

## News/2020 05 06

As recognized, adventure as capably as experience roughly lesson, amusement, as competently as accord can be gotten by just checking out a booksnews/2020 05 06 as a consequence it is not directly done, you could consent even more on this life, in this area the world.

We have the funds for you this proper as capably as simple artifice to get those all. We present news/2020 05 06 and numerous books collections from fictions to scientific research in any way. among them is this news/2020 05 06 that can be your partner.

Like Nobody's Business Andrew C. Comrie 2021-02-23 How do university finances really work? From flagship public research universities to small, private liberal arts colleges, there are few aspects of these institutions associated with more confusion, myths or lack of understanding than how they fund themselves and function in the business of higher education. Using simple, approachable explanations supported by clear illustrations, this book takes the reader on an engaging and enlightening tour of how the money flows. How does the university really pay for itself? Why do tuition and fees rise so fast? Why do universities lose money on research? Do most donations go to athletics? Grounded in hard data, original analyses, and the practical experience of a seasoned administrator, this book provides refreshingly clear answers and comprehensive insights for anyone on or off campus who is interested in the business of the university: how it earns its money, how it spends it, and how it all works.

A Deeper Sickness Margaret Peacock 2022-03-08 A harrowing chronicle by two leading historians, capturing in real time the events of a year marked by multiple devastations. When we look back at the year 2020, how can we describe what really happened? In A Deeper Sickness, award-winning historians Margaret Peacock and Erik Peterson set out to preserve what they call the "focused confusion," and to probe deeper into what they consider the Four Pandemics that converged around the 12 astonishing months of 2020: • Disease • Disinformation • Poverty • Violence Drs. Peacock and Peterson use their interdisciplinary expertise to extend their analysis beyond the viral science, and instead into the social, political, and historical dimensions of this crisis. They consulted with dozens of experts and witnesses from a wide range of fields—from leading epidemiologists and health care workers to leaders of the Black Lives Matter movement, district attorneys, political scientists, philosophers, and more. Their journey revealed a sick country that believed it was well, a violent nation that believed it was peaceful; one that mistook poverty for prosperity and accountability for rebellion. Organized into the journal-entries along with dozens of archival images, A Deeper Sickness will help readers sift through the chaos and misinformation that characterized those frantic days. It is both an unflinching indictment of a nation that is still reeling and a testament to the power of human resilience and collective memory. Readers can share their story and become a contributing author by visiting an interactive digital museum, where the authors have preserved dozens of more stories and interviews. Visit Margaret Peacock and Erik L. Peterson's digital museum at [adhc.lib.ua.edu/pandemicbook/](http://adhc.lib.ua.edu/pandemicbook/).

African American Leadership and Mentoring Through Purpose, Preparation, and Preceptors Pichon, Henrietta Williams 2021-12-10 The lack of African Americans in leadership roles within the academy creates a real crisis in the leadership pipeline. One of the problems could be that the pathways to leadership for African Americans are less visible. They can see the end result but may be less clear about how to get there. Oftentimes, understanding these pathways to leadership is less academic in nature and more informal and/or relational. Thus, the relationship between leadership and mentorship for African Americans is especially important to advancing in the academy. Further guidance and understanding of steps to advancement from established African American leaders in the academy is therefore needed. African American Leadership and Mentoring Through Purpose, Preparation, and Preceptors provides an exhaustive exploration of leadership and mentorship through purpose, preparation, and preceptors. This edited book explains how to identify ways that individuals can strengthen their career trajectory, determine strategies to employ for career advancement, establish lasting and impactful connections with key stakeholders per career aspirations, provide guidance for individuals seeking advancement within the academy, and explore current theoretical and practical nuances with regard to research, literature, and application of leadership and mentorship of African Americans in the academy. Covering topics such as cross-racial mentorship, emotionally intelligent leadership, and African American leaders, this text is ideal for teachers, faculty, university administrators, leaders in education, aspiring future leaders, researchers, academicians, and students.

Geopolitics, Discrimination, Gender, & Immigration Julia Dobrev 2020-10-20 The world today is more unequal than it has ever been before. Therefore, global inequalities represent a crucial issue of the contemporary global economy. This volume carries the title 'Geopolitics, Discrimination, Gender, & Immigration'. It contains eleven selected papers which touch upon the topic of inequalities from various perspectives. The scope of the discussion in the papers is wide and it opens possibilities for further research in problems that are directly or indirectly related to inequalities of opportunity, gender issues, immigration and global policies.

