Democracy Disrupted: Communication in the Volatile 2020 Presidential Election Benjamin R. Warner 2022-09-30 Leading scholars analyze three disruptions in the 2020 presidential campaign and election: disruptions to the status quo caused by the renewed quest for racial justice and greater diversity of candidates; pandemic disruptions to traditional campaigning; and disruptions to democratic norms.

Confronting the Caliphate Isak Svensson 2022-07-12 Jihadist rebel groups that take control over a territory, claim authority over its population, and implement radical religious laws have become a rising security issue over the last decade. Generally brutal and authoritarian, the best-known manifestation of this phenomenon is the Islamic State (IS). While the IS has been decimated in the last few years, most analysts agree that the problem of jihadist violence is far from over, and that the IS may very well re-configure itself in a not so distant future. Moreover, beyond Iraq and Syria, the security threat posed by violent jihadism remains an acute issue. Yet no one has hitherto systematically explored the potential for civil resistance against jihadist armed groups. In *Confronting the Caliphate*, Isak Svensson and co-authors Daniel Finnbogason, Dino Krause, Luís Martínez Lorenzo, and Nanar Hawach focus on a core set of questions: What can civilians, who oppose the jihadists' attempt to rule them, do to manifest their dissent? To what extent are civilians engaging in acts of resistance against jihadist rebel rule and what does such resistance look like? Does it matter, and can it in any way influence the trajectories of jihadist proto-states? New military and political realities in Iraq and Syria have opened up the possibility to generate new knowledge in areas where the IS has been pushed back. The authors draw from a novel survey on civil resistance against the IS in Mosul after the IS lost control of the city. This survey--the first of its kind--concentrates on the extent and character of resistance behavior against the IS. The authors also utilize contemporary Arab-language social media blogs and news websites in order to document protests against jihadists in Syria, and they also draw on interviews with activists and civilian in Syria and Lebanon who have lived under rule of jihadist groups. Importantly, they show that the international character of jihadist groups are often perceived as alien to local customs, thereby triggering resistance. Given the events of the recent past and the potential resurgence of such groups, this book is a valuable intervention that not only shows us how jihadists rule, but provides the best explanation yet of how ordinary people resist jihadist totalitarianism.

All Roads Lead North Amish Raj Mulmi 2022-05-01 During the June 2020 territorial dispute over Kalapani, India blamed tensions on a newly assertive Nepal's deepening relations with China. But beyond the accusations and grandstanding, this reflects a new reality: the power equations in South Asia have been redrawn, to make space for China. Nepal did not turn northwards overnight. Its ties with China have deep historical roots built on Buddhism, dating to the early first millennium. While India's unofficial 2015 blockade provided momentum to the rift with Delhi, Nepal has long wanted deeper ties with Beijing, to counteract India's oppressive intimacy. With China's growing South Asian and global ambitions, Nepal now has a new primary bilateral partner-and Nepalis are forging a path towards modernity with its help, both in the remote borderlands and in the cities. *All Roads Lead North* offers a long view of Nepal's foreign relations, today underpinned by China's world-power status. Sharing never-before-told stories about Tibetan guerrilla fighters, failed coup leaders and trans-Himalayan traders, Nepal analyst Amish Raj Mulmi examines the histories binding mountain communities together across the Sino-Nepali border. Part history, part journalistic account, Mulmi's is a complex, compelling and rigorously researched study of a small country caught between two neighbourhood giants.

Research Handbook on Compliance in International Human Rights Law Grote, Rainer 2021-10-21 This comprehensive Research Handbook offers an in-depth examination of the most significant factors affecting compliance with international human rights law, which has emerged as one of the key problems in the efforts to promote effective protection of human rights. In particular, it examines the relationships between regional human rights courts and domestic actors and judiciaries.

