The Return Dick Morris 2022-07-12 THE TRUMP REVOLUTION CANNOT SUCCEED WITHOUT TRUMP. Will he run in 2024? YOU BET HE WILL. Will he be the GOP nominee? ABSOLUTELY. Will he win the election? YES! DICK MORRIS – New York Times bestselling author, winning presidential strategist & the man Time magazine dubbed “the most influential private citizen in America” – lays-out Trump’s secret plan to return to power in 2024. His new book: THE RETURN: TRUMP’S BIG 2024 COMEBACK. Since 2016 Dick Morris has been a behind-the-scenes adviser to Donald Trump. Dick played a key role in Trump’s surprise 2016 win. Dick Morris reveals first time President Trump’s strategy to win in 2024. And yes, he’s running! Dick Morris says the stakes

of the next elections could not be higher. “President Trump knows the future of America rests on his shoulders,” Morris says bluntly. In his new bestseller *THE RETURN* Morris explains that we cannot repeat 2020—and we can’t let the Democrats get away with it again or America is lost. Dick Morris provides the road map that Trump is prepared to implement in his effort to take-back the White House and the nation. It’s all in *THE RETURN*. Conservatives and MAGA supporters must realize that there are new rules. The Democrats, Big Media, Soros, and the Deep State have decided Trump must be stopped at any cost. In *THE RETURN* Morris reveals how to beat the Democrats and the radical left at their own game – and getting freedom-loving Americans to rise up for Trump and our democracy. Morris outlines the strategy for victory on three fronts: MAKE CERTAIN(!) more legal, eligible voters cast ballots for Republicans, and that their votes are not offset by a torrent of illegal ballots. Morris says a new group of Trump voters are emerging who will create a New Majority. The Republican candidate in 2024 will be, AND MUST BE, Donald J. Trump. Accept no substitutes. DeSantis is not ready for prime time. Morris explains why. **THE WINNING (TRUMP) MESSAGE:** The Democrats will transform America into a nation none of us will recognize by destroying social, cultural, economic, and political freedoms. Morris says time is short. This election really is critical. With the election of 2020, everything pundits knew—or thought they knew—is obsolete in this new era of massively higher turnout. Read *THE RETURN* to find out how conservatives can take advantage of the new rules to make America great again!

*Myths of Leadership* Jo Owen 2022-10-03 The best leaders are born, not made. The best leaders are always in control. The best leaders are those with the highest IQs. But are they really? The thinking about what makes the greatest leaders is increasingly muddled by stereotypes, false promises and pseudo-science. The Handbook of Latin American and Caribbean Intelligence Cultures Florina Cristiana Matei 2022-06-27 The Handbook of Latin American and Caribbean Intelligence Cultures provides a comprehensive analysis of the contemporary efforts of Latin American and Caribbean nations to develop an intelligence culture that converts the former military regimes' repressive security apparatuses into democratic intelligence communities.

FINAL BATTLE David Horowitz 2022-10-04 "Democrats have conducted a sustained assault on the spirit of compromise that binds the union together, and set the nation on the path to a one-party state." "Nothing less than a handbook for the salvation of the United States of America."—DENNIS PRAGER "Exposes the outrages perpetrated by the Biden administration and the Democratic Left."—DINESH D'SOUZA "An ominous warning about what the future may hold if the present course is not reversed."—PETER SCHWEIZER FINAL BATTLE exposes the real threat that Democrats pose to freedom. The rise of socialism and critical race theory, coupled with

threats to the Electoral College and Senate, an independent judiciary, and the integrity of the electoral system, now threaten to destroy the traditions that bring Americans together — the heart of our democracy. Attacks on these quintessentially American customs codified by the Founding Fathers undermine the possibility of bipartisan solutions to common problems like viral pandemics and civil disorders. Americans now speak in different and antagonistic political languages, and the two parties are so polarized that the American way of life itself is at risk. In his devastating exposé of the Democrats' nefarious goals, New York Times bestselling author David Horowitz reveals the hallmarks of their strategies, including: The double standard in justice: Antifa and BLM versus January 6 Citizenship as disposable: granting noncitizens privileges like voting, welfare, and healthcare So-called “cancel culture” and collusion in the deplatforming of conservative voices “Empires and states rise and fall while everybody is watching. Although the watchers may be surprised when the actual collapse occurs, with the hindsight provided by the end itself, everybody can see how it fell.” Read FINAL BATTLE before it's too late!

How Covid Crashed the System David B. Nash 2022-10-15 "An influential, big-picture thinker and a science writer investigate why America's health care system failed so tragically during the Covid pandemic and how the forces unleashed by the crisis could be just the medicine for its long-term

cure"--

A Shot in the Arm Yossi Sheffi 2021-10-19 In *A Shot in the Arm*, MIT Professor Yossi Sheffi recounts the extraordinary journey to deliver Covid-19 vaccines: from scientific advancements to candidate vaccines and mass vaccination. It is a story of bold innovation, risk-taking, and teamwork as scientists, engineers, supply chain experts, manufacturers, and governments collaborated on the greatest product launch in history. The book also highlights the breathtaking potential of revolutionary mRNA technology and the vital lessons for combating other global challenges, including climate change.