Crisis, Chaos and Organizations Daniel J. Svyantek 2022-01-01 The COVID-19 pandemic provides an illustration of how chaotic changes to large systems are caused by small, seemingly insignificant environmental events such as the initial case(s) of COVID-19 in China. From this small starting point for the pandemic, there have been (and continue to be) millions of lives lost and trillions of dollars spent trying to alleviate the effects of the COVID-19 pandemic. World government and corporate leaders are striving to deal with this pandemic, but uncertainty is felt across the globe. Unprecedented strategies (e.g., the United States government's multi-trillion-dollar stimulus package (s)) have been used to halt the spread of COVID-19. These small events cascade throughout larger and larger systems leading to unforeseeable consequences. Organizations must experiment and make decisions on how to react. Decisions must be made and implemented to see what the effects of these decisions are. The chapters in this volume provide important insights for all organizations during this time of crisis. The chapters express bottom-up and top-down approaches to a crisis-initiating environmental change by organizations. The chapters provide insight into the way organizations perceive the effect of COVID-19 as 1) a permanent or transitory change in the organization's environment; and 2) as a crisis or opportunity. Taken together, the chapters provide both scientists and practitioners with a starting point for understanding the impact of COVID-19 on organizational theory and on management practice for readers.

The Epistemology of Deceit in a Postdigital Era Alison MacKenzie 2021-08-03 This edited book collection offers strong theoretical and philosophical insight into how digital platforms and their constituent algorithms interact with belief systems to achieve deception, and how related vices such as lies, bullshit, misinformation, disinformation, and ignorance contribute to deception. This inter-disciplinary collection explores how we can better understand and respond to these problematic practices. The Epistemology of Deceit in a Postdigital Era: Dupery by Design will be of interest to anyone concerned with deception in a 'postdigital' era including fake news, and propaganda online. The election of populist governments across the world has raised concerns that fake news in online platforms is undermining the legitimacy of the press, the democratic process, and the authority of sources such as science, the social sciences and qualified experts. The global reach of Google, YouTube, Twitter, Facebook, and other platforms has shown that they can be used to create and spread fake and misleading news quickly and without control. These platforms operate and thrive in an increasingly balkanised media eco-system where networks of users will predominantly access and consume information that conforms to their existing worldviews. Conflicting positions, even if relevant and authoritative, are suppressed, or overlooked in everyday digital information consumption. Digital platforms have contributed to the prolific spread of false information, enabled ignorance in online news consumers, and fostered confusion over determining fact from fiction. The collection explores: Deception, what it is, and how its proliferation is achieved in online platforms. Truth and the appearance of truth, and the role digital technologies play in pretending to represent truth. How we can counter these vices to protect ourselves and our institutions from their potentially baneful effects. Chapter 15 is available open access under a Creative Commons Attribution 4.0 International License via [link.springer.com](http://link.springer.com).

How the NHS Coped with Covid-19 Ellen Welch 2022-08-30 2020 will forever be remembered as the year the Coronavirus pandemic changed life as we know it across the World. Economies crashed, livelihoods were eradicated, and thousands of lives were shortened or devastated by the effects of this novel virus. In the UK, the National Health Service was thrust into the limelight as the country watched our healthcare system respond to the consequences of this disease. This book traces a timeline of the COVID-19 pandemic, highlighting key events in how the UK and the NHS approached these unparalleled events. Comparisons are made with tactics used around the globe and the decisions of our leaders questioned. Alongside the facts, are stories. Every one of us has a 'Covid story' to tell, and this book is a collection of some of these stories from our frontline staff. As the country went into rapid lockdown in March, the staff of the NHS donned their PPE and continued to go to work. They tell us what peak pandemic was like in the emergency departments, wards, ICUs, GP practices, care homes and the ambulances of the UK. We hear from a nurse who became a covid patient in her own ICU; staff from the rapidly constructed Nightingale hospital; a GP who returned from retirement to assist with the response; as well as stories from international healthcare professionals such as a cruise ship nurse in the Caribbean, a public health consultant in Australia and ED doctors in South Africa.

Coronavirus Politics Scott L Greer 2021-04-19 COVID-19 is the most significant global crisis of any of our lifetimes. The numbers have been stupefying, whether of infection and mortality, the scale of public health measures, or the economic consequences of shutdown. Coronavirus Politics identifies key threads in the global comparative discussion that continue to shed light on COVID-19 and shape debates about what it means for scholarship in health and comparative politics. Editors Scott L. Greer, Elizabeth J. King, Elize Massard da Fonseca, and André Peralta-Santos bring together over 30 authors versed in politics and the health issues in order to understand the health policy decisions, the public health interventions, the social policy decisions, their interactions, and the reasons. The book's coverage is global, with a wide range of key and exemplary countries, and contains a mixture of comparative, thematic, and templated country studies. All go beyond reporting and monitoring to develop explanations that draw on the authors' expertise while engaging in structured conversations across the book.

