Educational Reform and International Baccalaureate in the Asia-Pacific Coulson, David Gregory 2021-02-19 The need to reform secondary-level education to prepare young people for new economic realities has emerged. In an age of constant career changing, cognitive flexibility is a top-priority skill to develop in today's students. This shift requires methodological innovation that enhances children's natural abilities as well as updated, focused teacher education in order to prepare them adequately. Educational Reform and International Baccalaureate in the Asia-Pacific is a collection of innovative research that examines the development and implementation of IB curricula. Highlighting a wide range of topics including critical thinking, student evaluation, and teacher training, this book is ideally designed for educators, curriculum developers, instructional designers, administrative officials, policymakers, researchers, academicians, and students.

Dumb and Dumber Matt Palumbo 2020-12-29 In America's early days, most immigrants entered America through New York. For many, New York was synonymous with America and the American dream itself—a beacon of hope for the rest of the world. Now, for the first time ever, people are fleeing New York by the millions. Plagued by high taxes, big government, excessive regulations, and other obstacles to liberty, there are few reasons for one to want to remain in the state under Governor Andrew Cuomo's leadership. And in New York City, which houses nearly half of the state's population, Mayor Bill de Blasio has been doing everything in his power to accelerate the decline and bring the city back to its pre-Rudy-Giuliani days. Corruption and Illiberal Politics in the Trump Era Donna M. Goldstein 2022-09-23 This book explores the nexus of corruption, late capitalism, and illiberal politics in the Trump era. Through deep, contextualized analysis and careful critique, it offers valuable perspectives on how corruption is defined and understood in the current historical moment. The book asks: Is today's corruption something new, or is it a continuation of prior patterns of illiberalism? Chapters in this collection consider how corruption is practiced, mobilized, or invoked in a range of cases, each of which is embedded within larger concerns about what citizenship, social belonging, honesty, and justice mean in the United States today. The authors examine a constellation of unscrupulous actors and questionable actions, with topics ranging from sex scandals and shady real estate deals to the Trump administration's response to the COVID-19 pandemic. Several essays directly address the increasingly violent rhetoric and the deliberately anti-

democratic policies that have flourished during the Trump era. The book draws on anthropological insights and comparative analysis to place the policies and practices of Trump and his supporters in a wider global context. Corruption and Illiberal Politics in the Trump Era will be of great interest to readers from anthropology, sociology, political science, discourse studies, media studies, linguistics, and American studies.

Contemporary Cases in U.S. Foreign Policy Ralph Carter 2021-03-12 "The sixth edition begins with a brief introduction into foreign policymaking and the case study approach. Thirteen original case studies written expressly for this edited volume then follow. The cases deal with a wide range of policy areas: national security, homeland security, diplomacy, trade, immigration, epidemics, climate change, and Russian interference in the 2016 presidential election"-- Handbook of Business-to-Business Marketing Lilien, Gary L. 2022-07-15 This path-breaking Handbook is targeted primarily at marketing academics and graduate students who want a comprehensive overview of the academic state of the business-to-business marketing domain. It will also prove an invaluable resource for forward-thinking business-to-business practitioners who want to be aware of the current state of knowledge in their domains.

Insight Turkey 2020/04 - The Future of The Libyan Crisis 2020-12-01 Libya is one of the most important regional actors in the Middle East and North Africa region in terms of its geographical location and geostrategic importance. In 2011, Qaddafi was ousted from power raising the hopes of the Libyan people for a democratic regime. Unfortunately, Libya, one of the most interesting fronts of the Arab insurgencies and revolutions, has disintegrated into a severe civil war and a regional crisis. The reasons behind this are both internal and external. While the clash between the state, non-state, and armed actors within Libya have threatened the internal stability, the intervention of some regional and global actors has incited the conflict further. Authoritarian regimes and pro status-quo states such as the United Arab Emirates (UAE), Saudi Arabia, and Egypt have been against the Arab uprisings as they did not want the will of the people to be reflected in the Middle East and Arab countries' administrations. Within this context, these states did not allow the emergence of an encompassing and pluralist political structure in Libya. Furthermore, most international and regional powers such as France, Russia, and the United States have also been supporting this authoritarian coalition. Haftar, who had little influence during the revolution and lived outside of Libya for a long time, attempted a military coup in 2014 by rejecting the authorities of legitimate political actors in the country, with the support of these states. The Government of National Accord (GNA), which is recognized as the only legitimate representative of the Libyan state and people by many international institutions, most notably the United Nations, suppressed Haftar's coup attempt. However, the abovementioned states continue to invest in Haftar's forces. After having amassed enough armed forces with the support of a large coalition of states, Haftar launched a comprehensive military attack to take over the capital city of Tripoli in April 2019, to offset-up another autocratic regime in Libya. While everyone saw the capital Tripoli passing into the hands of Haftar as inevitable and only a matter of time, turning a blind eye to the situation, Turkey stepped in and upset all the calculations. As a result, Turkey increased its presence in Libya after two memorandums of understanding (MoUs) were signed with the GNA in November 2019. With these two memorandums, Turkey has determined and declared its sea border in the Eastern Mediterranean and made a commitment to the GNA. Accordingly, when needed and requested by GNA, Turkey is ready to provide all kinds of military support. Especially since January 2020, Turkey has supported the GNA militarily and financially in its struggle against Haftar. The GNA forces supported by Turkey defeated the Haftar troops and forced them to withdraw from a large area in the Western part of the country. Turkey, which has altered the whole balance of power in Libya within a short time with the new dynamics, has changed the course of the crisis and the civil war in the country. Haftar and his supporters, who preferred only military methods, had to declare a unilateral ceasefire and to sit down at the diplomatic negotiation table. At the same time, Turkey persuaded some countries that are

