Sex Trafficking and Human Rights Heather Smith-Cannoy 2022-09-01 Case studies explore how women's rights shape state responses to sex trafficking and show how politically empowering women can help prevent and combat human trafficking Human trafficking for the sex trade is a form of modern-day slavery that ensnares thousands of victims each year, disproportionately affecting women and girls. While the international community has developed an impressive edifice of human rights law, these laws are not equally recognized or enforced by all countries. Sex Trafficking and Human Rights demonstrates

that state responsiveness to human trafficking is shaped by the political, social, cultural, and economic rights afforded to women in that state. While combatting human trafficking is a multiscalar problem with a host of conflating variables, this book shows that a common theme in the effectiveness of state response is the degree to which women and girls are perceived as, and actually are, full citizens. By analyzing human trafficking cases in India, Thailand, Russia, Nigeria, and Brazil, they shed light on the factors that make some women and girls more susceptible to traffickers than others. This important book is both a call to understanding and a call to action: if the international community and state governments are to responsibly and effectively combat human trafficking, they must center the equality of women in national policy.

Trump Dr. Wendell V. Fountain 2019-10-03 This is an outstanding and unique book about President Trump. There is no other like it. It is filled with research about the greatest president of our time. Since Dr. Fountain is and has been a business-owner-consultant, entrepreneur, business graduate professor, and writer for more than three decades, he has captured the essence of President Donald J. Trump. This book is an excellent educational tool about the president, We the People's agenda, and the need to return to the thought and actions of our Founding Fathers, rather than misguided ruminations of socialism which is embraced by the Democrat Party. Thank God we are the inheritors of a dynamic republic. The 55 Founders gave their all for the creation of this sovereign nation, and we must not let what they sacrificed be in vain. The choice is clear in 2020. President Trump simply must be reelected, which also includes the election of enough conservative republicans, not fake republicans (F-Rs), in the House so that the president has the assistance he needs to pass meaningful legislation. The survival of this sovereign nation is contingent upon this decision in November 2020.

The Dynamics of Peaceful and Violent Protests in Hong Kong Sonny Shiu-Hing Lo 2020-09-29 This book shows that Hong Kong's protests from June to December 2019 originated from not only an attempt to extradite a Hong Kong man involved in a Taiwan murder case, but also China's effort at extraditing

corrupt mainlanders who laundered dirty money in the territory. The mixture of peaceful and violent protests was due to the snowballing effect of protestors-police confrontations, the imbalanced way in which police exercised their power, and protestors' strategies. The protests triggered the national security concerns of Beijing, which mobilized the People's Armed Police to Shenzhen as a warning rather than sending them openly to Hong Kong to avoid undermining the image of "one country, two systems." The entire debate raised the concerns of Washington, Taiwan, and foreign governments, heightening Beijing's sensitivity. After the bill was withdrawn, the anti-extradition movement has become anti-police and anti-mainland, constantly challenging the legitimacy of the Hong Kong government and Beijing. This is a valuable read for China watchers, political scientists and all those interested in the future of East Asia.

Wrecked Barrett J. Taylor 2022-08-12 Higher education is a central institution in U.S. democracy. In the 2010s, however, many states that spent previous decades building up their higher education systems began to tear them down. Growing hostility toward higher education reflected changing social forces that remade the politics of U.S. higher education. The political Right became increasingly reliant on angry white voters as higher education became more racially diverse. The Republican party became more closely connected to extremely wealthy donors as higher education became more costly. In *Wrecked*, Barrett J. Taylor shows how these social changes set a collision course for the Right and higher education. These attacks fed a policy agenda of deinstitutionalization, which encompassed stark divestment from higher education but was primarily characterized by an attack on the institution's social foundation of public trust. In response to these attacks, higher education officials have offered a series of partial defenses that helped higher education to cope in the short-term but did nothing to defend the institution itself against the long-term threat of declining public trust. The failure to address underlying issues of mistrust allowed conflict to escalate to the point at which many states are now wrecking their public higher education systems. *Wrecked* offers a unique and compelling perspective linking higher

education policymaking to broader social and political forces acting in the twenty-first century.

The Battle for Syria Christopher Phillips 2020-07-01 An unprecedented analysis of the crucial but underexplored roles the United States and other nations have played in shaping Syria's ongoing civil war "One of the best informed and non-partisan accounts of the Syrian tragedy yet published."--Patrick Cockburn, Independent Syria's brutal, long-lasting civil war is widely viewed as a domestic contest that began in 2011 and only later drew foreign nations into the fray. But in this book Christopher Phillips shows the crucial roles that were played by the United States, Russia, Iran, Saudi Arabia, Turkey, and Qatar in Syria's war right from the start. Phillips untangles the international influences on the tragic conflict and illuminates the West's strategy against ISIS, the decline of U.S. power in the region, and much more. Originally published in 2016, the book has been updated with two new chapters.

