges addressed in the book, and from edtech coaches who have implemented equity-centered innovative professional development

This book helps teachers address the challenges of teaching in the digital age, providing positive examples and recommendations for achieving digital equity in their classroom communities.