The Business of Scholarly Publishing Albert N. Greco 2020 "This is a detailed analysis of the business of the scholarly publishing in the U.S. of: books; journals; pre-prints; and various scholarly publications in institutional repositories. Drawing on an extensive review of the literature, and statistical sources, the book examines: the changing environment of scholarly publishing; the product, price, placement, promotion, and costs (including some P & L statements) of scholarly books and journals. Special attention is paid to: the history and development of scholarly books and journals; intellectual property issues, including the development of the U.S. copyright law and infringement issues Sci-Hub; an author's contract; and the impact of technology (including open access) on books and journals. The book also discusses how scholarly publishers are trying to manage in what are turbulent times. The book contains extensive notes, a detailed bibliography, book and journal statistical tables, and figures."--

American Ingrate Benjamin Weingarten 2020-03-17 She says that America was "founded by the genocide of indigenous people and on the backs of slaves," and that "ignorance really is pervasive" among Americans today. She says America must "dismantle" capitalism and "demilitarize" U.S. foreign policy, which she sees "from the perspective of a foreigner," tweeting "thousands of Somalis [were] killed by...American forces...#NotTodaySatan." She says American support for Israel is "all about the Benjamins baby," and that American Jews disloyally pledge "allegiance" to Israel's "apartheid...regime," which has "hypnotized the world." She says of the 9/11 attacks: "some people did something." Shockingly, Congresswoman Ilhan Omar's (D-MN) words merely scratch the surface of her hatred of America—and the West—and divert our gaze from the nefarious actions she is taking to sabotage it from within. *American Ingrate* is the defining book on the size, scope, and nature of the threat posed by Representative Omar—the personification of the anti-American Left-Islamist nexus—heightened by her hidden collusion with like-minded adversaries foreign and domestic, and alleged criminality and corruption. This is a clarion wakeup call to the dangers epitomized by Rep. Omar. For she is not merely a lone radical in Congress, but the archetype of the new Democratic Party—and a uniquely dangerous figure at the heart of a uniquely dangerous challenge to America.

Xi Jinping Alfred L. Chan 2022 This book is the first comprehensive exploration of Chinese leader Xi Jinping's life and political career. Synthesizing a large corpus of cutting-edge research, Chan provides a

contextualized and balanced analysis of the leader and demonstrates how his life sheds light on the vicissitudes of the history of the People's Republic. The result is an original contribution to scholarship which is essential reading for anyone interested in the turbulent rise of China and its implications for the world.

Handbook of Research on Inclusive Development for Remote Adjunct Faculty in Higher Education Dailey-Hebert, Amber 2020-10-16 As the number of adjunct faculty teaching online courses remotely for their institutions continues to increase, so do the unique challenges they face, including issues of distance and isolation as well as problems pertaining to motivation, time, and compensation. Not only are these higher education faculty geographically isolated from each other and their colleagues at flagship campuses, but they also lack adequate institutional support and resources necessary to perform their roles. As institutions continue to rely heavily on this group of under-supported and undertrained instructors who teach the majority of online courses offered across the country, institutions need models and strategies to tap the expertise and perspectives of this group not only to improve teaching and learning in online programs but also to retain this critical talent pool. More consideration is needed to create institutional affinity and organizational commitment, build community, and create opportunities for remote adjunct faculty to be included as an integral component to their academic departments. The *Handbook of Research on Inclusive Development for Remote Adjunct Faculty in Higher Education* is a comprehensive reference work that presents research, theoretical frameworks, instructor perspectives, and program models that highlight effective strategies, innovative approaches, and unique considerations for creating professional development opportunities for remote adjunct faculty teaching online. This book provides concrete practices that foster inclusivity among contingent faculty teaching online as well as tangible practices that have been successfully implemented from faculty developers and academic leaders at institutions who have a large population of, and heavy reliance on, remote adjunct instructors. While addressing topics that include faculty engagement, mentoring programs, and instructor resources, this book intends to support remote instructors in the post-pandemic world. It is also beneficial for faculty development professionals; academic administrative leaders; higher education stakeholders; and higher education faculty, researchers, and students.

Censored 2020 Andy Lee Roth 2019-10-08 In the midst of Trump's attacks on the media, comes this look at the rigorous, independent reporting of the year's most underreported news stories. While the country's president displays a brazen disregard for the First Amendment and routinely demonizes the press as "the enemy of the people," *Censored 2020* looks beyond Donald Trump's dizzying contempt for the truth to clarify the corporate media's complicity in misinforming the American public--while also providing a clear vision of a better future, based on rigorous, trustworthy independent reporting that presents a fuller picture of truth. With a discerning eye, *Censored 2020* focuses the public's attention on the most important but underreported news stories of 2018-2019. These stories expose the corporate news media's systemic blind spots while highlighting the crucial role played by independent journalists in providing the kind of news necessary for informed, engaged citizens. The book also examines this year's lowlights in "junk food news" and "news abuse"--further revealing how corporate news often functions as propaganda--as well as highlights of exemplary organizations that champion "Media Democracy in Action." Additional chapters address the importance of constructive journalism, the untold story of Kashmir, news coverage of LGBTQ issues in the Trump era, "fake news" as a Trojan horse for censorship, and online memes as a form of political communication.