Gendered Domestic Violence and Abuse in Popular Culture Shulamit Ramon 2020-11-30 As binge-watching and streaming lead to increasing amounts of content and screen time, understanding how domestic violence and abuse is portrayed in popular culture and its impact on DVA in our society is more important than ever. This collection demonstrates how networked communication is influencing activism, both online and in the real-world.

The Human Rights of Older Persons Bridget Lewis 2020-08-07 This book provides a comprehensive human rights analysis of key areas of law affecting older persons, including legal capacity; elder abuse; accommodation and aged care; healthcare; employment; financial security, retirement, and estate planning; and social and cultural participation. The research identifies individual autonomy and participation in decision-making as fundamental to a human rights-based approach to elder law. The book argues that a paradigm shift must occur away from traditional medical and charity-based understandings of 'old age' to instead acknowledge older persons as active holders of enforceable rights. The book argues that a Convention on the Rights of Older Persons is an essential tool in achieving this, but that even without a dedicated treaty there is much to be gained from a human rights-based approach.

Significantly, because the issues arising in 'old age' are often the culmination of experiences occurring throughout the life course, a human rights-based approach to elder law must begin with a commitment to human rights for people of all ages.

The Ubiquitous Presidency Joshua M. Scacco 2021 "American democracy is in a period of striking tumult. The clash of a rapidly changing socio-technological environment and the traditional presidency has led to an upheaval in the scope and standards of executive leadership. Research on the presidency, although abundant, has been slow to adjust to changing realities associated with digital technologies, diverse audiences, and new political practices. Meanwhile, journalists and the public continue to encounter and shape emerging presidential efforts in deeply consequential ways. This book offers a comprehensive framework for understanding contemporary presidential communication: the ubiquitous presidency. Presidents harness new opportunities in the media environment to create a nearly constant and highly visible presence in political and nonpolitical arenas. They do this by trying to achieve longstanding presidential goals, namely visibility, adaptation, and control. However, in an environment where accessibility, personalization, and pluralism are omnipresent considerations, the strategies presidents use to achieve their goals are very different from what we once knew. Using this novel framework, the book undertakes one of the most expansive analyses of presidential communication to date. A wide variety of approaches-ranging from surveys and survey-experiments, to large-scale automated content and network analyses, to qualitative textual analysis-uncover new aspects of the intricate relationship between the president, news media, and the public. Focusing on the presidency since Ronald Reagan, and devoting particular attention to the cases of Barack Obama and Donald Trump, the book uncovers remarkable shifts in communication that test the institution of the presidency and, consequently, democratic governance itself"--

Why They Hate Us Lindsay PŽrez Huber 2021 This book examines how racist political rhetoric has created damaging and dangerous conditions for Students of Color in schools and higher education

institutions throughout the United States. The authors show how the election of the 45th president has resulted in a defining moment in U.S. history where racist discourses, reinforced by ideologies of white supremacy, have affected the educational experiences of our most vulnerable students. This volume situates the rhetoric of the Trump presidency within a broader historical narrative and provides recommendations for those who seek to advocate for anti-racism and social justice. As we enter the uncharted waters of a global pandemic and national racial reckoning, this will be invaluable reading for scholars, educators, and administrators who want to be part of the solution. Book Features: Uses Donald Trump's presidency as a case study to show how and why racist rhetoric can be used to mobilize large numbers of U.S. voters. Examines how the current administration has changed perspectives on contemporary racism that will have a lasting impact throughout the K–16 educational system. Demonstrates how the current discourses around race and immigration are resulting in increased racism and violence in schools and universities. Provides strategies for how anti-racist social justice efforts in education will need to shift to respond to the new landscape. Contributors: John Rogers, Michael Ishimoto, Silvia Rodriguez Vega, Carolina Valdivia, Marisol Clark-Ibáñez, Josefina Espino, Carolina Diana Lopez, Darsella Vigil, Valerie Gomez, Tanya J. Ending the Cycle of Crisis and Complacency in U.S. Global Health Security Kelly Ayotte 2020-01-20

When health crises strike—measles, MERS, Zika, dengue, Ebola, pandemic flu—and the American people grow alarmed, the U.S. government springs into action. But all too often, when the crisis fades and fear subsides, urgency morphs into complacency. Investments dry up, attention shifts, and a false sense of security takes hold. The CSIS Commission on Strengthening America's Health Security urges the U.S. government to replace the cycle of crisis and complacency that has long plagued health security preparedness with a doctrine of continuous prevention, protection, and resilience. Such a strategic approach can restore U.S. leadership, strengthen financing and the speed of response, foster resilient health systems abroad, enhance the U.S. government's ability to operate in disordered settings, and accelerate select technological innovations to secure the future.