flirting with both sides to strengthen their relationship with the GNA. Developments in Libya directly influence Turkey, since Libya is a very important country for Turkey in the context of both the history of bilateral relations as well as the regional balance of power. Therefore, since the first days of the revolution, Turkey has been in close relations with the legitimate actors in order to protect the territorial integrity and political independence of the Libyan state. With its support both in the conflict area and at the negotiating table, Turkey ensured that the GNA remains an effective actor. Thus, Turkey has prevented the persons and groups which are under the control of the anti-Turkish coalition during the post-Arab spring period. On the other hand, Turkey has negated all anti-Turkey moves, formations, and processes within the newly emerged strategic regional equation. In this sense, the legitimate Libyan government came to the fore as a regional actor that it can work with. After signing a ceasefire agreement in October 2020, in Geneva, the political peace talks started under the auspices of the United Nations acting envoy to Libya, Stephanie Williams, and the warring sides have reached a preliminary agreement to a roadmap for elections. The two rival sides have agreed to hold both parliamentary and presidential elections in December 2021. If the process is completed successfully, the future of the country will be determined after these elections hopefully with an end to the discord in the country. The Libyan issue is a complex crisis with which many local, regional, and global actors have become involved. Therefore, the resolution of the crisis will only be possible with international consensus. In order to solve the crisis, a negotiation process must begin after securing a sustainable ceasefire agreement, all segments of the Libyan society must be included, and the two sides must reconcile on civil and democratic principles. Only then can a reconstruction of the state and a reform process in political, economic and security spheres be initiated. This issue of Insight Turkey focuses on underscoring both promises of internal reconstruction and challenges fueled by different external actors intervening in the Libyan crisis. This latest issue includes five commentaries and three insightful research articles that explore the Libyan conflict from different perspectives. While some pieces focus on the role of different actors in the crisis, others analyze the reconstruction efforts. While the civil war has pitted Libyans against each other, foreign interventions have hindered the resolution of the civil war. In this regard, Yahia H. Zoubir's commentary presents a coherent framework of the foreign powers involved in the Libyan conflict and their interests. Zoubir argues that unless those foreign powers have achieved their goals in Libya, an end to the civil war anytime soon remains unlikely. Talha Köse and Bilgehan Öztürk provide a rigorous analysis of the external interventions in Libya and the logic behind each intervention, between offensive, defensive, opportunistic, or ideological. Understanding the full picture in Libya requires us to fully grasp the Turkish role and motivation for the Libyan conflict. To do so, ?smail Numan Telci underlines the factors and challenges that made it difficult for Turkey to implement its peaceful plans in Libya and argues that Turkey will continue to be an active supporter of peace and stability in the country. Tarek Megerisi briefly analyzes Europe's relations with post-revolutionary Libya and European policies on Libya to conclude by stating that a continuing struggle between the EU member states over how to handle the new world, that is emerging in the wake of the pax-Americana, is also exposed in European policy on Libya. Ali Bakir's article aims to discuss the United Arab Emirates' interventions in Libya in terms of their nature, extent, motives, goals, and repercussions. Bakir tries to answer the questions of why Abu Dhabi has been able to act with impunity in Libya despite being the top foreign player fueling the war there for many years, and whether it will be able to achieve its goals and continue its interventions in Libya or not. France, while actively allying with the UAE, Egypt, and Saudi Arabia, has aggressively confronted Turkey and undermined the internationally recognized Libyan Government of National Accord. On this basis, Timothy Reid seeks to examine the premises of the French policy toward Libya and its real intentions behind these actions. Guma el-Gamaty highlights the strong foundations and drivers for the Turkish-Libyan strategic alliance which allowed Turkey eventually to provide timely and decisive support