John Beilein at Michigan Tim Rooney 2020-01-31 When John Beilein arrived at University of Michigan in 2007, the once-proud men's basketball program was adrift after failing to reach the NCAA Tournament for nine straight seasons. Over the next twelve years, he became the program's all-time winningest coach, reached two national championship games, won four Big Ten championships and produced eight NBA first-round draft picks. In an age of ethical lapses throughout college basketball, Beilein succeeded without a hint of impropriety. As much a teacher as a coach, he consistently identified undervalued recruits, taught them his innovative offensive system and carefully developed them into better players--an approach to the game that drove his unprecedented rise from high school junior varsity coach to head coach of the Cleveland Cavaliers. This book examines his tenure at Michigan in detail for the first time.

Recent Advances of Hybrid Intelligent Systems Based on Soft Computing Patricia Melin 2020-11-06 This book describes recent advances on fuzzy logic, neural networks and optimization algorithms, as well as their hybrid combinations, and their application in areas such as intelligent control and robotics, pattern recognition, medical diagnosis, time series prediction and optimization of complex problems. The book contains a collection of papers focused on hybrid intelligent systems based on soft computing. There are some papers with the main theme of type-1 and type-2 fuzzy logic, which basically consists of papers that propose new concepts and algorithms based on type-1 and type-2 fuzzy logic and their applications. There are also some papers that present theory and practice of meta-heuristics in different areas of application. Another group of papers describes diverse applications of fuzzy logic, neural networks and hybrid intelligent systems in medical applications. There are also some papers that present theory and practice of neural networks in different areas of application. In addition, there are papers that present theory and practice of optimization and evolutionary algorithms in different areas of application. Finally, there are some papers describing applications of fuzzy logic, neural networks and meta-heuristics in pattern recognition problems.

Social Media and Sports Galen Clavio 2020-07-08 Social media communications play a huge role in the day-to-day operations of sport teams and organizations. Both current and aspiring sport business professionals need to know how to best leverage social media to meet their organizational goals, and *Social Media and Sports With Web Resource* will help pave the way by emphasizing the strategic, creative, and logistical elements of effective social media practices. Beginning with foundational concepts, students will first examine the history of social media and its impact on sports. They will learn about the categories of content used, including written content, images, produced video, live video, audio, graphics, dynamic visuals, and responses. They will then gain a better understanding of the social media environment by learning how to think about audiences and networks, evaluating how online communities act and interact, and considering key issues that may be encountered. The final chapters of the text assemble the building blocks from previous chapters into practical application, covering brand management strategies and overall social media presence from the perspective of a member of the sports media, a representative of a team or league, or an individual athlete. A related web resource, reviewed annually to stay current with evolving trends, provides a detailed look into major social networks and their technological elements, plus best practices, tips, and tricks for utilizing a variety of social media platforms. It also examines content methodologies, including podcasting, live video, and prerecorded video, and it discusses the use of social management software. Markers throughout the text refer students to the web resource when additional related content is available. Learning aids for students include Professional Insights, sidebars containing interviews with industry insiders; these real-world examples and professional advice provide depth and context to each chapter's content. Key Points highlight important points, end-of-chapter review questions promote practical application and ensure content comprehension, and bolded key terms are defined in an easy-to-reference glossary. *Social Media and Sports* offers a practical approach to understanding social media communications in the sports industry, with application extending to those working in journalism, public relations, broadcasting, advertising, and other sport business careers where knowledge of effective social media usage will maximize career potential. Note: The web resource is included with all new print books and some ebooks. For ebook formats that don't provide access, the web resource is available separately.