Issues of Educational Leadership Fern Aefsky 2021-06-15 This book focuses on the need for school and organizational leaders to be able to lead others through a crisis, such as school and community shootings and unrest; pandemic issues; and weather-related emergencies.

The Roads to Congress 2020 Sean D. Foreman 2021-11-20 This book analyzes changes to campaigning and voting in the United States in 2020. The global pandemic caused by COVID-19 upended traditional campaign strategies, posed unprecedented challenges to candidates, and possessed the potential to fundamentally alter how campaigns think about running for office. At the same time, the Trump administration's divisive handling of twin crises stemming from the pandemic and rising racial tensions

loomed over congressional races as the most disruptive election cycle in living memory. The ramifications of the 2020 congressional elections for the direction of public policy in America—and perhaps for American democracy itself—cannot be overstated. The Roads to Congress 2020 examines key House and Senate campaigns, candidates, and controversies in the 2020 election to reveal what accounts for the outcomes and point the way to America's political future.

The COVID-19 Impact on Higher Education Stakeholders and Institutional Services Michael G. Strawser 2022 This volume provides different perspectives regarding the impact of COVID-19 on higher education. Topics include COVID-19 implications on faculty development, communication, student services, and more.

Handbook of Research on Teacher and Student Perspectives on the Digital Turn in Education Karpava, Sviatlana 2022-06-24 In recent years, the traditional way of teaching has been substituted by online teaching. Teachers have had to think about efficient and effective teaching methods and activities in online delivery that can keep students interested and engaged. It is important to examine teacher cognition and its relevance to classroom management and teaching practice as the role of technology in teaching and learning cannot be overestimated. The Handbook of Research on Teacher and Student Perspectives on the Digital Turn in Education examines the cognitions of teachers and students, their attitudes and perceptions regarding online teaching, and their personal experiences and challenges regarding the use of online platforms and digital tools. This book discusses the implementation of digital technologies in primary, secondary, and tertiary education that facilitates the learning and teaching process and creates a student-centered environment. Covering topics such as digital literacy, student engagement, and pedagogy, this reference work is an essential resource for practitioners, scholars, administrators, policymakers, researchers, academicians, instructors, and students.

The Rohingya Crisis Nasir Uddin 2021-11 This book is based on fieldwork conducted in refugee camps in India, Bangladesh and other countries, presenting new data on the Rohingya refugees and discussing policy issues.

Coronavirus and Vulnerable People Laura L. Finley 2022-05-01 Drawing from many disciplinary areas, this edited volume explores how the Coronavirus pandemic has disproportionately harmed vulnerable and marginalized people in the U.S. Chapters address harm to people of color that exacerbated structural racism and harm to low-wage workers that highlighted existing inequalities. In addition, the volume provides strategies that have been successful in mitigating these harms and recommendations for a post-pandemic more peaceful and just future.

The New (Ab)Normal Yossi Sheffi 2020-10-01 Much has been written about Covid-19 victims, how scientists raced to understand and treat the disease, and how governments did (or did not) protect their citizens. Less has been written about the pandemic's impact on the global economy and how companies coped as the competitive environment was upended. In his new book, "The New (Ab)Normal", MIT Professor Yossi Sheffi maps how the Covid-19 pandemic impacted business, supply chains, and society. He exposes the critical role supply chains play in helping people, governments, and companies to manage the crisis. The book draws on executive interviews, pandemic media coverage, and historical analyses. Sheffi also builds on themes from his books "The Resilient Enterprise" (2005) and "The Power of Resilience" (2015) to enrich the narrative. The author paints a compelling picture of how the Covid-19 virus is changing many facets of human life and what our post-pandemic world might look like. This must-read book helps companies to redefine their business models and adjust to a fast-evolving economic landscape. The stage is set In Part 1 of the book, "What Happened," the author looks at how companies fought to mend the global economic fabric even as the virus ripped more holes in it. Part 2, "Living with Uncertainty," views the crisis through a supply chain risk management lens derived from Yossi Sheffi's previous books. This perspective shows how companies create corporate immune systems to quickly recognize and manage large-scale disruptions. The ongoing pandemic is creating a new normal in life, work, and education—covered in Part 3, "Adjustment Required." Consumer fears about the contagion as well as government mandates require businesses in industries such as retail, hospitality, entertainment, sports, and education to create "safe zones" for workers and customers. Many elements of the book – especially in Part 4, "Supply Chains for the Future" – show how the virus accelerated preexisting trends in technology adoption. China was the epicenter of the pandemic; it also was the first nation to be disrupted and recover. Part 5 of the book, "Of Politics and Pandemics," explains why reports that companies are abandoning China in favor of other offshore manufacturing centers do not reflect reality. Fundamentally, The New (Ab)Normal is about businesses trying to create a better future in a time of extreme uncertainty – a point emphasized in Part 6, "The Next Opportunities." The outlook is not necessarily gloomy. The advance of technology is accelerating, a trend that can level the playing field between small and large companies. Nimble small businesses are using a growing array of off-the-shelf cloud computing and mobile apps to deploy sophisticated technologies in their supply chains and customer interfaces. The New (Ab)Normal Another new normal is working from home. Remote working enables individuals to live anywhere and companies to recruit talent from anywhere. Education, especially higher education, faces a major disruption (and major opportunity) that is likely to shake the high-cost model of in-person education in favor of online or hybrid education. Regrettably, the book recognizes one trend accentuated by Covid-19--the growing inequality, and anticipates that the new normal will be more stratified.