The School Story David Aitchison 2022-02-15 The School Story: Young Adult Narratives in the Age of Neoliberalism examines the work of contemporary writers, filmmakers, and critics who, reflecting on the realm of school experience, help to shape dominant ideas of school. The creations discussed are mostly stories for children and young adults. David Aitchison looks at serious novels for teens including Laurie Halse Anderson's *Speak* and Faiza Guène's *Kiffe Kiffe Tomorrow*, the light-hearted, middle-grade fiction of Andrew Clements and Tommy Greenwald, and Malala Yousafzai's autobiography for young readers, *I Am Malala*. He also responds to stories that take young people as their primary subjects in such novels as Sapphire's *Push* and films including *Battle Royale* and *Cooties*. Though ranging widely in their accounts of young life, such stories betray a mounting sense of crisis in education around the world,

especially in terms of equity (the extent to which students from diverse backgrounds have fair chances of receiving quality education) and empowerment (the extent to which diverse students are encouraged to gain strength, confidence, and selfhood as learners). Drawing particular attention to the influence of neoliberal initiatives on school experience, this book considers what it means when learning and success are measured more and more by entrepreneurship, competitive individualism, and marketplace gains. Attentive to the ways in which power structures, institutional routines, school spaces, and social relations operate in the contemporary school story, *The School Story* offers provocative insights into a genre that speaks profoundly to the increasingly precarious position of education in the twenty-first century.

Mad River, Marjorie Rowland, and the Quest for LGBTQ Teachers' Rights Margaret A. Nash 2022-08-12
Mad River, Marjorie Rowland, and the Quest for LGBTQ Teachers' Rights addresses an important legal case that set the stage for today's LGBTQ civil rights—a case that almost no one has heard of. *Marjorie Rowland v. Mad River School District* involves an Ohio guidance counselor fired in 1974 for being bisexual. Rowland's case made it to the U.S. Supreme Court, but the justices declined to consider it. In a spectacular published dissent, Justice Brennan laid out arguments for why the First and Fourteenth Amendments apply to bisexuals, gays, and lesbians. That dissent has been the foundation for LGBTQ civil rights advances since. In the first in-depth treatment of this foundational legal case, authors Margaret A. Nash and Karen L. Graves tell the story of that case and of Marjorie Rowland, the pioneer who fought for employment rights for LGBTQ educators and who paid a heavy price for that fight. It brings the story of LGBTQ educators' rights to the present, including commentary on *Bostock v Clayton County*, the 2020 Supreme Court case that struck down employment discrimination against LGBT workers.

Forensics li Harry A. Milman PhD 2022-07-24 George Washington, the former first president of the United States, lay in his bed suffering from a high fever, a raw throat, and labored breathing. His three physicians milled around his bed, treating Washington with blisters of cantharides, tartar emetic, and bloodletting, removing nearly 40 percent of his total blood volume and causing excruciating pain. When

Washington finally was relieved of his misery and died, the three doctors could not agree what caused his death. *Forensics II: The Science Behind the Deaths of Famous and Infamous People* reads like a mystery novel, presenting biographical and scientific information that helps readers understand how medical examiners-coroners utilized forensic analysis to determine the causes and manners of death of thirty-six famous and infamous people, including Napoleon Bonaparte, a French military leader and politician; Charles Whitman, the University of Texas tower shooter; Bruce Lee, an actor and martial artist; Kurt Cobain, the lead singer of Nirvana; Jim Jones, a key figure in the Jonestown massacre; Aretha Franklin, a singer-songwriter; Alexander Litvinenko, a former officer of the Russian Federal Security Service; Jeffrey Epstein, a financier and convicted sex offender; and many more. The book is based on a review of publicly available autopsy and toxicology reports, published lay articles, and the scientific literature. Of the deaths reviewed, 39 percent were due to natural causes, 19 percent were accidental, and 6 (17 percent) were suicides. The remaining deaths comprise three cases each of homicide and justifiable homicide by police, one case of court-mandated execution, and three cases in which the manner of death was undetermined.

Trampled by Unicorns Maëlle Gavet 2020-10-06 A Wall Street Journal Bestseller An insider's revealing and in-depth examination of Big Tech's failure to keep its foundational promises and the steps the industry can take to course-correct in order to make a positive impact on the world. *Trampled by Unicorns: Big Tech's Empathy Problem and How to Fix It* explores how technology has progressed humanity's most noble pursuits, while also grappling with the origins of the industry's destructive empathy deficit and the practical measures Big Tech can take to self-regulate and make it right again. Author Maëlle Gavet examines the tendency for many of Big Tech's stars to stray from their user-first ideals and make products that actually profoundly damage their customers and ultimately society. Offering an account of the world of tech startups in the United States and Europe—from Amazon, Google, and Facebook to Twitter, Airbnb, and Uber (to name a few)—*Trampled by Unicorns* argues that the causes