Yearbook of International Humanitarian Law, Volume 21 (2018) Terry D. Gill 2019-10-31 The main theme of this volume of the *Yearbook of International Humanitarian Law* is weapons law. In several chapters, how International Humanitarian Law (IHL) copes with old and new weapons as well as political developments in regard to military technology is discussed, while in two chapters the significance of non- or less-lethal weapons in peace-keeping and law enforcement operations as well as the legality of lethal autonomous weapon systems under IHL are analysed. Moreover, the volume describes the current status of

nuclear deterrence under international law. Another layer is added by examining how IHL influences the programming of automatic target recognition systems using artificial intelligence. The second part of the book contains a historic perspective on the roots of IHL in Europe, which can be traced back to the ninth century, as well as a Year in Review describing the most important events and legal developments in the area of IHL that took place in 2018. The Yearbook of International Humanitarian Law is the world's only annual publication devoted to the study of the laws governing armed conflict. It provides a truly international forum for high-quality, peer-reviewed academic articles focusing on this crucial branch of international law. Distinguished by contemporary relevance, the Yearbook of International Humanitarian Law bridges the gap between theory and practice and serves as a useful reference tool for scholars, practitioners, military personnel, civil servants, diplomats, human rights workers and students.

Small Cities Thinking Big Michael G. Hall 2021-10-08 Many cities with a population of 150,000 or less struggle to compete with their larger neighbors and often have trouble attracting residents and new businesses. This book explores the numerous ways these cities can compete on a larger scale without sacrificing their small-town character. It utilizes experiences from other cities, as well as from the author's time revitalizing Augusta, Maine (pop. 19,000). Featuring chapters that focus on organizing volunteers, adhering to aesthetics, marketing, urban planning, and more, this book tackles key paths every small city should follow when attempting to redevelop its image.

21st Century Prometheus Maurizio Martellini 2020-03-11 This book describes the evolving CBRN risk landscape and highlights advances in the "core" CBRN technologies, including when combined with (improvised) explosive devices (CBRNe threats). It analyses how associated technologies create new safety and security risks, challenging certain assumptions that underlie current control regimes. The book also shows how technologies can be enablers for more effective strategies to mitigate these risks. 21st-century safety and security risks emanating from chemical, biological, radiological and nuclear materials – whether resulting from natural events, accidents or malevolent use - are increasingly shaped by technologies that enable their development, production or use in ways that differ from the past. Artificial intelligence, the use of cyberspace, the revolution in the life sciences, new manufacturing methods, new platforms and equipment for agent delivery, hypersonic weapons systems, information tools utilised in hybrid warfare – these and other technologies are reshaping the global security environment and CBRN landscape. They are leading to a growing potential for highly targeted violence, and they can lead to greater instability and vulnerability worldwide. At the same time, technology offers solutions to manage CBRN risks. Examples are faster detection, more accurate characterisation of the nature and origin of CBRN agents, new forensic investigation methods, or new medical treatments for victims of CBRN incidents. New educational concepts help to foster a culture of responsibility in science and technology and strengthen governance. New training methods help develop practical skills to manage CBRN risks more effectively. The book concludes that there is a growing need for a holistic framework towards CBRN risk mitigation. Traditional arms control mechanisms such as global, regional or bilateral treaties and export controls are still needed, as they provide a necessary legal and institutional framework. But laws and technology denial alone will not suffice, and institutional mechanisms can at times be weak. Given the pace of technological progress and the diffusion of critical knowledge, tools and materials, policymakers must accept that CBRN risks cannot be eliminated altogether. Instead, society has to learn to manage these risks and develop resilience against them. This requires a "softer", broadly based multi-stakeholder approach involving governments, industry, the research and development communities, educators, and civil society. Furthermore, educating policymakers that cutting-edge technologies may seriously affect global strategic stability could create incentives for developing a more creative and contemporary arms control strategy that fosters cooperation rather than incremental polarisation.

Better Capitalism Paul E. Knowlton 2021-05-19 Sometime in your business life you've looked up from the task or person in front of you, paused before your head explodes, and thought to yourself, "There's got to be a better way!" This book offers you that better way. Whether you're in school preparing for the world of work or have experienced multiple careers, whether you make decisions that affect others or are affected by others' decisions as their employee or customer, whether you're part of a multinational corporation or a small business or a ministry or a government, this book shows how you're affected by plantation economics. It then shows you the more profitable—beneficial—viewing, thinking, and living of capitalism through the framework of Partnership Economics. Better Capitalism adds value across the full landscape of capitalism and the bridged worlds of business and faith. Ready for that better way? Read on to unleash a more profitable and ethical capitalism.