Corporations Compassion Culture Keesa C. Schreane 2021-03-09 Provides guidance on creating a sustainable, inclusive, equitable, and compassionate business model that will thrive in businesses globally Diversity, equity, and inclusion programs are a must for today's corporations, yet many corporations worldwide have failed to establish real equality in an actionable, measurable way. Corporations Compassion Culture: Leading Your Business toward Diversity, Equity, and Inclusion takes a new and more effective approach to driving equity and inclusion in the corporate world, focusing on how a culture of compassion can lead to more vibrant, higher performing teams. You'll learn how many standard corporate activities actually damage employees' well-being and engagement—and how to dismantle those practices. You'll also learn how to build a new and better corporate environment that responds to all employees' needs and meets shareholders' demands for stability and risk mitigation. Author Keesa Schreane delivers insight into what it takes for businesses to drive real social and corporate change toward inclusion and equity, while sharing her personal story about the challenges of being a woman of color in today's corporate environment. Through hard work, talent, and—you guessed it—compassion, she has risen to become one of today's luminaries in the area of responsible leadership in global corporations. Business executives, HR directors, diversity and inclusion professionals, and sustainability leaders will value her direct, no-nonsense approach. Learn to: Identify behaviors, practices, and activities that may be damaging your employees' well-being, engagement, and productivity Measure and continuously evolve culture promoting risk mitigation, reputation preservation, employee retention, customer satisfaction, and profit generation. Adopt new approaches to treat employees, customers, and shareholders compassionately and equally, and dismantle the old ways Retain the best talent and survive new realities, all while creating tremendous loyalty, innovation, and financial payoff This book will enable you to create strategies and tactics for integrating racial, cultural and gender equity, inclusion, and compassion into businesses in a way that enriches society, employees, and the corporate entity itself.

COVID-19 Pandemic Pawar, Manohar 2020-12-01 In this book, leading social researchers from Australia, India, Italy, New Zealand, South Africa, Sweden, the UK and USA discuss the impact of the novel coronavirus pandemic in their respective countries. They explore socio-cultural, health, economic and educational aspects of people's lives, and governments' policies and programmes. Their analyses show how coronavirus infects indiscriminately and impacts discriminately, particularly the disadvantaged and marginalized groups. The pandemic exposes hidden health inequalities and calls for structural changes. It significantly contributes to lessons learned from the pandemic and the understanding of implications for community and social development. The book is a useful resource for further research and action, and policies and programmes to fight the pandemic and support people and communities with care and compassion.

Administratively Adrift Scott A. Bass 2022-06-09 The multiple crises of 2020–21 have presented both challenges and opportunities for change in four-year residential colleges and universities. Evidence indicates that the historic structure of administrative and student services is increasingly mismatched to the needs of a diverse and stressed student body born in a digital age. Inspired by his leadership in a university-wide initiative that focused on how students' interactions with both academic and professional staff affect their success and well-being, Scott A. Bass presents fresh insights on the inner workings of traditional nonprofit four-year degree residential institutions. The book describes the influences of history, tradition, and internal and external pressures on the American university, highlighting its evolution to its staid and fragmented structure; it distills voices of students, faculty, and staff; and it explores how successful organizations outside of higher education deliver services, with potential applicability for the academy's ability to meet students where they are.

[A President's Daily Brief: Year 4](#) Micah Fisher-Kirshner

What was daily life under the Trump presidency really like?

An accessible ebook with short, thematic entries showing the corruption of the Trump presidency, [A President's Daily Brief, Year 4: The Day-by-Day Lurch of Trump's Norm-Breaking Presidency](#) is the fourth in Micah Fisher-Kirshner's series, representing the fourth and final year of Trump's time in power and the subversion that occurred. More than a compiled list of significant events that portray Trump as the most corrupt American president, this digestible and scannable read of in-the-moment posts pulled from news outlets and credible sources provides an intimate look at how the administration went about breaking the presidential norms on a daily basis. Readers also will have access to citations to fact-check claims.