for the legitimate Government of National Accord. He argues that the Turkish strategic relationship and cooperation with Libya over the coming decades will contribute to lasting peace as well as institution and state-building. Based on empirical evidence, Shatha Sbata and Mohamed Abufalgha advocate for a comprehensive framework to address the political, economic, and social challenges facing Libya. Their proposal draws a clear roadmap that begins with establishing trust and extending the authority of the government across the Libyan territory. Murat Aslan, focusing on state, non-state, and armed actors, analyses Libya's post-Qaddafi fragile state structure and struggles to build the internal order. He argues that these actors pose a repeating and paradoxical dilemma in which the root causes can be scrutinized by investigating the security culture inherited from Qaddafi's regime. Four off-topic manuscripts conclude this issue of Insight Turkey. This issue places a special emphasis on the insurmountable deadlock that tackled the Armenia-Azerbaijan conflict resolution process. Farid Shafiyev and Vasif Huseynov in their off-topic commentary assert that this deadlock is due to the failure of the peace negotiations brokered by different actors to deliver any progress as well as the constant provocations of Armenian military and political leaders, which eventually led to the outbreak of an almost full-scale war on September 27, 2020. As the COVID-19 pandemic continues, refugees are in constant danger because they live in highly congested environments. Within this context, Mahmood Monshipouri, Burcu Akan Ellis, and Cassidy Renee Yip call for a new approach to cope with the pandemic while arguing that helping refugees to curb the spread of the current coronavirus cannot be divorced from social contexts. Lukáš Tichý, Jan Maza?, and Zbyněk Dubský present a modified concept of the EU actorness in energy relations and deals with the identification of its criteria. Based on a predefined methodology, the article also analyses dimensions of actorness in the external energy relations with Algeria. Written by Shamkhal Abilov, Ceyhun Mahmudlu, and Natig Abdullayev, the last research article focuses on the dispute between Turkmenistan and Azerbaijan over the delimitation of the Caspian Sea. This article aims to find out whether the new Convention of 2018 on the status of the Caspian Sea resolved the long-standing dispute and to assess the potential of implementing the Trans Caspian Pipeline under the new conditions. With one more year coming to an end, we are pleased to present to our readers yet another insightful issue of Insight Turkey that aims to bring the Libyan crisis to the attention of the politicians, intellectuals, and academicians. With the hope that you will find this issue informative and interesting, we are looking forward to providing you with more next year.

What was the policy mix devised to keep voters happy yet try to promote structural reforms and growth? What is his legacy as chief executive now that he has gone?

Challenging the Deprofessionalisation of Teaching and Teachers John Buchanan 2020-10-01 This book explores how best to invest in and nurture teachers. It examines deprofessionalisation and reprofessionalisation in the recent developments in the understanding of teaching and learning, including the effects of standardizing teaching, education shaped by student satisfaction data and basic skills tests. The book focuses on Australian context and takes on an international perspective. It investigates fundamental issues affecting teacher quality, morale, attrition and retention, learner and teacher autonomy, and assessment and evaluation. It encourages teachers and teacher educators to assert centrality to teachers and question and challenge outside forces that suppress teacher autonomy and associated agency and creativity. It challenges administrators and educational jurisdictions to rethink their assumptions on their own capacities and limitations and teachers' capabilities to shape education in optimal ways and the impact of outcomes of the decisions they make.

Improving a Country's Education Nuno Crato 2020-11-23 This open access book compares and contrasts the results of international student assessments in ten countries. The OECD's Programme for International Student Assessment (PISA) released the results of its 2018 assessment in December 2019. This book reflects the debates that typically follow the release of these results and focuses on the causes of differences between countries. Such causes include continuous decline in one country, improvement combined with increasing internal inequalities in another country, or rapid improvement in spite of an outdated curriculum in yet another. In addition, the book discusses a number of general questions: Is knowledge outdated? Are computers taking over and replacing teachers? Are schools killing creativity? Are we adequately preparing the next generation? Are schools failing to educate our kids? The book starts out with a summary of PISA's evolution and PISA results, and an explanation of the major factors that play a role in changes in countries' results. The next ten chapters are devoted to ten specific countries, offering a summary of data and an explanation of the major drivers for changes in education results for each one. Each chapter includes a short description of the country's educational system as well as the impact of PISA and other ILSA studies on the country's educational policies. The chapters also include a timeline of policy measures and main hallmarks of the country's educational evolution, discussing the impact of these measures on its PISA results. A final reference chapter explains what PISA is, what it measures and how. While highlighting the 2018 results, the book also takes into consideration previous results, as well as long-term initiatives. This book gathers the contribution of well-known and respected experts in the field. Specialists such as Eric Hanushek, for the US, Tim Oates, for England, Montse Gomendio, for Spain, Gunda Tire, for Estonia, and all other contributors draw on their

vast experience and statistical analysis expertise to draw a set of rich country lessons and recommendations that are invaluable for all of those who care about improving a country's education system.

The Ubiquitous Presidency Joshua M. Scacco 2021 "American democracy is in a period of striking tumult. The clash of a rapidly changing socio-technological environment and the traditional presidency has led to an upheaval in the scope and standards of executive leadership. Research on the presidency, although abundant, has been slow to adjust to changing realities associated with digital technologies, diverse audiences, and new political practices. Meanwhile, journalists and the public continue to encounter and shape emerging presidential efforts in deeply consequential ways. This book offers a comprehensive framework for understanding contemporary presidential communication: the ubiquitous presidency. Presidents harness new opportunities in the media environment to create a nearly constant and highly visible presence in political and nonpolitical arenas. They do this by trying to achieve longstanding presidential goals, namely visibility, adaptation, and control. However, in an environment where accessibility, personalization, and pluralism are omnipresent considerations, the strategies presidents use to achieve their goals are very different from what we once knew. Using this novel framework, the book undertakes one of the most expansive analyses of presidential communication to date. A wide variety of approaches—ranging from surveys and survey-experiments, to large-scale automated content and network analyses, to qualitative textual analysis—uncover new aspects of the intricate relationship between the president, news media, and the public. Focusing on the presidency since Ronald Reagan, and devoting particular attention to the cases of Barack Obama and Donald Trump, the book uncovers remarkable shifts in communication that test the institution of the presidency and, consequently, democratic governance itself"--

