Social Media and Modern Society Kate Conley 2021-12-15 This title explores the positive and negative effects of social media on our world. On one hand, social media helps people connect and stay in touch more easily than ever before. On the other, many experts believe social media has worsened political polarization and boosted the spread of misinformation. Features include a glossary, online resources, source notes, and an index. Aligned to Common Core Standards and correlated to state standards. Essential Library is an imprint of Abdo Publishing, a division of ABDO.

Mapping Deathscapes Suvendrini Perera 2022-01-27 This volume offers a critical and creative analysis of the innovations of Deathscapes, a transnational digital humanities project that maps the sites and distributions of custodial deaths in locations such as police cells, prisons and immigration detention centres. An international team of authors take a multidisciplinary approach to questions of race, geographies of state violence and countermaps of resistance across North America, Australia and Europe. The book establishes rich lines of dialogic connection between digital and other media by incorporating both traditional scholarly resources and digital archives, databases and social media. Chapters offer a comprehensive mapping of the key attributes through which racial violence is addressed and contested through digital media and articulate, in the process, the distinctive dimensions of the Deathscapes site. This interdisciplinary volume will be an important resource for scholars, students and activists working in the areas of Cultural Studies, Media and Visual Studies, Indigenous Studies, Refugee Studies and Law.

Sociology in Post-Normal Times Charles Thorpe 2022-02-28 The author contends that sociology, the science of social reform, is tied to the modern project of creating normalcy. This project is not viable in post-normal times brought on by Covid-19 and climate change. Thorpe argues that sociology must be left behind in order to create a new global humanity.

Campaigning in the Aftermath of the 2020 Elections Robert E Denton 2021-11-15 This volume explores post-election political communication from the 2020 election day until the inauguration of President Joseph R. Biden. Chapters address political branding, partisan argumentation, media coverage, President Trump's January 6 address and his discursive strategy, political advertising and cartoons, and post-election lawsuits.

Transition and Opportunity Huiyao Wang 2022 This book is open access under a CC BY-NC-ND 4.0 license. Multinational corporations (MNCs) have long played a crucial role in the Chinese economy. This role is one that is set to continue in the post-pandemic era as China works to transit to a high-quality growth model that is more sustainable and innovation-driven. With global experience and front-line involvement in some of the most pressing economic, technological, and environmental issues of our day, leading figures in MNCs and chambers of commerce are well placed to share insights that could potentially contribute to policymaking and development strategies so that everyone can "make the most" of China's future. This collection of essays aims to share these invaluable insights with a wider audience, offering balanced and diverse perspectives from companies and advocacy groups working on a range of issues related to China's domestic development, international economic cooperation, and China-US competition. These insights are useful not only for the wider business community, but also for academics, policymakers, students, and anyone trying to deepen their understanding of this exciting period of "transition and opportunity," and make the most of China's bright future. .

Writing Feminist Autoethnography Elizabeth Mackinlay 2022-01-31 Writing Feminist Autoethnography explores the personal-is-political relationship between autoethnography and feminist theory and practice. Each chapter introduces the lives and works of a range of feminist thinkers and writers and considers the ways in which their thinking and writing might come to be in relation with our own personal-is-political thinking and writing work as feminist autoethnographers. The book begins with an acknowledgement of the author's

positionality as a white-settler-colonial-woman in relation with Yanyuwa, Garrwa, Mara and Kudanji Aboriginal women. This positionality has continued to resonate deeply with the responses and sensibilities the author holds as a feminist autoethnographer to move beyond coloniality. She explores the writing of Virginia Woolf, Simone Weil, Simone de Beauvoir, Hélène Cixous, Kathleen Stewart, bell hooks and Ruth Behar, with critical affect to embrace, embody and engage with feminist thinking, wondering and feeling. The book creatively and performatively explores what it means to live a feminist life as an autoethnographer. This book will define and conceptualize feminist autoethnography for all qualitative researchers, especially those interested in critical autoethnography, and scholars in gender studies and communication.