This quick read on a Trump presidency that started off with outrage and graduated to righteous indignation is a must-have for those who enjoy history, politics, and government or simply want to read about the most notorious presidency in history.

Everyone's Democracy Elliott Fullmer 2022-08-31 While great strides have been made since the Founding years, the United States continues to suffer from a high degree of political inequality. Some citizens have a louder voice in their democracy than others. Both the malapportioned Senate and Electoral College overrepresent Americans in small states, while gerrymandered districts poorly convert votes into power in the House of Representatives. More than four million Americans living in Washington, D.C., and the territories lack representation in Congress, while citizens everywhere face unnecessary burdens to cast ballots. Biased media and questionable political funding render it difficult to hold elected officials accountable. This book explores these formidable problems and identifies the path to securing a fairer, more representative political system. Sourcing solutions directly from the Constitution, chapters outline the tools that could limit malapportionment, expand voting rights, control the influence of big donors and more. Achieving these reforms, however, requires an engaged citizenry that demands change from those in power.

Dead Epidemiologists Rob Wallace 2020-10-20 A history of COVID-19 and the sociopolitical crises that led to the 2020 global pandemic The COVID-19 pandemic shocked the world. It shouldn't have. Since this century's turn, epidemiologists have warned of new infectious diseases. Indeed, H1N1, H7N9, SARS, MERS, Ebola Makona, Zika, and a variety of lesser viruses have emerged almost annually. But what of the epidemiologists themselves? Some bravely descended into the caves where bat species hosted

coronaviruses, including the strains that evolved into the COVID-19 virus. Yet, despite their own warnings, many of the researchers appear unable to understand the true nature of the disease—as if they are dead to what they've seen. *Dead Epidemiologists* is an eclectic collection of commentaries, articles, and interviews revealing the hidden-in-plain-sight truth behind the pandemic: Global capital drove the deforestation and development that exposed us to new pathogens. Rob Wallace and his colleagues—ecologists, geographers, activists, and, yes, epidemiologists—unpack the material and conceptual origins of COVID-19. From deepest Yunnan to the boardrooms of New York City, this book offers a compelling diagnosis of the roots of COVID-19, and a stark prognosis of what—without further intervention—may come.

*Neoliberal Citizenship* Luca Mavelli 2022-02-15 First systematic treatment of neoliberal citizenship and draws in-depth connections between Europe's four major crises (Eurozone, refugee, Brexit, and COVID-19)

*Digital Authoritarianism in the Middle East* Marc Owen Jones 2022-07-06 You are being lied to by people who don't even exist. Digital deception is the new face of information warfare. Social media has been weaponised by states and commercial entities alike, as bots and trolls proliferate and users are left to navigate an infodemic of fake news and disinformation. In the Persian Gulf and the wider Middle East, where authoritarian regimes continue to innovate and adapt in the face of changing technology, online deception has reached new levels of audacity. From pro-Saudi entities that manipulate the tweets of the US president, to the activities of fake journalists and Western PR companies that whitewash human rights abuses, Marc Owen Jones' meticulous investigative research uncovers the full gamut of tactics used by Gulf regimes and their allies to deceive domestic and international audiences. In an age of global deception, this book charts the lengths bad actors will go to when seeking to impose their ideology and views on citizens around the world.

*Post-COVID recovery: An agenda for resilience, development and equality* International Renewable Energy Agency IRENA 2020-06-01 Energy transition investments in the wake of COVID-19 can pave the way for equitable, inclusive and resilient economies.