People's Republic of Neverland Robb Johnson 2020-10-01 There once was a time when teachers and communities were able to exercise democratic control over their schools. Now that power has been taken away, both centralised and privatised, under the guise of "reform." There is a forgotten history of the time before reform, and within it a bright horizon is visible, reachable only if educators and society at large can learn the lessons of the past. Robb Johnson entered the classroom as a new teacher in the 1980s and has spent a lifetime alongside his pupils encouraging both creativity and a healthy distrust of authority. This book is both memoir and polemic, a celebration of children's innate desire to learn, share, cooperate, and play, as well as a critique of bureaucratic interference. Johnson details how we ended up with the contemporary mass education systems and why they continually fail to give children what they need. Combining practical experience as a teacher with detailed pedagogical knowledge, and a characteristic playful style, Johnson is both court chronicler and jester, imparting information and creatively admonishing the self-important figureheads of the reform agenda. This book considers how schools and education relate to the wider society in which they are located and how they relate to the particular needs and abilities of the people who experience them. It shows that schools and education are contested spaces that need to be reclaimed from the state, and turned into places where people can grow, not up, not old, but as individuals. It offers alternative ways of running classrooms, schools, and perhaps even society.

Literary and Cultural Production, World-Ecology, and the Global Food System Chris Campbell 2021-08-12 Literary and Cultural Production, World-Ecology, and the Global Food System marks a significant intervention into the field of literary food studies. Drawing on new work in world literature, cultural studies, and environmental studies, the essays gathered here explore how literary and cultural texts have represented and responded to the global food system from the late nineteenth century to the present day. Covering topics such as the impact of colonial monocultures and industrial agriculture, enclosure and the loss of the commons, the meatification of diets, the toxification of landscapes, and the consequences of climate breakdown, the volume ranges across the globe, from Thailand to Brazil, Cyprus to the Caribbean. Whether it is anxieties over imported meat in late Victorian Britain, labour struggles on Guatemalan banana plantations, or food dependency in Puerto Rico, the contributors to this volume show how fiction, poetry, drama, film, and music have critically explored and contributed to food cultures worldwide.

Holocaust Education Stuart Foster 2020-07-06 Teaching and learning about the Holocaust is central to school curriculums in many parts of the world. As a field of discourse and a body of practice, it is rich, multidimensional and innovative. But the history of the Holocaust is complex and challenging, and can render teaching it a complex and daunting area of work. Drawing on landmark research into teaching practices and students' knowledge in English secondary schools, Holocaust Education: Contemporary challenges and controversies provides important knowledge about and insights into classroom teaching and learning. It sheds light on key challenges in Holocaust education, including the impact of misconceptions and misinformation, the dilemmas of using atrocity images in the classroom, and teaching in ethnically diverse environments. Overviews of the most significant debates in Holocaust education provide wider context for the classroom evidence, and contribute to a book that will act as a guide through some of the most vexed areas of Holocaust pedagogy for teachers, teacher educators, researchers and policymakers.

Decolonizing Latinx Masculinities Arturo J. Aldama 2020 With unity of heart and mind, the creative and the scholarly, Decolonizing Latinx Masculinities opens wide its arms to all non-binary, decolonial masculinities today to grow a stronger, resilient, and more compassionate new generation of Latinxs tomorrow.

Climate Change and the Voiceless

Randall S. Abate 2019-11-30 Identifies the common vulnerabilities of the voiceless and demonstrates how the law can evolve to protect their interests more effectively.

Pete Buttigieg A Short Unauthorized Biography Fame Life Bios 2022-02-18 Pete Buttigieg: A Short Unauthorized Biography is a short unauthorized biography produced from electronic resources researched that includes significant events and career milestones. Ideal for fans of Pete Buttigieg and general readers looking for a quick insight about one of today's most intriguing celebrities. This must-read short unauthorized biography chronicles: Who is Pete Buttigieg Things People Have Said about Pete Buttigieg Pete Buttigieg is Born Growing Up with Pete Buttigieg Pete Buttigieg Personal Relationships The Rise of Pete Buttigieg Significant Career Milestones Pete Buttigieg Friends and Foes Fun Facts About Pete Buttigieg How The World Sees Pete Buttigieg Pete Buttigieg A Short Unauthorized Biography is one of the latest short unauthorized biographies from Fame Life Bios. Check it out now!