Plants Zena Cumpston 2022-09-27 What do you need to know to prosper as a people for at least 65,000 years? The First Knowledges series provides a deeper understanding of the expertise and ingenuity of Indigenous Australians. Plants are the foundation of life on Earth. Aboriginal and Torres Strait Islander peoples have always known this to be true. For millennia, reciprocal relationships with plants have provided both sustenance to Indigenous communities and many of the materials needed to produce a complex array of technologies. Managed through fire and selective harvesting and replanting, the longevity and intricacy of these partnerships are testament to the ingenuity and depth of Indigenous first knowledges. *Plants: Past, Present and Future* celebrates the deep cultural significance of plants and shows how engaging with this heritage could be the key to a healthier, more sustainable future. 'Plants: Past, Present and Future calls for new ways of understanding and engaging with Country, and reveals the power and possibility of Indigenous ecological expertise.' - BILLY GRIFFITHS 'An enlightening read on the power of plants and the management practices of Indigenous people.' - TERRI JANKE Colonialism and the COVID-19 Pandemic Arthur W. Blume 2022 This book views responses to the Covid 19 virus through the lens of indigenous thinking which sheds light on some of the failures in dealing with the pandemic. Colonial societies maintain beliefs that hierarchies are part of the natural order, and that certain people are entitled to privileges that others are not. These hierarchies have contributed to racism as well as health, and wealth disparities that have increased vulnerabilities to the virus. Indigenous societies, on the other hand, view individuals as interdependent, and hold an optimistic view that this tragedy can yield important lessons for future improvement. This book examines the legacy of colonial societies in contributing to existing vulnerabilities, and incorporates an indigenous perspective in re-imagining the problem and its solutions.

State-Building, Rule of Law, Good Governance and Human Rights in Post-Soviet Space Lucia Leontiev 2022-05-10 This edited book analyses the issues of state-building, the rule of law and good governance, and human rights in the post-Soviet space after 30 years from the USSR dissolution. In doing so, it assesses the presence (or absence) and the level of influence of the Soviet legacies in the constructed political and legal systems of the post-Soviet republics. Assessing whether individual's interests are protected in theory and practice, the book conceptualizes the legacies that the Soviet Union left in the post-Soviet space after 30 years of disintegration. This book will be of key interest to scholars and students of human rights, governance, democratization studies, post-Soviet and Russia studies, and more widely to comparative politics, political economy, humanitarian studies and political history.

Lessons from History David Lowe 2022-07-01 Does history repeat itself in meaningful ways, or is each problem unique? How can a knowledge of Australian history enhance our understanding of the present and prepare us for the future? *Lessons from History* is written with the conviction that we must see the world, and confront its many challenges, with an understanding of what has gone before. A diverse range of historians, including Graeme Davison, Yves Rees, Joan Beaumont, Ann Curthoys, Mahsheed Ansari, Peter Spearritt and Frank Bongiorno, tackles the biggest challenges that face Australia and the world and shows how the past provides context and insight that can guide us today and tomorrow. 'Know the past to change the future. Insightful essays by leading historians on the complex back stories of some of our most vexed policy challenges.' – Judith Brett 'Lessons from History makes a formidable case for the contemporary real-world relevance, in both national and international policymaking, of deep historical understanding. Hugh White's account of the lessons of 1914 and 1939 for today's would-be warriors – just one of twenty-two invariably thought-provoking essays – is alone worth the purchase price. A rich and rewarding collection which should be read by anyone concerned for Australia's future.' – Gareth Evans 'For several decades now our national mentality has been dominated by economists and culture warriors. Few dare stand up to them. In this book, our top historians begin the fightback. As the pandemics, recessions, extremism and wars of the twentieth century return, the history profession announces its intention to re-enter the public sphere to help create a better future – and not a moment too soon. *Lessons from History* is the statement of intent all believers in the importance of this crucial discipline have been waiting for.' – Dennis Glover 'When devising policies to address everything from climate change, to racial justice and gender equality, to war and conflict, history and historical thinking are not only relevant, this book shows they are essential.' – Phillipa McGuinness 'A book for the times – an astute contribution to public debate. In twenty-two lively and eminently readable essays leading historians present a compelling case for the importance of history to add span, depth, context and above all wisdom to our policy making repertoire.' – Henry Reynolds

Virtue Bombs Christian Toto 2022-01-18 Hollywood's Dream Factory is now a nightmare of woke restrictions, Identity Politics run amok, and freedom-snuffing rules and regulations. The Oscars are unwatchable, as are many films and television shows thanks to the woke revolution. *Virtue Bombs* breaks down where Hollywood went so wrong, illustrates the slow-motion disaster infiltrating the industry, and offers a glimmer of hope for a woke-free tomorrow. Award-winning film critic Christian Toto has all the receipts, showcasing Hollywood's virtue-signaling follies and how it could get much, much worse before it gets better.