Principles of Fire Prevention David Diamantes 2020-10-19 Principles of Fire Prevention, Fourth Edition meets and exceeds the FESHE Associate Core level course called Fire Prevention (C0286). It will provide readers with a thorough understanding of how fire prevention and protection programs can greatly reduce fire loss, deaths, and injuries. The Fourth Edition features current statistics, codes, standards and references from the United States Fire Administration, National Interagency Fire Center, National Fire Protection Association, Underwriters Laboratories, FM Global, Insurance Service Office, and the International Code Council. Additionally, Principles of Fire Prevention, Fourth Edition covers the elements of public education, plan review, inspection, fire investigation, community risk reduction as well as the logistics of staffing and financial management so that readers are fully prepared to lead successful fire prevention programs

Gender, Religion, Extremism Katherine E. Brown 2020-07 "This volume offers a feminist critique of counter- and deradicalization programmes, including those collected under the umbrella of 'preventing and countering violent extremism'. Based on insights from five countries, and examples from elsewhere, the book shows how collectively efforts rely on particular narratives of agency, security and human rights. Putting gender at the centre of analysis reveals a series of significant limitations in anti-radicalisation work, in construction, operation, and evaluation. First, these programmes fail to explore or engage with how masculinity and femininity inform the radicalisation process. As a result, they cannot successfully understand the personal drivers or the socio-political environment of these programmes. Second, within the operations of these programmes it becomes clear that male radicalisation is unreflectively linked to an excessive but flawed masculinity, whilst ideas about women's radicalisation depend on orientalist stereotypes about passivity and subjugation. Solutions for male deradicalisation therefore hinge on particular ideals of masculinity that few men can obtain, and deradicalising women is seen as a rescue mission. Third, the impact of these programmes derives from a racialized paternalist logic that justifies intervention in 'ordinary lives' in the name of security, yet fails to deliver. There is a gendered differential in the impact of counter-radicalisation measures.

Although the rhetoric of countering terrorism is often couched in a narrative of 'women's rights' and 'liberal values', the book demonstrates the consequences are often detrimental to these precepts. The book concludes by offering an alternative way of thinking about and implementing anti-radicalisation efforts, rooted in a feminist peace"--

Debate as Global Pedagogy Ben Voth 2021-03-15 Debate as Global Pedagogy: Rwanda Rising illustrates that the teaching of debate offers an ideal educational approach for the prevention and remediation of genocide. As the antithesis of propaganda, debate and argument instruction promotes the critical thinking necessary to resist processes of propaganda that enable injustice and human rights abuses. Case studies of argumentation instruction and deliberative forums worldwide demonstrate how environments of discursive complexity can be fostered through education in debate and argumentation. The central example of Rwanda recovering from genocide in 1994 with help from innovative pedagogy by iDebate Dreamers Academy provides a model for how argumentation instruction can reduce and prevent social injustices.

Boarding and Australia's First Peoples Marnie O'Bryan 2021 This book takes us inside the complex lived experience of being a First Nations student in predominantly non-Indigenous schools in Australia. Built around the first-hand narratives of Aboriginal and Torres Strait Islander alumni from across the nation, scholarly analysis is layered with personal accounts and reflections. The result is a wide ranging and longitudinal exploration of the enduring impact of years spent boarding which challenges narrow and exclusively empirical measures currently used to define "success" in education. Used as instruments of repression and assimilation, boarding, or residential, schools have played a long and contentious role throughout the settler-colonial world. In Canada and North America, the full scale of human tragedy associated with residential schools is still being exposed. By contrast, in contemporary Australia, boarding schools are characterised as beacons of opportunity and hope; places of empowerment and, in the best, of cultural restitution. In this work, young people interviewed over a span of seven years reflect, in real time, on the intended and unintended consequences boarding has had in their own lives. They relate expected and dramatically unexpected outcomes. They speak to the long-term benefits of education, and to the intergenerational reach of education policy. This book assists practitioners and policy makers to critically review the structures, policies, and cultural assumptions embedded in the institutions in which they work, to the benefit of First Nations students and their families. It encourages new and collaborative approaches Indigenous education programs. .

Carceral Con Kay Whitlock 2021-09-21 Introduction : world-making and "criminal justice reform" -- Correctional control and the challenge of reform -- Follow the money -- Criminalization, policing, and profiling -- The slippery slope of pretrial reform -- Courts, sentencing, and "diversion" -- Imprisonment and release -- Threshold.

The Minds of Mass Killers P. Shavaun Scott 2021-10-29 Public mass killings are becoming more common. Though the chances of being harmed or killed in a mass shooting are slim, each incident affects the public's sense of safety. There are many myths and falsehoods concerning mass murderers. As a result, the public lacks reliable knowledge about the reasons behind such killings, preventing the development of comprehensive strategies to mitigate the violence. Written by a mental health therapist with thirty years of research experience in criminal psychology, this book clarifies the realities of mass killings. Using the research on psychological profiling, it provides a foundation for understanding the "pathway to violence" identified in the personal histories of many mass murderers. Drawing from criminology, neuroscience and developmental and social psychology, the author makes the case that we are all capable of creating a safer society.