and consequences of Big Tech's failures originate from four main sources: the Valley's cultural insularity, the hyper-growth business model, the sector's stunning lack of diversity, and a dangerous self-sustaining ecosystem. However, the book is not just an account of how an industry came off the rails, but also a passionate call to action on how to get it back on track. Gavet, a leading technology executive and former CEO of Ozon, an executive vice president at Priceline Group, and chief operating officer of Compass, formulates a clear call to action for industry leaders, board members, employees, and consumers/users to drive the change necessary to create better, more sustainable businesses—and the steps Western governments are likely to take should tech leaders fail to do so. Steps that include reformed tax codes, reclassification of platforms as information companies, new labor laws, and algorithmic transparency and oversight. Trampled by Unicorns' exploration of the promise and dangers of technology is perfect for anyone with an interest in entrepreneurship, tech, and global commerce, and a hope of technology's all-empowering prospect. An illuminating book full of insights, Trampled by Unicorns describes a realistic path forward, even as it uncovers and explains the errors of the past. As Gavet puts it, "we don't need less tech, we need more empathetic tech." And how that crucial distinction can be achieved by the tech companies themselves, driving change as governments actively pave the road ahead.

We Are Bellingcat Eliot Higgins 2021-02-04 THE SUNDAY TIMES BESTSELLER 'John le Carré demystified the intelligence services; Higgins has demystified intelligence gathering itself' Financial Times 'Uplifting . . . Riveting . . . What will fire people through these pages, gripped, is the focused, and extraordinary investigations that Bellingcat runs . . . Each runs as if the concluding chapter of a Holmesian whodunit' Telegraph 'We Are Bellingcat is Higgins's gripping account of how he reinvented reporting for the internet age . . . A manifesto for optimism in a dark age' Luke Harding, Observer How did a collective of self-taught internet sleuths end up solving some of the biggest crimes of our time? Bellingcat, the home-grown investigative unit, is redefining the way we think about news, politics and the digital future. Here, their founder – a high-school dropout on a kitchen laptop – tells the story of how they

created a whole new category of information-gathering, galvanising citizen journalists across the globe to expose war crimes and pick apart disinformation, using just their computers. From the downing of Malaysia Flight 17 over the Ukraine to the sourcing of weapons in the Syrian Civil War and the identification of the Salisbury poisoners, We Are Bellingcat digs deep into some of Bellingcat's most successful investigations. It explores the most cutting-edge tools for analysing data, from virtual-reality software that can build photorealistic 3D models of a crime scene, to apps that can identify exactly what time of day a photograph was taken. In our age of uncertain truths, Bellingcat is what the world needs right now – an intelligence agency by the people, for the people.

Dastardly Discourse Meg Gorzycki 2020-03-09 Screaming at the television, compulsively firing off tart little tweets, and blogging until we are blue; these signal that we are feeling the effects of dastardly discourse. We live in a world where people feel entitled to use words to hurt, exploit, and publicly degrade humanity. We daily consume rhetoric that makes a mockery of decency and civility. Leaders of key social institutions, including government, news media, and religious organizations, who are supposed to be role models of reasoned and compassionate communication are often the ones with the loudest lies and the hardest hate. We can change the channel. We can unplug. We can even encourage others to do the same. We may not do so, however, until we grasp what is fundamentally at risk in our current norms of communication. Nasty words are just the tip of the dastardly discourse iceberg. What lies beneath is a steady flow of propaganda that aims to control our personal narratives. This book is about that propaganda, the importance of owning our own narratives, and improving our own rhetorical capital--the ability to analyze and evaluate information--for the sake of sustaining human dignity, decency, and civility.

Understanding Media Propaganda in the 21st Century Simon Foley 2021-09-02 First published in 1988, Herman and Chomsky's Manufacturing Consent remains the go-to book for those interested in understanding why the mainstream media act as vehicles for power-elite propaganda. The analytical heart of Manufacturing Consent lies in what it calls 'The Propaganda Model.' According to this model, there are five filters which all newsworthy stories have to pass through before reaching the public sphere.

However, a lot has changed in the subsequent thirty-something years. Consequently, a key question that needs to be addressed is whether Manufacturing Consent is still fit for purpose. The conceit underpinning *Understanding Media Propaganda in the 21st Century: Manufacturing Consent Revisited and Revised* is that the election of Trump in 2016 constitutes the proverbial ‘year zero’ for fourth estate journalism. As a result of the ‘journalistic’ cultural revolution that ensued, it argues that the Propaganda Model needs to be overhauled if it is to retain its epistemological bona fides. To this end, this book is a radical—in the true critical sense of the word—intervention into the propaganda/fake news debate. For students (in the broadest sense of the term) of media studies, journalism, communication studies and sociology, it provides both a compelling critique of Herman and Chomsky’s Propaganda Model, while at the same time proffering a new explanatory model to understand why MSM output typically replicates the ‘stenographer for power’ playbook.