Economic Growth, Climate Crisis and Natural Disasters Gurinder Kaur 2022-04-13 Today, almost all countries of the world are facing the scourge of natural disasters caused by global warming. Rising temperature is increasing the frequency and intensity of natural disasters and the severity of their effects. The increase in the average global temperature

has not happened all of a sudden, the real reason for this increase is the pro-capitalist/corporate world economic development model adopted by the governments of different countries. Most of the countries around the world, especially developed countries, have indiscriminately squandered natural resources in a blind race of economic growth. The research articles in this book are an attempt to analyze the global climate crisis, natural disasters, and economic growth. They trace the extent to which human beings have destroyed natural resources such as forests, water, land, and air in the name of economic development. The average temperature of the earth began to rise after the Pre-Industrial Revolution Period. Rapid global warming has caused the world's oldest and most developed countries to be affected by floods, heatwaves, droughts, and wildfires. Every day, one or another region of India is suffering from natural calamities, with the state of Uttarakhand and six states in the Western Ghats being on the brink of ruin. They also explain which countries around the world are now planning to overcome the climate crisis caused by global warming. The time to look at the facts and act on Climate Change is now, if every country takes bold steps for the pressing issues at hand, we can still change the trajectory of where humanity is headed. Everyday small acts by vigilant citizens can look like drops of water, but we should remember many tiny drops can make an ocean, these many small acts can surmount to something bigger. We must put in the time, though, and effort quickly and boldly. Here's to leaving our planet better than how we found it for the future generations to come.

On the Fall of the Roman Republic Tom Strunk 2022-01-11 On the Republic juxtaposes the fall of the Roman Republic with the contemporary political landscape of the United States: a republic in disarray, violence and corruption thwarting the will of the people, military misadventures abroad, and rampant economic inequality diminishing a shared sense of the common good.

A State of Fear Laura Dodsworth 2021-05-17 This is a book about fear. Fear of a virus. Fear of death. Fear of losing our jobs, our democracy, our human connections, our health and our minds. It's also about how the government weaponised our fear against us – supposedly in our best interests – until we were one of the most frightened countries in the world. But why did the government deliberately frighten us? How has this affected us as individuals and as a country? Who is involved in the decision-making that affects our lives? How are behavioural science and nudge theory being used to subliminally manipulate us? How does the media leverage fear? What are the real risks to our wellbeing? Ahead of any official inquiry into the handling of the Covid-19 pandemic, Laura Dodsworth explores all these questions and more, in a nuanced and thought-provoking discussion of an extraordinary year in British life and politics. With stories from members of the general public who were impacted by fear, anxiety and isolation, and revealing interviews with psychologists, politicians, scientists, lawyers, Whitehall advisers and journalists, A State of Fear calls for a more hopeful, transparent and effective democracy.

Overseas Bases and US Strategy Jonathan Stevenson 2022-08-01 Overseas military bases have been the bedrock of the United States' ability to project military power, exert political influence and deter potential adversaries since the Second World War. But fatigue with America's 'forever wars', as well as more nuanced financial and strategic reasons, has inclined the public and policy community to favour reducing US global military activities and overseas presence. In this Adelphi book, Jonathan Stevenson argues that this desire does not necessarily translate into sound strategy. Overseas bases are a key element of the reassurance required to resurrect and bolster America's reputation among its allies and adversaries. Meanwhile, strategic imperatives and geopolitical realities impose restraints in every theatre. The fluidity prevailing in the Middle East and Indo-Pacific counsels maintaining forward-deployed forces there at roughly the current level. Russia's confrontational posture towards NATO and invasion of Ukraine, as well as NATO's short- and medium-term reliance on US capabilities, require the American presence in Europe to increase and expand eastward. The US should not commit itself to a foreign policy that is heavy on forward-deployed military power and light on diplomacy. But paradoxically, reducing forward military presence may not be consistent with a policy that is less focused on military power as a means of achieving stability and security.