Handbook of Climate Change Across the Food Supply Chain Walter Leal Filho 2022-04-22 This book presents climate change as a global phenomenon which affects the entire food chain. Many studies analyzing environmental impacts of food systems confirm significant effects of food production on climate change. Most of them associate primary production with emission of greenhouse gases identified as one of the causes resulting in warming the atmosphere and global climate effects. A wider perspective shows that the food chains start at farms with consumers being at the end of the pipeline. This approach emphasizes the role of the entire food chain highlighting different kinds of environmental impacts affecting climate change. On the other side, temperature changes and variations of precipitation patterns, together with extreme weather events and water reduction, are recognized as predictors for producing less food, decreased food quality, new food safety risks, biodiversity losses, and depletion of resources associated with food production in modified circumstances. Last but not least, these effects introduce new threats known as food security where some assumptions stress that almost one billion of people are hungry not receiving enough food as a result of climate changes. As a result, the UN highlights the need for combating climate change and promotes sustainable (food) consumption and production. Based on the perceived need to promote and disseminate information on climate change related to food system, the "Handbook of Climate change across the food supply chain" is being produced. The publication compiles information, experiences, practical initiatives, and projects around the subject matter and makes it available to a wide audience. It is expected that the "Handbook of Climate change across the food supply chain" makes many benefits of climate service clearer and, inter alia, leads to an increase in the demand for such important services.

Women of Color Political Elites in the U.S. Nadia E. Brown 2022-08-15 This book focuses on women of color political elites in the United States in varying levels of office and non-elected positions. In recent years increased attention has been paid to the role that women of color play in U.S. politics. These actors bring different priorities to office and also have to navigate not only sexism, but also barriers due to their racial or ethnic identity among other politically salient identities such as sexual orientation, nativity, immigration status, religiosity and ability. The chapters in this volume employ a variety of methods better understand to how ethno-racial minority women navigate the U.S. political system. This book uses an intersectional approach to understanding the opportunities and challenges that women of color political elites face in American politics. The chapters in this book were originally published as a special issue of the Journal of Women, Politics, and Policy.

The Torture Doctors Steven H. Miles MD 2020-03-02 Torture doctors invent and oversee techniques to inflict pain and suffering without leaving scars. Their knowledge of the body and its breaking points and their credible authority over death certificates and medical records make them powerful and elusive perpetrators of the crime of torture. In *The Torture Doctors*, Steven H. Miles fearlessly explores who these physicians are, what they do, how they escape justice, and what can be done to hold them accountable. At least one hundred countries employ torture doctors, including both dictatorships and democracies. While torture doctors mostly act with impunity—protected by governments, medical associations, and licensing boards—Miles shows that a movement has begun to hold these doctors accountable and to return them to their proper role as promoters of health and human rights. Miles's groundbreaking portrayal exposes the thinking and psychology of these doctors, and his investigation points to how the international human rights community and the medical community can come together to end these atrocities.

Abortion in America Mary Ziegler 2020-03-26 Ziegler documents a shift to debates on policy costs and benefits that deepened polarization on abortion in this first legal history of the period.

A Research Agenda for the Entrepreneurial University Ulla Hytti 2021-03-26 This far-reaching Research Agenda highlights the main features of entrepreneurial university research over the two decades since the concept was first introduced, and examines how technological, environmental and social changes will affect future research questions and themes. It revisits existing research that tends to adopt either an idealised or a sceptical view of the entrepreneurial university, arguing for further investigation and the development of bridges between these two strands.

China Statistical Yearbook 2011

Hothouse Earth Stephanie Sammartino McPherson 2021-03-02 As hurricanes, droughts, floods, and wildfires are increasing in regularity and intensity, climate change can no longer be ignored. Melting permafrost, forest dieback, ocean acidification, and other processes are creating positive feedback loops which could, if not aggressively and quickly addressed, spiral out of control and take global warming past the point of no return. *Hothouse Earth* examines how science, politics, and social justice must all be part of the equation to counteract climate change.