American Ingrate Benjamin Weingarten 2020-03-17 She says that America was “founded by the genocide of indigenous people and on the backs of slaves,” and that “ignorance really is pervasive” among Americans today. She says America must “dismantle” capitalism and “demilitarize” U.S. foreign policy, which she sees “from the perspective of a foreigner,” tweeting “thousands of Somalis [were] killed by...American forces...#NotTodaySatan.” She says American support for Israel is “all about the Benjamins baby;” and that American Jews disloyally pledge “allegiance” to Israel’s “apartheid...regime,” which has “hypnotized the world.” She says of the 9/11 attacks: “some people did something.” Shockingly, Congresswoman Ilhan Omar’s (D-MN) words merely scratch the surface of her hatred of America—and the West—and divert our gaze from the nefarious actions she is taking to sabotage it from within. *American Ingrate* is the defining book on the size, scope, and nature of the threat posed by Representative Omar—the personification of the anti-American Left-Islamist nexus—heightened by her hidden collusion with like-minded adversaries foreign and domestic, and alleged criminality and corruption. This is a clarion wakeup call to the dangers epitomized by Rep. Omar. For she is not merely a

lone radical in Congress, but the archetype of the new Democratic Party—and a uniquely dangerous figure at the heart of a uniquely dangerous challenge to America.

Insight Turkey 2020/04 - The Future of The Libyan Crisis 2020-12-01 Libya is one of the most important regional actors in the Middle East and North Africa region in terms of its geographical location and geostrategic importance. In 2011, Qaddafi was ousted from power raising the hopes of the Libyan people for a democratic regime. Unfortunately, Libya, one of the most interesting fronts of the Arab insurgencies and revolutions, has disintegrated into a severe civil war and a regional crisis. The reasons behind this are both internal and external. While the clash between the state, non-state, and armed actors within Libya have threatened the internal stability, the intervention of some regional and global actors has incited the conflict further. Authoritarian regimes and pro status-quo states such as the United Arab Emirates (UAE), Saudi Arabia, and Egypt have been against the Arab uprisings as they did not want the will of the people to be reflected in the Middle East and Arab countries' administrations. Within this context, these states did not allow the emergence of an encompassing and pluralist political structure in Libya. Furthermore, most international and regional powers such as France, Russia, and the United States have also been supporting this authoritarian coalition. Haftar, who had little influence during the revolution and lived outside of Libya for a long time, attempted a military coup in 2014 by rejecting the authorities of legitimate political actors in the country, with the support of these states. The Government of National Accord (GNA), which is recognized as the only legitimate representative of the Libyan state and people by many international institutions, most notably the United Nations, suppressed Haftar's coup attempt. However, the abovementioned states continue to invest in Haftar's forces. After having amassed enough armed forces with the support of a large coalition of states, Haftar launched a comprehensive military attack to take over the capital city of Tripoli in April 2019, to offset-up another autocratic regime in Libya. While everyone saw the capital Tripoli passing into the hands of Haftar as inevitable and only a matter of time, turning a blind eye to the situation, Turkey stepped in and upset all the calculations. As a result,

Turkey increased its presence in Libya after two memorandums of understanding (MoUs) were signed with the GNA in November 2019. With these two memorandums, Turkey has determined and declared its sea border in the Eastern Mediterranean and made a commitment to the GNA. Accordingly, when needed and requested by GNA, Turkey is ready to provide all kinds of military support. Especially since January 2020, Turkey has supported the GNA militarily and financially in its struggle against Haftar. The GNA forces supported by Turkey defeated the Haftar troops and forced them to withdraw from a large area in the Western part of the country. Turkey, which has altered the whole balance of power in Libya within a short time with the new dynamics, has changed the course of the crisis and the civil war in the country. Haftar and his supporters, who preferred only military methods, had to declare a unilateral ceasefire and to sit down at the diplomatic negotiation table. At the same time, Turkey persuaded some countries that are flirting with both sides to strengthen their relationship with the GNA. Developments in Libya directly influence Turkey, since Libya is a very important country for Turkey in the context of both the history of bilateral relations as well as the regional balance of power. Therefore, since the first days of the revolution, Turkey has been in close relations with the legitimate actors in order to protect the territorial integrity and political independence of the Libyan state. With its support both in the conflict area and at the negotiating table, Turkey ensured that the GNA remains an effective actor. Thus, Turkey has prevented the persons and groups which are under the control of the anti-Turkish coalition during the post-Arab spring period. On the other hand, Turkey has negated all anti-Turkey moves, formations, and processes within the newly emerged strategic regional equation. In this sense, the legitimate Libyan government came to the fore as a regional actor that it can work with. After signing a ceasefire agreement in October 2020, in Geneva, the political peace talks started under the auspices of the United Nations acting envoy to Libya, Stephanie Williams, and the warring sides have reached a preliminary agreement to a roadmap for elections. The two rival sides have agreed to hold both parliamentary and presidential elections in December 2021. If the process is completed successfully, the future of the