School Bullying and Marginalisation Rosalyn H. Shute 2022-01-12 This book addresses, and seeks to harmonise, different paradigms for understanding school bullying. It sets out to examine two paradigms for conceptualising bullying, and the worldviews that underpin them. It uses a complex systems perspective to bring the two paradigms together in a holistic fashion. By doing so, it creates an integrated framework for conceptualising the many individual, relational and societal factors that are in dynamic interaction and play a part in promoting or reducing school bullying. This book draws upon a number of disciplines by way of background, including evolutionary, child development and social psychological theories of group behaviour and identity. It proposes that the human need for belonging is central to understanding bullying, and situates the topic within an understanding of gender and children's human rights, bringing philosophical and moral perspectives to bear. It discusses practical ways forward, presents a systemic approach to bullying and application of complex adaptive systems methods to bullying research and evaluation. It serves as an introduction to such methods and suggests further creative ideas for policy, intervention practice, and teacher education about bullying.

Preventable Devi Sridhar 2022-04-21 ****THE SUNDAY TIMES BESTSELLER | BBC RADIO 4 BOOK OF THE WEEK**** Preventable tells the extraordinary story of COVID-19 and

how global politics shape our health - from a world-leading expert and the pandemic's go-to science communicator Professor Devi Sridhar has risen to prominence for her vital roles in communicating science to the public and speaking truth to power. In *Preventable* she highlights lessons learned from outbreaks past and present in a narrative that traces the COVID-19 pandemic - including her personal experience as a scientist - and sets out a vision for how we can better protect ourselves from the inevitable health crises to come. In gripping and heartfelt prose, Sridhar exposes the varied realities of those affected (from the jailed doctor in Wuhan who sounded the alarm, and the bored passengers marooned on the Diamond Princess cruise ship, to the daily nightmares of exhausted healthcare workers), and puts you in the room with key decision makers at crucial moments (from over-confident heads of states and their hesitant scientific advisors, to the beleaguered leaders of global health organisations). Sridhar vibrantly conveys the twists and turns of a plot that saw: deadlier variants emerge (contrary to the predictions of social media pundits who argued it would mutate to a milder form); the Pyrrhic victory in many countries of the false narrative of health versus the economy (those countries which controlled the virus, like Taiwan and Denmark, had a steadier recovery); countries with weak health systems like Senegal and Vietnam fare better than countries like the US and UK (which were consistently ranked as the most prepared); and the quickest development of game-changing vaccines in history (and their unfair distribution). Combining science, politics, ethics and economics, this definitive book dissects the global structures that determine our fate, and reveals the deep-seated economic and social inequalities at their heart - it will challenge, outrage and inspire. 'A brutally compelling reminder that if voices like Devi's had been listened to, so many more could have lived' OWEN JONES 'One of the most brilliant scientists in the world who has been proven consistently right in this crisis' PIERS MORGAN 'Excellent . . . Fair, clear and compelling' NICOLA STURGEON 'Those who have found Professor Devi Sridhar's expertise and calm advice invaluable since the arrival of Covid-19 will be glad to know that she has written *Preventable*' RACHEL COOKE, *Guardian*, Non-fiction to look out for in 2022

Yearbook of International Humanitarian Law, Volume 23 (2020) Terry D. Gill 2022 This volume of the *Yearbook of International Humanitarian Law* takes a close look at the role of so-called "expert manuals" in the interpretation and development of the international law of armed conflict and connected branches of international law relating to military operations. While these manuals can and do play an undoubtedly useful role, their proliferation raises a number of questions. What degree of authority do they have and how much weight should be given to the views expressed in them? What is the methodology they employ and how effective is it in ensuring an as objective and impartial interpretation of the law as possible? What is their place in the doctrine of sources? While there is already a considerable body of literature addressing these and other relevant questions, this volume aims to contribute further to this discussion with contributions by three experts involved in one or more of these manuals in one capacity or another. Alongside these three contributions on this year's special theme, the second part of the book comprises three chapters that address timely and relevant issues of International Humanitarian Law. These range from starvation as a method of warfare, to emerging technologies of warfare, and also includes reflections on humanitarian assistance. Lastly, the volume concludes with the Year in Review, describing the most important armed conflict-related events and legal developments that took place in 2020. The *Yearbook of International Humanitarian Law* is a leading annual publication devoted to the study of international humanitarian law. It provides a truly international forum for high-quality, peer-reviewed academic articles focusing on this crucial branch of international law. Distinguished by contemporary relevance, the *Yearbook of International Humanitarian Law* bridges the gap between theory and practice and serves as a useful reference tool for scholars, practitioners, military personnel, civil servants, diplomats, human rights workers and students.