Towards a Global Core Value System in Doctoral Education Maresi Nerad 2022-09-27 Recent decades have seen an explosion in doctoral education worldwide. Increased potential for diverse employment has generated greater interest, with cultural, political and environmental tensions focusing the attention of new creative, responsible scholars. *Towards a Global Core Value System in Doctoral Education* provides an evaluation of changes and reforms in doctoral education since 2000. Recognising the diversity of academic cultures and institutional systems worldwide, the book advocates for a core value system to overcome inequalities in access to doctoral education and the provision of knowledge. Building on in-depth perspectives of scholars and young researchers from more than 25 countries, the chapters focus on the structures and quality assurance models of doctoral education, supervision, and funding from an institutional and comparative perspective. The book examines capacity building in the era of globalisation, global labour market developments for doctoral graduates, and explores the ethical challenges and political contestations that may manifest in the process of pursuing a PhD. Experts and early career researchers in the Global North and South collaborated in interdisciplinary and intergenerational teams to develop guidelines for doctoral education. They learned from each other about how to act courageously within a complex global context. The resulting recommendations and reflections are an invitation to reflect on the frames and conditions of doctoral education today.

Natural Hazards and Disaster Justice Anna Lukaszewicz 2020-01-24 This book explores policy, legal, and practice implications regarding the emerging field of disaster justice, using case studies of floods, bushfires, heatwaves, and earthquakes in Australia and Southern and South-east Asia. It reveals geographic locational and social disadvantage and structural inequities that lead to increased risk and vulnerability to disaster, and which impact ability to recover post-disaster. Written by multidisciplinary disaster researchers, the book addresses all stages of the disaster management cycle, demonstrating or recommending just approaches to preparation, response and recovery. It notably reveals how procedural, distributional and interactional aspects of justice enhance resilience, and offers a cutting edge analysis of disaster justice for managers, policy makers, researchers in justice, climate change or emergency management.

Like Nobody's Business Andrew C. Comrie 2021-02-23 How do university finances really work? From flagship public research universities to small, private liberal arts colleges, there are few aspects of these institutions associated with more confusion, myths or lack of understanding than how they fund themselves and function in the business of higher education. Using simple, approachable explanations supported by clear illustrations, this book takes the reader on an engaging and enlightening tour of how the money flows. How does the university really pay for itself? Why do tuition and fees rise so fast? Why do universities

lose money on research? Do most donations go to athletics? Grounded in hard data, original analyses, and the practical experience of a seasoned administrator, this book provides refreshingly clear answers and comprehensive insights for anyone on or off campus who is interested in the business of the university: how it earns its money, how it spends it, and how it all works.

Logistics Management Christian Bierwirth 2019-09-06 The conference proceedings contains contributions to the Logistics Management conference 2019. The objective of the LM conferences is to discuss new ideas and technical developments related to the management of logistic systems. A special focus is put on digitalization of supply chains and decarbonization in the transport industry.

Detecting Deception Amanda Sturgill 2020-08-20 Teaching fact checking and verification is an essential part of journalism education. When a confusing media environment includes statements like "Truth is not truth" and "The president offered alternative facts," students need to go beyond traditional reporting standards. They need to be trained to consider the presentation of reality in deciding if a statement is misleading or patently false. Detecting Deception applies the concepts of logical argumentation to supplement the verification techniques that are the stock and trade of any media professional. Pithy and practical, Amanda Sturgill draws from present day news examples to help students recognize the most common bad arguments people make. Detecting Deception is an essential tool for training future journalists to build stories that recognize faulty arguments and hold their subjects to a higher standard.

Social Transformations in India, Myanmar, and Thailand: Volume I Chosein Yamahata 2021-01-02 "This book focuses on the different challenges and opportunities for social transformation in India, Myanmar and Thailand, by centering communities and individuals as the main drivers of change. In doing so, it includes discussions on a wide array of issues including women's empowerment and political participation, ethno-religious tensions, plurilingualism, education reform, community-based healthcare, climate change, disaster management, ecological systems, and vulnerability reduction. Two core foundations are introduced for ensuring broader transformations. The first is the academic diplomacy project – a framework for an engaged academic enquiry focusing on causative, curative, transformative, and promotive factors. The second is a community driven collective struggle that serves as a grassroots possibility to facilitate positive social transformation by using locally available resources and enabling the participation of the resident population. As a whole, the book conveys the importance of a diversification of engagement at the grassroots level to strengthen the capacity of individuals as decisive stakeholders, where the process of social transformation makes communities more interconnected, interdependent, multicultural and vital in building an inclusive society."