country will be determined after these elections hopefully with an end to the discord in the country. The Libyan issue is a complex crisis with which many local, regional, and global actors have become involved. Therefore, the resolution of the crisis will only be possible with international consensus. In order to solve the crisis, a negotiation process must begin after securing a sustainable ceasefire agreement, all segments of the Libyan society must be included, and the two sides must reconcile on civil and democratic principles. Only then can a reconstruction of the state and a reform process in political, economic and security spheres be initiated. This issue of Insight Turkey focuses on underscoring both promises of internal reconstruction and challenges fueled by different external actors intervening in the Libyan crisis. This latest issue includes five commentaries and three insightful research articles that explore the Libyan conflict from different perspectives. While some pieces focus on the role of different actors in the crisis, others analyze the reconstruction efforts. While the civil war has pitted Libyans against each other, foreign interventions have hindered the resolution of the civil war. In this regard, Yahia H. Zoubir's commentary presents a coherent framework of the foreign powers involved in the Libyan conflict and their interests. Zoubir argues that unless those foreign powers have achieved their goals in Libya, an end to the civil war anytime soon remains unlikely. Talha Köse and Bilgehan Öztürk provide a rigorous analysis of the external interventions in Libya and the logic behind each intervention, between offensive, defensive, opportunistic, or ideological. Understanding the full picture in Libya requires us to fully grasp the Turkish role and motivation for the Libyan conflict. To do so, ?small Numan Telci underlines the factors and challenges that made it difficult for Turkey to implement its peaceful plans in Libya and argues that Turkey will continue to be an active supporter of peace and stability in the country. Tarek Megerisi briefly analyzes Europe's relations with post-revolutionary Libya and European policies on Libya to conclude by stating that a continuing struggle between the EU member states over how to handle the new world, that is emerging in the wake of the pax-Americana, is also exposed in European policy on Libya. Ali Bakir's article aims to discuss the United Arab Emirates' interventions in

Libya in terms of their nature, extent, motives, goals, and repercussions. Bakir tries to answer the questions of why Abu Dhabi has been able to act with impunity in Libya despite being the top foreign player fueling the war there for many years, and whether it will be able to achieve its goals and continue its interventions in Libya or not. France, while actively allying with the UAE, Egypt, and Saudi Arabia, has aggressively confronted Turkey and undermined the internationally recognized Libyan Government of National Accord. On this basis, Timothy Reid seeks to examine the premises of the French policy toward Libya and its real intentions behind these actions. Guma el-Gamaty highlights the strong foundations and drivers for the Turkish-Libyan strategic alliance which allowed Turkey eventually to provide timely and decisive support for the legitimate Government of National Accord. He argues that the Turkish strategic relationship and cooperation with Libya over the coming decades will contribute to lasting peace as well as institution and state-building. Based on empirical evidence, Shatha Sbeta and Mohamed Abufalgha advocate for a comprehensive framework to address the political, economic, and social challenges facing Libya. Their proposal draws a clear roadmap that begins with establishing trust and extending the authority of the government across the Libyan territory. Murat Aslan, focusing on state, non-state, and armed actors, analyses Libya's post-Qaddafi fragile state structure and struggles to build the internal order. He argues that these actors pose a repeating and paradoxical dilemma in which the root causes can be scrutinized by investigating the security culture inherited from Qaddafi's regime. Four off-topic manuscripts conclude this issue of Insight Turkey. This issue places a special emphasis on the insurmountable deadlock that tackled the Armenia-Azerbaijan conflict resolution process. Farid Shafiyev and Vasif Huseynov in their off-topic commentary assert that this deadlock is due to the failure of the peace negotiations brokered by different actors to deliver any progress as well as the constant provocations of Armenian military and political leaders, which eventually led to the outbreak of an almost full-scale war on September 27, 2020. As the COVID-19 pandemic continues, refugees are in constant danger because they live in highly congested environments. Within this context, Mahmood Monshipouri,

Burcu Akan Ellis, and Cassidy Renee Yip call for a new approach to cope with the pandemic while arguing that helping refugees to curb the spread of the current coronavirus cannot be divorced from social contexts. Lukáš Tichý, Jan Maza?, and Zbyněk Dubský present a modified concept of the EU actorness in energy relations and deals with the identification of its criteria. Based on a predefined methodology, the article also analyses dimensions of actorness in the external energy relations with Algeria. Written by Shamkhal Abilov, Ceyhun Mahmudlu, and Natig Abdullayev, the last research article focuses on the dispute between Turkmenistan and Azerbaijan over the delimitation of the Caspian Sea. This article aims to find out whether the new Convention of 2018 on the status of the Caspian Sea resolved the long-standing dispute and to assess the potential of implementing the Trans Caspian Pipeline under the new conditions. With one more year coming to an end, we are pleased to present to our readers yet another insightful issue of Insight Turkey that aims to bring the Libyan crisis to the attention of the politicians, intellectuals, and academicians. With the hope that you will find this issue informative and interesting, we are looking forward to providing you with more next year.