The Silencing of the Lambs Michael L. Brown 2022-03 How long will the church's voice be drowned out by the roar of the enemy? After reading this book, you will understand the critical issues threatening the spread of the gospel in America, and how you can play a part and no longer be a "silent lamb" drowned out by the voices of secularism, liberalism, and pagan thinking in America. If you are a conservative living in America today, there is a target on your back. If you are a Christian conservative, that target is even bigger. If you are a Christian conservative who refuses to bow down to the spirit of the age, the spirit of political correctness, that target is so big that you are a marked man or woman. A person like that--like you!--must be silenced. So says today's cultural elite, who are making it increasingly difficult for Christians to stand up and live out their faith. In *The Silencing of the Lambs*, Dr. Michael L. Brown lays out what is happening in the world around us--from the assault on children in schools and on college campuses to the unprecedented censorship of Christians and conservatives through Big Tech. He then maps out strategies for how we can turn the pitfalls into platforms and find courage in the midst of opposition. The Word of God cannot be bound. The church cannot be cancelled. This book sounds the alarm, alerting Christians to the increasing censorship, opposition, and even persecution believers are facing today, and calls them to remove the muzzle, take their place as the church in this nation, and turn the tide.

A New Kind of Diversity Tim Elmore 2022-10-25 In *A New Kind of Diversity*, bestselling author Tim Elmore brings his decades of research and leadership experience to bear on what might be the biggest, most dramatic, and most disruptive shift the American workforce has ever seen: the vast diversity of several generations living—and working—together. The past few years have brought an endless cascade of social media movements that left many of us . . . well . . . scratching our heads. #Occupy Wallstreet. #March For Our Lives. #Black Lives Matter. #MeToo. #ClimateChange. Regardless of how you might feel about these protests, each symbolizes a gap. Despite the perspectives on all sides of these causes, a clear issue remains: There is a huge gap in this country that few are taking seriously. While diversity is usually seen as an ethnic, gender, or income issue—there is a new kind of diversity that only eight percent of U.S. companies even recognize: diverse generations on teams. Long laughed off as a cliché and more recently mocked in memes #HowToConfuseMillennials and #OKBoomer hashtags, the generational gap has become an undeniable tension in the global workplace. Sadly, it has fostered: Loneliness in our workplaces. Poor communication on our teams. Reduction in revenue and team morale. Conflicting values and priorities in the office. Divisions that lead to “walls” instead of

“bridges.” For the first time in history, up to five generations find themselves working alongside each other in a typical company. The result? There can be division. Interactions between people from different generations can resemble a cross-cultural relationship. Both usually possess different values and customs. At times, each generation is literally speaking a different language! How can we hope to work together when we can’t even understand each other? This book provides the tools to: Get the most out of the strengths of each age group on your team. Foster effective communication instead of isolation among people. Build bridges rather than walls so that loneliness becomes connectedness. Connect people to learn how both veterans and rookies can mentor each other.

Manufacturing Government Communication on Covid-19 Philippe J. Maarek 2022-10-12 This book presents a comparative perspective on different government communication strategies to COVID-19 around the globe. Scholars from twenty parts of the world specialized in political and government communication analyze initiatives and methods of various governments' communicative responses to the pandemic. In their contributions to this volume, they examine a wide range of distinct attitudes and reactions facing the crisis. Today's omnidirectional contact allowed by social media, with its load of contradictory rumors and fake news, often obliterates the citizens' ability to comprehend reality. The book frames a broad canvas on how government communication may deal with that and manage similar crises — bound to happen as climate changes and war menaces are generating more and more worries about the future of humanity. This makes this volume a must-read for scholars and students of political communication, health policies and communication, crisis marketing and communication. It will also be of utmost interest for practitioners and policy-makers from these fields willing to better understand government communication and its answer to global crises.