*Taking Stock of Regional Democratic Trends in Asia and the Pacific Before and During the COVID-19 Pandemic* International IDEA 2020-12-22 This GSoD In Focus Special Brief provides an overview of the state of democracy in Asia and the Pacific at the end of 2019, prior to the outbreak of the pandemic, and assesses some of the preliminary impacts that the pandemic has had on democracy in the region in 2020. Key fact and findings include: Prior to the outbreak of the COVID-19 pandemic, countries across Asia and the Pacific faced a range of democratic challenges. Chief among these were continuing political fragility, violent conflict, recurrent military interference in the political sphere, enduring hybridity, deepening autocratization, creeping ethnonationalism, advancing populist leadership, democratic backsliding, shrinking civic space, the spread of disinformation, and weakened checks and balances. The crisis conditions engendered by the pandemic risk further entrenching and/or intensifying the negative democratic trends observable in the region prior to the COVID-19 outbreak. Across the region, governments have been using the conditions created by the pandemic to expand executive power and restrict individual rights. Aspects of democratic practice that have been significantly impacted by anti-pandemic measures include the exercise of fundamental rights (notably freedom of assembly and free speech). Some countries have also seen deepened religious polarization and discrimination. Women, vulnerable groups, and ethnic and religious minorities have been disproportionately affected by the pandemic and discriminated against in the enforcement of lockdowns. There have been disruptions of electoral processes, increased state surveillance in some countries, and increased influence of the military. This is particularly concerning in new, fragile or backsliding democracies, which risk further eroding their already fragile democratic bases. As in other regions, however, the pandemic has also led to a range of innovations and changes in the way democratic actors, such as parliaments, political parties, electoral commissions, civil society organizations and courts, conduct their work. In a number of countries, for example, government ministries, electoral commissions, legislators, health officials and civil society have developed innovative new online tools for keeping the public informed about national efforts to combat the pandemic. And some legislatures are figuring out new ways to hold government to account in the absence of real-time parliamentary meetings. The consideration of political regime type in debates around ways of containing the pandemic also assumes particular relevance in Asia and the Pacific, a region that houses high-performing democracies, such as New Zealand and the Republic of Korea (South Korea), a mid-range performer (Taiwan), and also non-democratic regimes, such as China, Singapore and Viet Nam—all of which have, as of December 2020, among the lowest per capita deaths from COVID-19 in the world. While these countries have all so far managed to contain the virus with fewer fatalities than in the rest of the world, the authoritarian regimes have done so at a high human rights cost, whereas the democracies have done so while adhering to democratic principles, proving that the pandemic can effectively be fought through democratic means and does not necessarily require a trade off between public health and democracy. The massive disruption induced by the pandemic can be an unparalleled opportunity for democratic learning, change and renovation in the region. Strengthening democratic institutions and processes across the region needs to go hand in hand with curbing the pandemic. Rebuilding societies and economic structures in its aftermath will likewise require strong, sustainable and healthy democracies, capable of tackling the gargantuan challenges ahead. The review of the state of democracy during the COVID-19 pandemic in 2020 uses qualitative analysis and data of events and trends in the region collected through International IDEA's Global Monitor of COVID-19's Impact on Democracy and Human Rights, an initiative co-funded by the European Union.

*Handbook of Research on Opening Pathways for Marginalized Individuals in Higher Education* Huffman, Stephanie P. 2022-06-24 In recent years, gaps in college opportunities have contributed to diminished social mobility and are influenced by disparities in collegiate experiences. An integral part of the mission of colleges and universities is to advance student achievement and prepare students for a global society by fostering educational excellence and ensuring equal access. In order to provide equal educational opportunities, further study on the best practices to create a diverse and welcoming campus community for all faculty and students is required. The *Handbook of Research on Opening Pathways for Marginalized Individuals in Higher Education* examines specific case studies and stories from the field, analyzes the research breadth for supporting the creation of policies to foster equitable educational access, and studies higher education inclusive policies that promote leadership, social justice, and the health and well-being of faculty and students. The book also helps to alleviate and remedy issues of "historical privilege" with a lens on diversity and support through the creation of inclusive communities of equitable educational access. Covering a range of topics such as social justice, accessibility, and healthy student interactions, this reference work is ideal for academicians, researchers, scholars, practitioners, instructors, and students.

*Building Back Truth in an Age of Misinformation* Leslie F. Stebbins 2023 "This book provides strategies for building back truth online. It provides solutions so that we can repair our existing social media platforms and build better ones that prioritize value over profit, strengthen community ties, and promote access to trustworthy information"--

*Foundations of Infectious Disease: A Public Health Perspective* David P Adams 2020-03-16 Designed to introduce senior undergraduates and graduate students in public health and nursing to the study of infectious disease, *Foundations of Infectious Disease: A Public Health Perspective* places the study of infectious diseases squarely into its social, historical, and scientific context to demonstrate how it applies to the public and community health setting. Beginning with an introductory chapter that surveys how infectious diseases have impacted human societies over the centuries, this broad descriptive text moves on to examine epidemiological concepts related to infectious disease, from outbreak and epidemic investigations, to study design infectious disease transmission and prevention. Subsequently, it delves into infectious disease topics of concern to today's public and community health professionals: sexually transmitted infections, foodborne infections, healthcare-acquired infections, and neglected tropical diseases.