See How We Roll Melinda Hinkson 2021-09-17 In See How We Roll Melinda Hinkson follows the experiences of Nungarrayi, a Warlpiri woman from the Central Australian desert, as she struggles to establish a new life for herself in the city of Adelaide. Banished from her hometown,

Nungarrayi energetically navigates promises of transformation as well as sedimented racialized expectations on the urban streets. Drawing on a decades-long friendship, Hinkson explores these circumstances through Nungarrayi's relationships: those between her country and kin that sustain and confound life beyond the desert, those that regulate her marginalized citizenship, and the new friendships called out by displacement and metropolitan life. An intimate ethnography, *See How We Roll* provides great insight into the enduring violence of the settler colonial state while illuminating the efforts of Indigenous people to create lives of dignity and shared purpose in the face of turbulence, grief, and tightening governmental controls.

[Detoxing American Schools](#) Ernest J. Zarra III PhD 2020-10-01 *Detoxing America Schools: From Social Agency to Academic Urgency* examines the issue of toxicity in public education institutions. Today's students are exposed to personal beliefs, lifestyle practices, and politicized educational policies—many of which are in contrast to the values of their upbringing. The innate toxic intentions of some teachers are revealed by their unabashed calls for students to take sides through avenues of shaming and even civil disobedience. Schools have become vessels of social agency. The time has come to detox American education and to call for teachers to return to the urgent, fundamental mission of educating students academically. Too many teachers are following the paradigm found on many college campuses, as they use prior experience to stir up students and bring new levels of emotion into their classrooms. The classroom environment has flipped and what was once tolerance has become the new toxic intolerance. Fractious Americans seem addicted to the use of polarized issues as social and emotional intoxicants. Groups are strategic in seizing upon differences to ensure augmentation and marginalization upon ideological lines, intensified often by the flames of social media and intolerant activism. College students emerging from Gen Z are more radicalized from their time at college. Unless American educators agree to step back from certain poisonous rhetoric and noxious activism, our nation will continue to lose sight of the academic urgency before us, and with it a generation of children.

Computer Safety, Reliability, and Security António Casimiro 2020-08-19 This book constitutes the proceedings of the 39th International Conference on Computer Safety, Reliability and Security, SAFECOMP 2020, held in Lisbon, Portugal, in September 2020.* The 27 full and 2 short papers included in this volume were carefully reviewed and selected from 116 submissions. They were organized in topical sections named: safety cases and argumentation; formal verification and analysis; security modelling and methods; assurance of learning-enabled systems; practical experience and tools; threat analysis and risk mitigation; cyber-physical systems security; and fault injection and fault tolerance. *The conference was held virtually due to the COVID-19 pandemic. The chapter 'Assurance Argument Elements for Off-the-Shelf, Complex Computational Hardware' is available open access under an Open Government License 3.0 via link.springer.com.

Waiting for Gonski Tom Greenwell 2022-03-01 Why is education in Australia failing? Where did we go wrong, and how do we fix it? The Gonski Review seemed like a breakthrough. Commissioned by Prime Minister Julia Gillard and chaired by leading businessman David Gonski, the 2011 review made clear that school education policy wasn't working, and placed a spotlight on the troubling and growing gap between the educational outcomes of disadvantaged children and their more privileged peers. Gonski proposed a model that provided targeted funding to disadvantaged students based on need, a solution that promised to close the gaps and improve overall achievement. And yet, over a decade later, the problems have only worsened. Educational outcomes for Australian schoolchildren continue to decline, and there is a growing correlation between social disadvantage and educational under-achievement. So why hasn't Gonski worked, and what should we do now? Written by teachers Tom Greenwell and Chris Bonnor, *Waiting for Gonski* examines how Australia has failed its schools and offers inspired solutions to help change education for the better. 'A forensic and gripping analysis of the power plays and vested interests that flipped Gonski from a needs-based, sector-blind