Contemporary Politics and Social Movements in an Isolated World: Emerging Research and Opportunities Stacey, Emily 2021-10-29 As global leaders use more nationalistic rhetoric, they are supporting their words with policies that are dividing the population and bringing an end to the diverse, multicultural, and postmodern aspects of the era of globalization. This could have a lasting negative effect on international politics and cooperation on issues of grave concern such as global terrorism, climate change, and global pandemics. Contemporary Politics and Social Movements in an Isolated World: Emerging Research and Opportunities discusses in detail the developing new world order in an era of politics that seemingly eschews globalization and international cooperation. This text details the aftermath of the 2020 election and foreshadows the events to come based on the outcome of the election in the USA as well as the progression of politics afterwards. Covering topics such as comparative politics, isolationism, and international communities, this text is an essential resource for political science departments, international relations scholars, students, professors, politicians, researchers, and academicians..

Assessing University Governance and Policies in Relation to the COVID-19 Pandemic Alaali, Mansoor A. 2021-09-10 In response to the COVID-19 pandemic, universities around the globe have taken numerous extraordinary measures and implemented many changes to their strategic, operational, and academic activities. Currently, there is a transformation taking place from the emergency decision-making in the early stages of the pandemic towards reflection and resolution on how the past months can shape governance and strategy. Higher education institutions have been facing challenges with the alignment of their university governance for their strategic and operational plans. Presently, university leaders have prioritized risk management and financial management over all else. Unfortunately, due to these priorities, university responses to the pandemic took the top-down approach of management, rejecting the shared governance structures and collegial practices of the institutions. The pandemic has accelerated the openness to change by creating an emergency or steering response team led by university presidents and provosts, with sub-teams focusing on operations and other academic advisory groups working together to deal with the fast-rising scenarios. The consequence is a clear flow of information and strong communication across the institution, which sequentially

builds on mechanisms to respond to the secondary effects of the pandemic. Moreover, higher education institutions are continuously facing challenges with their strategic alignment of business objectives in order to have a diverse educational system in response to the pandemic. *Assessing University Governance and Policies in Relation to the COVID-19 Pandemic* presents the latest research and studies investigating information on university governance and adapting previous, existing, and proposed models for the current pandemic. This book is comprised of chapters contributed by various leading international authors to discuss and analyze all aspects of university governance in relation to their impact on strategies in finance, sustainability, academic issues, research, faculty and students, leadership, campus, employment and recruitments, and more. This is an essential text for university presidents, strategic planning authorities in universities, college deans and academic department chairpersons, government authorities and policymakers, researchers, students, and academicians.

Covid-19 and Capitalism Koen Byttebier 2022-04-22 This open access book provides a comprehensive analysis of the socioeconomic determinants of Covid-19. From the end of 2019 until presently, the world has been ravaged by the Covid-19 pandemic. Although the cause of this is (obviously) a virus, the extent to which this virus spread, and therefore the number of infections and deaths, was largely determined by socio-economic factors. From this, it follows that the course of the pandemic varies greatly from one country to another. This observation applies both to countries' resilience to such a pandemic (which is mainly rooted in the period preceding the outbreak of the virus) and to the way in which countries have reacted to the virus (including the political choices on how to respond). Meanwhile, research has made it clear that the nature of this response (e.g., elimination policy, mitigation policy, and proceeding herd immunity) was, on the one hand, strongly determined by political and ideological factors and, on the other hand, was highly influential in the factors of success or failure in combating the pandemic. The book focuses on the situation in a number of Western regions (notably the USA, the UK, and the EU and its Member States). The author addresses the reasons why in many Western countries both pandemic prevention and response policies to Covid-19 have failed. The book concludes with recommendations concerning the rearrangement of the socio-economic order that could increase the resilience of (Western) societies against such pandemics.

Times of Uncertainty Detlef Briesen 2021-12-22 Die COVID-19-Pandemie hat die Welt in unterschiedlichem Maße betroffen. Außerdem haben verschiedene Regionen der Welt versucht, die Krankheit auf unterschiedliche Weise zu bekämpfen. Seit dem Beginn der Pandemie in Wuhan, China, blickt die Welt vor allem nach Süd- und Südostasien, wo 2020 zunächst große Erfolge erzielt wurden. Im Jahr 2021 hat sich die Situation dort jedoch dramatisch verschlechtert. Das Buch sucht nach Erklärungen dafür und versucht zu zeigen, wie sich die unterschiedlichen Erfolge bei der Bekämpfung der Pandemie auf die internationalen Beziehungen und die innere Stabilität der betroffenen Länder ausgewirkt haben.