*Sexual Assault on Campus* Tamara Rice Lave 2022-07-07 Fair adjudication of campus sexual assault is one of the most divisive issues facing the United States. Victims contend that schools aren't doing enough to protect them, and accused students complain that they are presumed guilty. *Sexual Assault on Campus: Defending Due Process* begins by critically assessing the extent of the problem, before explaining why the criminal justice system has been unable to respond adequately. The book discusses the Department of Education's attempts to force schools to take campus assault seriously and uses original data in assessing the fairness of adjudication in the wake of the 2011 'Dear Colleague Letter.' It also includes excerpts from interviews with complainants, accused students, and administrators, which offer readers a first-hand account of these proceedings. Finally, the book provides a critical, in-depth look at the Title IX regulations put in place by the Trump Administration, with detailed recommendations for how they can be improved.

*Putin's Playbook* Rebekah Koffler 2021-07-27 It's time for Americans to recognize, and accept, that Russia is waging war with America. In fact, President Vladimir Putin has already authorized an action plan for victory. Intelligence expert Rebekah Koffler--an expert on Russian doctrine and intelligence strategy who was born in the former Soviet Union--shows us that Russia's subversive activity in America is increasing. Social media manipulation is a very small piece of a much larger puzzle that, when put together, reveals a highly-coordinated strategy to defeat the United States without firing a shot or sending missiles to awaken a sleeping populace.

*A President's Daily Brief: Years 1-4* Micah Fisher-Kirshner

What was daily life under the Trump presidency really like?

An accessible ebook with short, thematic entries showing the corruption of the entire Trump presidency, *A President's Daily Brief, Year 1-4: The Day-by-Day Lurch of Trump's Norm-Breaking Presidency* is the full volume of Micah Fisher-Kirshner's series, representing the four years of Trump's time in power and the subversion that occurred. More than a compiled list of significant events that portray Trump as the most corrupt American president, this digestible and scannable read of in-the-moment posts pulled from news outlets and credible sources provides an intimate look at how the administration went about breaking the presidential norms on a daily basis. Readers also will have access to citations to fact-check claims.

This quick read on a Trump presidency that started off with outrage and graduated to righteous indignation is a must-have for those who enjoy history, politics, and government or simply want to read about the most notorious presidency in history.

*Consumption, Production, and Entrepreneurship in the Time of Coronavirus* Elena Gallitto

*China's Civilian Army* Peter Martin 2021 "China's Civilian Army tells the story of China's transformation from an isolated and impoverished communist state to a global superpower from the perspective of its diplomats. In the early days of the People's Republic, diplomats were highly-disciplined, committed communists who feared revealing any weakness to the threatening capitalist world. Remarkably, the model that revolutionary leader Zhou Enlai established continues to this day despite the massive changes the country has undergone in recent decades. Even today, Chinese diplomats work in pairs so that one can always watch the other for signs of ideological impurity. China's Civilian Army charts the history of China's diplomatic corps from its earliest days through to

the present, drawing on the memoirs of more than a hundred retired diplomats and dozens of interviews"--

**Empires of Ideas** William C. Kirby 2022-07-05 The modern university was born in Germany. In the twentieth century, the United States leapfrogged Germany to become the global leader in higher education. Will China challenge its position in the twenty-first? Today American institutions dominate nearly every major ranking of global universities. Yet in historical terms, America's preeminence is relatively new, and there is no reason to assume that US schools will continue to lead the world a century from now. Indeed, America's supremacy in higher education is under great stress, particularly at its public universities. At the same time Chinese universities are on the ascent. Thirty years ago, Chinese institutions were reopening after the catastrophe of the Cultural Revolution; today they are some of the most innovative educational centers in the world. Will China threaten American primacy? **Empires of Ideas** looks to the past two hundred years for answers, chronicling two revolutions in higher education: the birth of the research university and its integration with the liberal education model. William C. Kirby examines the successes of leading universities—The University of Berlin and the Free University of Berlin in Germany; Harvard, Duke, and the University of California, Berkeley, in the United States—to determine how they rose to prominence and what threats they currently face. Kirby draws illuminating comparisons to the trajectories of three Chinese contenders: Tsinghua University, Nanjing University, and the University of Hong Kong, which aim to be world-class institutions that can compete with the best the United States and Europe have to offer. But Chinese institutions also face obstacles. Kirby analyzes the challenges that Chinese academic leaders must confront: reinvesting in undergraduate teaching, developing new models of funding, and navigating a political system that may undermine a true commitment to free inquiry and academic excellence.