funding scheme to its exact opposite. Greenwell and Bonnor even dare to float some ideas about how we might unravel the unholy mess that education funding has become.' — Jane Caro, novelist, writer and social commentator 'School funding arguments cut straight to core questions of national identity and this book is a tremendous feat of history and economics which privileges understanding over judgment. Greenwell and Bonnor present a definitive and clear account of how we got into this mess, and they offer bold ideas for how we might get out of it.' — Bri Lee, writer, journalist, activist and author of *Who Gets to be Smart and Eggshell Skull* 'Waiting for Gonski forensically maps the sweetheart deals, spin and threats that cynical vested interests have wielded over and over to maintain their own privilege, in the process damaging Australia's future and throwing our most vulnerable students under a metaphorical bus. Read it and weep. Then agitate.' — Marion Maddox, Honorary Professor of Politics, Macquarie University and author of *Taking God to School: The End of Australia's Egalitarian Education?* 'When Gough Whitlam broke the stalemate on "state aid" he hoped that the Schools Commission headed by my old mentor, Professor Peter Karmel, would provide equal opportunity for all students, particularly for "poor Catholic kids". Unfortunately, the powerful and greedy private and Church lobbyists have subverted that hope. They have lobbied all governments to protect the privileged at the expense of millions of children in public schools and some private schools. The virtue of this book is that it places the failure of the Gonski reforms within the larger story of state aid in Australia.' — John Menadue, publisher of *Pearls & Irritations*, who's had a distinguished career both in the private sector and in the Public Service 'Rigorous research compellingly presented, a sharp account of the highs and lows of the Gonski rollercoaster. This book offers both a cautionary tale and some excellent advice: we can do better for the nation's schoolchildren.' — Helen Proctor, Professor in Education History and Policy, Sydney School of Education and Social Work, University of Sydney 'Sometimes education systems need to choose a new way to address old problems. That remains Australia's challenge. *Waiting for Gonski* is a must-read for all policymakers, educators, and parents who want to know why we ended up having one of the most unequal school systems today and how we can rebuild it so that all children will have a fair go in education that they deserve.' — Pasi Sahlberg, Professor of Education, Gonski Institute for Education, University of New South Wales and author of *Finnish Lessons: What can the world learn from educational change in Finland*

Talking Bodies III Michelle D. Ravenscroft 2021-07-26 The body, sexuality, and gender continue to be subjects of much debate in contemporary culture and academia. This collection of activist-academic essays scrutinises varied questions relating to the way we understand and (re)present ourselves and others, and at its core represents hope and determination that a different world is possible.

Sociology in Our Times: The Essentials Diana Kendall 2020-06-12 Kendall's *SOCIOLOGY IN OUR TIMES: THE ESSENTIALS*, 12th edition, introduces you to the study of sociology through real-life stories, told by the people who have lived them, as well as timely topics such as the relationship between suicide, bullying and social media. The author humanizes sociology, showing you how it is at work in society and can be applied to everyday life and the pressing social issues we face. You'll learn how you can make a difference in your community -- and the world. You'll also examine issues making headlines, such as the war on gun control and policies to help prevent military suicides. Photos and videos complement the text's main themes of diversity, the application of sociology to everyday life, global comparisons, media and social change, particularly as it relates to social media and other forms of technology that are spurring new ways of living and interacting. Blurring Intelligence Crime Willem Bart de Lint 2021-03-14 This book explores the conundrum that political fortune is dependent both on social order and big, constitutive crime. An act of outrageous harm depends on rules and protocols of crime scene discovery and forensic

recovery, but political authorities review events for a social agenda, so that crime is designated according to the relative absence or presence of politics. In investigating this problem, the book introduces the concepts 'intelligence crime' and 'critical forensics.' It also reviews as an exemplar of this phenomenon 'apex crime,' a watershed event involving government in the support of a contested political and social order and its primary opponent as the obvious offender, which is then subject to a confirmation bias. Chapters feature case study analysis of a selection of familiar, high profile crimes in which the motives and actions of security or intelligence actors are considered as blurred or smeared depending on their interconnection in transactional political events, or according to friend/enemy status.

American Ingrate Benjamin Weingarten 2020-03-17 She says that America was "founded by the genocide of indigenous people and on the backs of slaves," and that "ignorance really is pervasive" among Americans today. She says America must "dismantle" capitalism and "demilitarize" U.S. foreign policy, which she sees "from the perspective of a foreigner," tweeting "thousands of Somalis [were] killed by...American forces...#NotTodaySatan." She says American support for Israel is "all about the Benjamins baby;" and that American Jews disloyally pledge "allegiance" to Israel's "apartheid...regime," which has "hypnotized the world." She says of the 9/11 attacks: "some people did something." Shockingly, Congresswoman Ilhan Omar's (D-MN) words merely scratch the surface of her hatred of America—and the West—and divert our gaze from the nefarious actions she is taking to sabotage it from within. American Ingrate is the defining book on the size, scope, and nature of the threat posed by Representative Omar—the personification of the anti-American Left-Islamist nexus—heightened by her hidden collusion with like-minded adversaries foreign and domestic, and alleged criminality and corruption. This is a clarion wakeup call to the dangers epitomized by Rep. Omar. For she is not merely a lone radical in Congress, but the archetype of the new Democratic Party—and a uniquely dangerous figure at the heart of a uniquely dangerous challenge to America.

Human Trafficking as a New (In)Security Threat Elżbieta M. Goździak 2021-01-05 This book challenges the rhetoric linking 'war on terror' with 'war on human trafficking' by juxtaposing lived experiences of survivors of trafficking, refugees, and labor migrants with macro-level security concerns. Drawing on research in the United States and in Europe, Goździak shows how human trafficking has replaced migration in public narratives, policy responses, and practice with migrants and analyzes lived experiences of (in)security of trafficked victims, irregular migrants, and asylum seekers. .

Political Populism in the Twenty-First Century Maria Hsia Chang 2021-04-06 At the end of the Cold War, which was ushered in by the disintegration of the Soviet Union, the West celebrated the "end of history"—"the endpoint of mankind's ideological evolution"—only to find itself caught in internal conflicts of political populism. This book focuses on so-called "right wing" populist movements and parties in democratic polities—those in Russia, Central and Western Europe, and the United States. Central to the definition and dynamics of populism are its anti-globalism and anti-elitism, the latter a reaction against the elites' arrogance and dismissive contempt.