THE GREAT RESET Navroop Singh 2022-05-09 The Great Reset brings to light the facts about the origin of SARS-CoV-2 in the Wuhan lab of China and how this pandemic has impacted humanity at large, redefining the way we live, work and socialise. The pandemic has left many questions unanswered. The world is still debating how and where the virus originated? Is the virus natural or biological warfare? How were the vaccines developed in record time? What will the new post-pandemic normal look like? Apart from the dramatic loss of human life and an unprecedented challenge to public health, the book examines how the pandemic has created the worst social and economic impact on human lives. How the scientific establishment tried to dictate public health policy in sync with big pharmaceutical companies, part of the Medical Industrial Complex. The Great Reset delves into the Gain of Function research on Sars-CoV-2 at the Wuhan Lab in China, funded by the USA. The book explores various facets of Biological Warfare carried out by countries like China, Russia and the USA in the new age Bio-Genetic Weapons. The book traverses through how the countries across the world braced Covid-19 onslaught in spring 2020 from Wuhan to Lombardy in Italy to Barcelona in Spain to New York in USA to New Delhi. It also discusses how India battled Covid-19 and rose like a phoenix from Delta storm in summer 2021 at the back of meticulous Covid vaccination campaign. The book explores various facets of The Great Reset like Trade Wars, Covid-19, Totalitarianism, Commodities war, Inflation, Global food crisis, Pandemic treaty, Central Bank Digital Currencies (CBDCs) & military conflicts across the world that will reset the Global Order ultimately leading us into the Next Great War before the New Global Order is thrust upon the world. It gives a ringside view of what's happening behind the scenes amid this chaos and conflict ravaging the world, where no aspect of our lives is immune.

COVID-19 and a World of Ad Hoc Geographies Stanley D. Brunn 2022-10-17 This book provides an interdisciplinary overview of the causes and impacts of COVID-19 on populations, economies, politics, institutions and environments from all world regions. The book maps the causes, effects and impacts of the virus and describes the impact of the virus on among others health care, teaching and learning, travel, tourism, daily life, local and regional economies, media impacts, elections, and indigenous populations and much more. Contributions to this book come from the humanities, social and policy science disciplines as well as from emerging transdisciplinary fields including climate change, sustainability, health care and epidemiology, security, art, visualization, economic and social well-being, law and borderland studies. As such, this book will be a rich source of information to all those geographers, social scientists and urban and regional planners working in this field.

FINAL BATTLE David Horowitz 2022-10-04 "Democrats have conducted a sustained assault on the spirit of compromise that binds the union together, and set the nation on the

path to a one-party state.” “Nothing less than a handbook for the salvation of the United States of America.”—DENNIS PRAGER “Exposes the outrages perpetrated by the Biden administration and the Democratic Left.”—DINESH D’SOUZA “An ominous warning about what the future may hold if the present course is not reversed.”—PETER SCHWEIZER

FINAL BATTLE exposes the real threat that Democrats pose to freedom. The rise of socialism and critical race theory, coupled with threats to the Electoral College and Senate, an independent judiciary, and the integrity of the electoral system, now threaten to destroy the traditions that bring Americans together — the heart of our democracy. Attacks on these quintessentially American customs codified by the Founding Fathers undermine the possibility of bipartisan solutions to common problems like viral pandemics and civil disorders. Americans now speak in different and antagonistic political languages, and the two parties are so polarized that the American way of life itself is at risk. In his devastating exposé of the Democrats’ nefarious goals, New York Times bestselling author David Horowitz reveals the hallmarks of their strategies, including: The double standard in justice: Antifa and BLM versus January 6 Citizenship as disposable: granting noncitizens privileges like voting, welfare, and healthcare So-called “cancel culture” and collusion in the deplatforming of conservative voices “Empires and states rise and fall while everybody is watching. Although the watchers may be surprised when the actual collapse occurs, with the hindsight provided by the end itself, everybody can see how it fell.” Read **FINAL BATTLE** before it’s too late!