China Dreams Jane Golley 2020-04-16 The year 2019 marked a number of significant anniversaries for the People's Republic of China (PRC), each representing different 'Chinese dreams'. There was the centennial of the May Fourth Movement — a dream of patriotism and cultural renewal. The PRC celebrated its seventieth anniversary — a dream of revolution and national strength. It was also thirty years since the student-led Protest Movement of 1989 — dreams of democracy and free expression crushed by government dreams of unity and stability. Many of these 'dreams' recurred in new guises in 2019. President Xi Jinping tightened his grip on power at home while calling for all citizens to 'defend China's honour abroad'. Escalating violence in Hong Kong, the ongoing suppression of Uyghurs in Xinjiang, and deteriorating Sino-US relations dominated the headlines. Alongside stories about China's advances in artificial intelligence and genetically modified babies and its ambitions in the Antarctic and outer space, these issues fuelled discussion about what Xi's own 'China Dream' of national rejuvenation

means for Chinese citizens and the rest of the world. The China Story Yearbook: China Dreams reflects on these issues and more. It surveys the dreams, illusions, aspirations, and nightmares that coexisted (and clashed) in 2019 in China and beyond. As ever, we take a cross-disciplinary perspective that recognises the inextricable links between economy, politics, culture, history, language, and society. The Yearbook, with its accessible analysis of the main events and trends of the year, is an essential tool for understanding China's growing power and influence around the world.

Baby Jails Philip G. Schrag 2020-01-21 "I worked in a trailer that ICE had set aside for conversations between the women and the attorneys. While we talked, their children, most of whom seemed to be between three and eight years old, played with a few toys on the floor. It was hard for me to get my head around the idea of a jail full of toddlers, but there they were." For decades, advocates for refugee children and families have fought to end the U.S. government's practice of jailing children and families for months, or even years, until overburdened immigration courts could rule on their claims for asylum. Baby Jails is the history of that legal and political struggle. Philip G. Schrag, the director of Georgetown University's asylum law clinic, takes readers through thirty years of conflict over which refugee advocates resisted the detention of migrant children. The saga began during the Reagan administration when 15-year-old Jenny Lisette Flores languished in a Los Angeles motel that the government had turned into a makeshift jail by draining the swimming pool, barring the windows, and surrounding the building with barbed wire. What became known as the Flores Settlement Agreement was still at issue years later, when the Trump administration resorted to the forced separation of families after the courts would not allow long-term jailing of the children. Schrag provides recommendations for the reform of a system that has brought anguish and trauma to thousands of parents and children. Provocative and timely, Baby Jails exposes the ongoing struggle between the U.S. government and immigrant advocates over the duration and conditions of confinement of children who seek safety in America.

Southbound Anjali Enjeti 2021-04-15 A move at age ten from a Detroit suburb to Chattanooga in 1984

thrusts Anjali Enjeti into what feels like a new world replete with Confederate flags, Bible verses, and whiteness. It is here that she learns how to get her bearings as a mixed-race brown girl in the Deep South and begins to understand how identity can inspire, inform, and shape a commitment to activism. Her own evolution is a bumpy one, and along the way Enjeti, racially targeted as a child, must wrestle with her own complicity in white supremacy and bigotry as an adult. The twenty essays of her debut collection, *Southbound*, tackle white feminism at a national feminist organization, the early years of the AIDS epidemic in the South, voter suppression, gun violence and the gun sense movement, the whitewashing of southern literature, the 1982 racialized killing of Vincent Chin, social media's role in political accountability, evangelical Christianity's marriage to extremism, and the rise of nationalism worldwide. In our current era of great political strife, this timely collection by Enjeti, a journalist and organizer, paves the way for a path forward, one where identity drives coalition-building and social change.

Future War and the Defence of Europe John R. Allen 2021 *Future War and the Defence of Europe* offers a major new analysis of how peace and security can be maintained in Europe: a continent that has suffered two cataclysmic conflicts since 1914. Taking as its starting point the COVID-19 pandemic and way it will inevitably accelerate some key global dynamics already in play, the book goes on to weave history, strategy, policy, and technology into a compelling analytical narrative. It lays out in forensic detail the scale of the challenge Europeans and their allies face if Europe's peace is to be upheld in a transformative century. The book upends foundational assumptions about how Europe's defence is organised, the role of a fast-changing transatlantic relationship, NATO, the EU, and their constituent nation-states. At the heart of the book is a radical vision of a technology-enabling future European defence, built around a new kind of Atlantic Alliance, an innovative strategic public-private partnership, and the future hyper-electronic European force, E-Force, it must spawn. Europeans should be under no illusion: unless they do far more for their own defence, and very differently, all that they now take for

granted could be lost in the maze of hybrid war, cyber war, and hyper war they must face.