Invisible Labour in Modern Science Jenny Bangham 2022-08-15 This book explores how and why some people and practices are made invisible in science, featuring 25 case studies and commentaries that explore how invisibility can bolster or undermine credibility, how race, gender, class, and nation frame who can see what, how invisibility empowers and marginalizes, and the epistemic ramifications of concealment.

Perspectives in Male Psychology 2021-06-08 Discover a balanced perspective on men's psychology in this accessible new resource Male psychology is a new field within the discipline of psychology, which focuses on men and boys. Male psychology moves us towards a more scientific and balanced understanding of the psychology of men and of boys, drawing on a range of perspectives, and away from an overreliance on social constructionism and preoccupations with notions such as patriarchy and privilege, too often seen in the narrative

about men. In *Perspectives in Male Psychology: An Introduction*, two of the most prominent authors in this new field, Louise Liddon and John Barry, introduce and deliver an insightful exploration of some of today's most hotly contested issues regarding men and masculinity. This book puts forward a balanced perspective that has been missing from academic and media narratives around topics such as child development, education, sport and exercise, the workplace, crime, the military, health and wellbeing, mental health, therapy masculinity and sex differences and considers the role that evolution, biology, and culture play in shaping male behaviour. This book will also help readers to better understand some key issues such as: Why there are controversies around sex differences research How bias in research has led to a distorted view of the psychology of men and boys The ways in which the mental health and other needs of men and boys are routinely overlooked In turn this helps us ask some important questions such as: If there are more similarities than differences between men and women, does that mean the differences are unimportant? How can we un-distort our understanding of men and masculinity? What are the best ways of identifying and meeting the psychological needs of men and boys? Readers, whether students or lecturers, will also benefit from the inclusion of our companion Wiley website containing additional resources to support the development of knowledge and understanding male psychology. Perfect for undergraduate and graduate students in psychology, medicine, and sociology, as well as established professionals in these and related fields, *Perspectives in Male Psychology: An Introduction* will also earn a place in the libraries of anyone interested in the psychology of gender differences in various aspects of mental health and human behaviour.

The Logic of Humanitarian Arms Control and Disarmament Nik Hynek 2020-11-10 This novel and original book examines and disaggregates, theoretically and empirically, operations of power in international security regimes. These regimes, varying in degree from regulatory to prohibitory, are understood as sets of normative discourses, political structures and dependencies (anarchies, hierarchies, and heterarchies), and agencies through which power operates within a given security issue area with a regulatory effect. In International Relations, regime analysis has been dominated by several generations of regime theory/theorization. As this book makes clear, not only has the IR Regime Theory been of limited utility for security domain due to its heavy focus on economic and environmental regimes, but it, too, heuristically suffered from its rigid pegging to general IR Theory. It is not surprising then that the evolution of IR Regime Theory has largely been mirroring the evolution of IR Theory in general: from the neo-realist/neo-liberal institutionalist convergence regime theory; through cognitivism; to constructivist regime theory. The commitment of this book is to remedy this situation by bringing together robust power analysis and international security regimes. It provides the reader with a theoretically and empirically uncompromising and comprehensive analysis of the selected international security regimes, which goes beyond one or another school of IR Regime Theory. In doing so, it completely abandons existing, and piecemeal, analysis of regimes within the intellectual field of IR based on conventional grand/mid-range theorization.

The Great Devaluation Adam Baratta 2020-08-04 #1 Business Bestseller (Wall Street Journal, Amazon, USA Today) *The Great Devaluation* may be one of the most timely books ever written on the state of the global economy. Baratta sums it up simply enough with the following idea: "What seems crazy in normal times becomes necessary in a crisis." *The Great Devaluation* is the #1 bestselling book that explains why the real crisis facing the world today is not the Coronavirus. The real crisis facing the world is explosive government debt and deficits. Governments are now left with no choice but to spend more than they make, borrow more than they can ever repay, and devalue their currencies to cover it all up. Former Hollywood storyteller Adam Baratta brings monetary policy to life in this follow-up to his national bestseller, *Gold Is A Better Way*. You'll learn how and why Federal Reserve policies have facilitated an explosion in government debt and have systematically undermined the world financial system in the name of profit. The result? An out of control system where financial inequality has become

a ticking time bomb set to blow up the global economy.

International Issues in SEND and Inclusion Alan Hodkinson 2022-09-27 International Issues in SEND and Inclusion brings together a collection of cutting-edge researches on approaches to special education needs and disability education, across 6 continents and within 12 countries. Written by authors who are experts in their own countries in relation to special educational needs and disability, the book provides a unique knowledge and understanding of different international perspectives in special educational needs, disability and inclusion. The chapters present extended case studies and reflect on current policy, practice and theory within that context, challenging assumptions which can dominate the policy and practice of inclusive education. Each of the six continents has a separate section and introduction within the book to offer a relevant approach and context for analysis. The book will be of great interest to academics, researchers and postgraduate students in the fields of inclusion, special educational needs and disability, teacher education and comparative education.