They're Not Listening Ryan James Girdusky 2020-06-16 The election of Donald Trump in America and the referendum on European Union membership in the United Kingdom, otherwise known as Brexit, sent shockwaves throughout the world. Cosmopolitan elites across the globe never saw this populist uprising coming and still do not understand it. People across the globe have been increasingly voting for national-populist politicians over the last twenty years. The current nationalist-populist revolt started long before Donald Trump came down his golden escalator, and even before Prime Minister David Cameron agreed to hold a referendum vote on the EU. It wasn't isolated to rundown towns in Northern England or the Midwest, and it wasn't solely because of demographic changes, ignorance, intolerance, or a "whitelash." It was occurring because the elites chose to ignore voters' concerns when it came to globalism and neoliberalism. Issues like mass immigration, war, economic inequality, and national sovereignty were sacrosanct to neoliberals, and ultimately, their unwillingness to concede on these issues built discontent among millions of people.

Whiteness, Power, and Resisting Change in US Higher Education Kenneth R. Roth 2020-12-22 This edited volume connects the origins of US higher education during the Colonial Era with current systemic characteristics that maintain white supremacist structures and devalue students and faculty of color, as well as areas of study that interrogate Whiteness. The authors examine power structures within the academy that scaffold Whiteness and promote inequality at all levels by maintaining a two-tier faculty system and a dearth of Faculty and Administrators of Color. Finally, contributors offer systemic and collective solutions toward a more equitable redistribution of power, primarily among faculty and administration, through which other inequities may be identified and more easily addressed.

GaYme Changer Jens Schadendorf 2021-02-25 The LGBT+ community: for a long time marginalized, stigmatized, and criminalized – today the ultimate champions of creativity, diversity, and innovation in a highly competitive world. In addition, corporate social responsibility and ethical demands for inclusivity have now become economic directives every organization would like to attain. Gay, lesbian, transgender, bisexual, and queer individuals are symbols of diversity and economic power – true GaYme Changers developing the global economy faster and for the better. Supported by up-to-date research and illustrated by fascinating stories, Jens Schadendorf has traced the LGBT+ community and an increasing number of their allies from across the globe to discover the start of a revolution. It becomes clear, even in times of hostility, resistance, and crisis, it is economically and ethically beneficial for companies and societies everywhere in the world, to let LGBT+ members – individually and as part of organizations – develop into dynamic forces rooted in new forms of cooperation for ga(y)me changing results. Schadendorf shows investment in LGBT+ inclusion delivers a return. It is good for business and society and the right thing to do.

The Battle for Syria Christopher Phillips 2020-07-01 An unprecedented analysis of the crucial but underexplored roles the United States and other nations have played in shaping Syria's ongoing civil war "One of the best informed and non-partisan accounts of the Syrian tragedy yet published."--Patrick Cockburn, Independent Syria's brutal, long-lasting civil war is widely viewed as a domestic contest that began in 2011 and only later drew foreign nations into the fray. But in this book Christopher Phillips shows the crucial roles that were played by the United States, Russia, Iran, Saudi Arabia, Turkey, and Qatar in Syria's war right from the start. Phillips untangles the international influences on the tragic conflict and illuminates the West's strategy against ISIS, the decline of U.S. power in the region, and much more. Originally published in 2016, the book has been updated with two new chapters.

Are Generational Categories Meaningful Distinctions for Workforce Management? National Academies of Sciences, Engineering, and Medicine 2020-11-21 Headlines frequently appear that purport to highlight the differences among workers of different generations and explain how employers can manage the wants and needs of each generation. But is each new generation really that different from previous ones? Are there fundamental differences among generations that impact how they act and interact in the workplace? Or are the perceived differences among generations simply an indicator of age-related differences between older and younger workers or a reflection of all people adapting to a changing workplace? Are Generational Categories Meaningful Distinctions for Workforce Management? reviews the state and rigor of the empirical work related to generations and assesses whether generational categories are meaningful in tackling workforce management problems. This report makes recommendations for directions for future research and improvements to employment practices.