Living a life with less can be the key to saving our precious planet. Break the consumption cycle. There's so much to do, and way too much to buy. Whether it's through late night TV ads, social media, or other sources of influence, we are addicted to buying and then storing things. Sometimes we consume with no regret and other times we realize that we're doing more harm than good to our wallets and our homes. It's a constant cycle?one that many are longing to break. Who wants their hard-earned money to go toward something that soon ends up in a landfill? A guide to eco-minimalism with a plan that is realistic. Manufacturing "stuff" exploits Earth's precious (and finite) resources. And then there's the harsh reality of where it all goes. Our discarded possessions ultimately head to landfills and contribute to environmental pollution, releasing greenhouse gases during breakdown and decomposition. Sustainable Minimalism is the solution. Empower yourself to incrementally incorporate the tenets of sustainable minimalism into your home and life. Learn to master the easiest tasks first and build upon your successes?a practical and stress-free process. Now that's sustainable! A blueprint for sustainability and stress management:

American Fascism Brynn Tannehill 2021-04-20 Trump is out of the White House, but American democracy is on the ropes and teetering on the brink of competitive authoritarianism controlled by theocrats and oligarchs. With its cherished institutions hobbled, political norms trampled, guardrails severely damaged, and body politic divided by chasms of race and geography, can the U.S. survive another administration dedicated to establishing de facto single party rule? In this compelling, comprehensive analysis, Brynn Tannehill draws on her expertise in studying the collapse of weak democracies around the globe and her previous research in law, political science, economics and right-wing populism to explain the trajectory of how we got here and the current threats we face. Most

importantly, she analyzes what the characteristics of fascism are, if they are applicable to the base of the GOP today, and what that means for us should they succeed in establishing permanent minoritarian rule. *American Fascism* is a surgical analysis of 250 years of struggle for democracy in America and a prescient prognosis of what's to come if we do not heed Tannehill's warnings and advice.

IDiots Katie Roche 2021-01-04 The rise of identity politics in the past decade has been impossible to miss. Issues such as race, sexuality and gender identity have enveloped the left in the UK and the USA. Politicians, big business and celebrities have all got behind these causes. While this might appear progressive, there are many negative consequences of identity politics. Perfect for the general reader, as well as those who wish to study this topic in-depth, this book offers an analysis of the impact of identity politics from a socialist perspective. It will examine how identity politics has damaged the left by analysing examples of identity politics in action from both sides of the Atlantic. And it tells us why it's time for the left

to return to its class-based roots.

Anti-Semitism and Psychiatry H. Steven Moffic 2020-02-25 Following World War II and the exposure of the concentration camps, psychiatry turned its attention to a vast range of cultural concerns with results that seemed to indicate a decline of stigma over time. However, it is now clear that whatever drives prejudices, especially in the case of anti-Semitism, was just dormant and perhaps not fully understood. Hate crimes and anti-Semitism broad recently re-emerged in Europe, and the United States followed shortly thereafter. The US Federal Bureau of investigation reports that New York City, which is still considered the most Jewish-friendly region in the US, experienced a 22% spike in anti-Semitic hate crimes in 2018 alone, with more extremes in other regions of the country. Neo-Nazi groups have grown stronger in the United States and abroad, often resulting in organized acts of violence. The recent Tree of Life synagogue shooting in Pittsburgh, PA demonstrated that these acts are not limited to one-on-one interactions, but sometimes as prolific, large-scale act. The medical community is not immune from biases either. The Cleveland Clinic recently fired a young doctor after she publicly declared her wishes to inject Jewish patients with lethal substances, which is only one of many hateful comments she made on

social media over the course of several years. Psychiatrists in particular grapple with this as they try to serve patients of both Jewish and non-Jewish descent who struggle to process these acts of hate. Despite all of this, there is no training and no resource to guide medical professionals through these challenges. The editors of the recent Springer book, *Islamophobia and Psychiatry*, recognize this gap in the literature and seek to develop another high-quality text to meet this need. Written by expert clinicians in global regions where these incidents are most prevalent, the book seeks to be neither political nor opinion-based; instead, the text takes an innovative cross-cultural psychiatric interaction, similar to what was done with Springer's new *Islamophobia* book. Coverage will range from foci on the social psychiatric aspects of anti-Semitism to how it may in turn infuse clinical encounters between patients and clinicians. Written by experts in this area, the insight and expertise of psychiatrists from a variety of cultural and religious backgrounds will focus on what psychiatrists need to know to combat the negative mental health impact that increasingly rise out of this particular phenomenon. Such a multi-cultural psychiatric approach has never been taken before for this topic. This discourse is the foundation for the primary goal of this book: to develop the tools needed to improve clinical outcomes for patients. Hence, this book aims to present an updated, comprehensive bio-psychosocial perspective on anti-Semitism at the interface of clinical psychiatry.