Real-Time and Retrospective Analyses of Cyber Security Bird, David Anthony 2020-09-04 Society is continually transforming into a digitally powered reality due to the increased dependence of computing technologies. The landscape of cyber threats is constantly evolving because of this, as hackers are finding improved methods of accessing essential data. Analyzing the historical evolution of cyberattacks can assist practitioners in predicting what future threats could be on the horizon. Real-Time and Retrospective Analyses of Cyber Security is a pivotal reference source that provides vital research on studying the development of cybersecurity practices through historical and sociological analyses. While highlighting topics such as zero trust networks, geopolitical analysis, and cyber warfare, this publication explores the evolution of cyber threats, as well as improving security methods and their socio-technological impact. This book is ideally designed for researchers, policymakers, strategists, officials, developers, educators, sociologists, and students seeking current research on the evolution of cybersecurity methods through historical analysis and future trends.

Forensics li Harry A. Milman PhD 2022-07-24 George Washington, the former first president of the United States, lay in his bed suffering from a high fever, a raw throat, and labored breathing. His three physicians milled around his bed, treating Washington with blisters of cantharides, tartar emetic, and bloodletting, removing nearly 40 percent of his total blood volume and causing excruciating pain. When Washington finally was relieved of his misery and died, the three doctors could not agree what caused his death. Forensics II: The Science Behind the Deaths of Famous and Infamous People reads like a mystery novel, presenting biographical and scientific information that helps readers understand how medical examiners-coroners utilized forensic analysis to determine the causes and manners of death of thirty-six famous and infamous people, including Napoleon Bonaparte, a French military leader and politician; Charles Whitman, the University of Texas tower shooter; Bruce Lee, an actor and martial artist; Kurt Cobain, the lead singer of Nirvana; Jim Jones, a key figure in the Jonestown massacre; Aretha Franklin, a singer-songwriter; Alexander Litvinenko, a former officer of the Russian Federal Security Service; Jeffrey Epstein, a financier and convicted sex offender; and many more. The book is based on a review of publicly available autopsy and toxicology reports, published lay articles, and the scientific literature. Of the deaths reviewed, 39 percent were due to natural causes, 19 percent were accidental, and 6 (17 percent) were suicides. The remaining deaths comprise three cases each of homicide and justifiable homicide by police, one case of court-mandated execution, and three cases in which the manner of death was undetermined.

Bioethics for Nurses Alisha N. Mack 2022-06-14 Recovering the foundation of faith in a

profession enduring the pressures of a rapidly changing health-care system. If you are one of the millions of Christian nurses or nursing students in the United States, you already know that there is no real way to separate your faith commitments from your professional vocation—nor would you want to. Especially amid the bedlam of the COVID-19 pandemic, faith has given countless nurses the strength to carry on and be there for their patients, one exhausting shift after another. *Bioethics for Nurses*, the first book of its kind, is for nurses and nurses in training who still believe in treating the whole person—not just their medical condition. It is for those committed to living out the love of Jesus Christ through the warm, relational care they provide for all hurting and vulnerable people—including those in underserved populations—each of whom has the dignity of a human being made in the image of God. It is also for those who rightly see themselves as crucial members of medical teams alongside doctors (and sometimes without doctors present at all), empowered to exercise professional judgment while protecting their consciences. With the combined wisdom of Alisha Mack, a professor of nursing with many years of clinical experience, and Charles Camosy, an award-winning bioethicist and theologian, *Bioethics for Nurses* advances a vision for a holistic Christian notion of health care with practical applications for everyday relevance on the job. Through a series of case studies in the second part of the book, Mack and Camosy explore the ethics of specific situations with far-reaching implications for nurses working in a range of fields. In the last part, the authors reflect on the future of nursing after COVID-19, making this an especially timely book for a pivotal moment in the history of the profession. Now, more than ever before, the wisdom of the ancient tradition of Christianity is needed to speak into the profound contemporary realities we are facing together as a culture.

Modern Political Campaigns Michael D. Cohen 2021-06-15 Michael D. From Horror to Hope Adjunct Professor of Public Health Barry S Levy 2022-04-28 War causes death, disability, and disease. It damages the health-supporting infrastructure, displaces populations, violates human rights, and diverts resources. And it subsequently leads to more violence. *From Horror to Hope* documents the health consequences of war, primarily for noncombatant civilians but also for military personnel and veterans, and outlines what can be done to minimize these consequences. Written by a public health physician engaged with this subject for decades, the book also describes positive developments in addressing the health impacts of war, including new initiatives to protect civilians during war, reduce gender-based violence and mental trauma, and control the international arms trade and nuclear weapons. In addition, *From Horror to Hope* profiles inspiring health professionals who are providing healthcare for war-affected populations and participating in education, research, and advocacy to reduce the health impacts of war. Finally, the book demonstrates how traditional public health frameworks and new paradigms can be applied to the prevention of war and the promotion of peace. Given the current peak in armed conflicts and the increasing threat of future wars, *From Horror to Hope* provides an extremely timely overview for anyone seeking to better understand and address the health consequences of war.