**Covid-19, State-power and Society in Europe** Neven Andjelic 2022 This book explores the current state of society in Europe in general and the regimes and societies of the Western Balkans in particular. The pandemic and near-universal lockdown have provided an ideal cut-off date for the collection of indices from reputable academic sources that cover the nature of these regimes, individual human freedoms, economic freedoms, the rule of law, human rights and media freedoms. The aggregated findings from the 20 individual indices provide comprehensive data to support original findings and the characterisation of societies in 45 European states. Admittedly, there are differences in the methodologies and samples among the indices consulted. Nonetheless, taken together they offer a solid basis for developing arguments concerning the diversity of regimes, governance and societies in Europe and drawing well-founded conclusions on the nature of society in various parts of Europe. Though the book's main focus is on the Western Balkans, the region is put in a pan-European context. The issues of migration, minorities, global geopolitics, the crisis of liberal democracy they all play into developments that are specific to the Western Balkans. The book answers the question of whether the pandemic has allowed local regimes to strengthen their power and exert greater control over society, making it possible to formulate arguments regarding the future of Europe and its integrative processes. In closing, the book investigates Western Balkan regimes' reactions to the pandemic in the context of governance, society and state power, before addressing the question of whether the future of the Western Balkans lies in the "liberal club", or whether local hybrid regimes will become even more influential in the near future.

**Economic Dimensions of Covid-19 in Indonesia** Blane D. Lewis 2021-04-19 Beginning in December 2019, the coronavirus swept quickly through all regions of the world. COVID 19 has wreaked social, political and economic havoc everywhere and has shown few signs of entirely abating. The recent development and approval of new vaccines against the virus, however, now provides some hope that we may be coming to the beginning of the end of the pandemic. This volume collects papers from a conference titled **Economic Dimensions of COVID 19 in Indonesia: Responding to the Crisis**, organised by the Australian National University's Indonesia Project and held online 7–10 September 2020. Collectively, the chapters in this volume focus for the most part on the economic elements of COVID 19 in Indonesia. The volume considers both macro- and micro-economic effects across a variety of dimensions, and short- and long-term impacts as well. It constitutes the first comprehensive analysis of Indonesia's initial response to the crisis from an economic perspective.

**COVID-19 and a World of Ad Hoc Geographies** Stanley D. Brunn 2022-10-17 This book provides an interdisciplinary overview of the causes and impacts of COVID-19 on populations, economies, politics, institutions and environments from all world regions. The book maps the causes, effects and impacts of the virus and describes the impact of the virus on among others health care, teaching and learning, travel, tourism, daily life, local and regional economies, media impacts, elections, and indigenous populations and much more. Contributions to this book come from the humanities, social and policy science disciplines as well as from emerging transdisciplinary fields including climate change, sustainability, health care and epidemiology, security, art, visualization, economic and social well-being, law and borderland studies. As such, this book will be a rich source of information to all those geographers, social scientists and urban and regional planners working in this field.

**Preventable** Devi Sridhar 2022-04-21 **\*\*THE SUNDAY TIMES BESTSELLER | BBC RADIO 4 BOOK OF THE WEEK\*\*** Preventable tells the extraordinary story of COVID-19 and how global politics shape our health - from a world-leading expert and the pandemic's go-to science communicator Professor Devi Sridhar has risen to prominence for her vital roles in communicating science to the public and speaking truth to power. In Preventable she highlights lessons learned from outbreaks past and present in a narrative that traces the COVID-19 pandemic - including her personal experience as a scientist - and sets out a vision for how we can better protect ourselves from the inevitable health crises to come. In gripping and heartfelt prose, Sridhar exposes the varied realities of those affected (from the jailed doctor in Wuhan who sounded the alarm, and the bored passengers marooned on the Diamond Princess cruise ship, to the daily nightmares of exhausted healthcare workers), and puts you in the room with key decision makers at crucial moments (from over-confident heads of states and their hesitant scientific advisors, to the beleaguered leaders of global health organisations). Sridhar vibrantly conveys the twists and turns of a plot that saw: deadlier variants emerge (contrary to the predictions of social media pundits who argued it would mutate to a milder form); the Pyrrhic victory in many countries of the false narrative of health versus the economy (those countries which controlled the virus, like Taiwan and Denmark, had a steadier recovery); countries with weak health systems like Senegal and Vietnam fare better than countries like the US and UK (which were consistently ranked as the most prepared); and the quickest development of game-changing vaccines in history (and their unfair distribution). Combining science, politics, ethics and economics, this definitive book dissects the global structures that determine our fate, and reveals the deep-seated economic and social inequalities at their heart - it will challenge, outrage and inspire. 'A brutally compelling reminder that if voices like Devi's had been listened to, so many more could have lived' OWEN JONES 'One of the most brilliant scientists in the world who has been proven consistently right in this crisis' PIERS MORGAN 'Excellent . . . Fair, clear and compelling' NICOLA STURGEON 'Those who have found Professor Devi Sridhar's expertise and calm advice invaluable since the arrival of Covid-19 will be glad to know that she has written Preventable' RACHEL COOKE, Guardian, Non-fiction to look out for in 2022