*Israel's National Security, the Arab Position, and Its Complicated Relations with the United States* Ehud Eilam 2022 The author argues that Israel, with help from the United States, should deal with Iran's nuclear program, and by force, if necessary. Meanwhile, Israel is trying to disrupt Iranian bases in Syria with limited success. Israel also monitors Egypt and contains Hamas in the West Bank and in the Gaza Strip.

*Conspiracies and Secret Societies* Brad Steiger 2022-09-27 The invisible world of influence and power revealed. Hidden agendas uncovered. An examination of over 250 current and historical conspiracies, secret cabals, and powerful groups. Claims and counterclaims. Stunning allegations. Suppressed evidence. Missing witnesses and rogue operatives. Threats, cover-ups, and assassinations. Brazen lies and startling truths. Documented connections and worrisome coincidences to even deeper intrigue. American history is replete with warnings of hidden plots by shadowy groups and nefarious power brokers. Separating fact from fiction, this compelling work provides gripping details and presents the information without bias, including facts about hundreds of individuals, organizations, and events in which official claims and standard explanations of

actions and events remain shrouded in mystery. Sifting through the evidence, weighing competing narratives in a search for the truth, *Conspiracies and Secret Societies: The Complete Dossier of Hidden Plots and Schemes* examines the many subjects discussed by conspiracy theorists, probing and analyzing the dark doings of secret societies. Bring yourself up to date with the latest research and findings into historical topics plus current issues, including: Government cover-ups? internet tracking, electronic spying, MKUltra, the John F. Kennedy and Martin Luther King Jr. assassinations, Agenda 21, Area 51, Federal Reserve System, black helicopters, Project Monarch, satellite snooping, FEMA, the CIA, the crack cocaine epidemic, and much more. Powerful secret societies and groups? Freemasons, Illuminati, Antifa, the Deep State, the Trilateral Commission, Anarchists, the Skull and Bones Society, the Family, Scientology, the Knights Templar, the Lavender Mafia, the Zionists, the Roman Catholics, the Bilderberg group, and QAnon, to name a few. Classified background on U.S. Presidents? Lincoln, Kennedy, Eisenhower, Reagan, Obama, Trump, their advisers, and more. Terrible secrets? Historical riddles? the Ark of the Covenant, Nazi UFOs, the Holy Grail, George Patton and Operation Unthinkable, the Great Pyramid, the Tonkin Gulf incident, Noah's Ark, alchemy, the true relationship between Jesus and Mary Magdalene, Atlantis, and more. Science mysteries? biochip implants, genetically modified foods, chemtrails, hallow earth, vaccines, fluoridation, Hadron Collider, AIDS/HIV, suppressed medical cures, and many, many more. Originally published in 2006, Brad and Sherry Steiger's masterwork gets an update, with more than 50 new entries, and a complete review and revision by a panel of experts to incorporate the latest developments and newly uncovered conspiracies.

Whether confirming or debunking a conspiracy or secret group, *Conspiracies and Secret Societies* cites sources to let you do your own research and draw your own conclusions. This important book brings the facts to light and provides insights into conspiracies and the world of conspiracy theorists. Knowledge is our best weapon against these people, groups, and their nefarious schemes. When some of the nation's highest leaders, their wives, and followers promote—and even believe—false conspiracies, knowing which conspiracies are actually real and which you should not trust is more important than ever!

Handbook of Research on Academic Libraries as Partners in Data Science Ecosystems Mani, Nandita S. 2022-05-06 Beyond providing space for data science activities, academic libraries are often overlooked in the data science landscape that is emerging at academic research institutions. Although some academic libraries are collaborating in specific ways in a small subset of institutions, there is much untapped potential for developing partnerships. As library and information science roles continue to evolve to be more data-centric and interdisciplinary, and as research using a variety of data types continues to proliferate, it is imperative to further explore the dynamics between libraries and the data science ecosystems in which they are a part. The Handbook of Research on Academic Libraries as Partners in Data Science Ecosystems provides a global perspective on current and future trends concerning the integration of data science in libraries. It provides both a foundational base of knowledge around data science and explores numerous ways academicians can reskill their staff, engage in the research enterprise, contribute to curriculum development, and help build a stronger ecosystem where libraries are part of data science. Covering topics such as data science initiatives, digital humanities, and student engagement, this book is an indispensable resource for librarians, information professionals,

academic institutions, researchers, academic libraries, and academicians.

Regulating Free Speech in a Digital Age David Bromell 2022 Hateful thoughts and words can lead to harmful actions like the March 2019 terrorist attack on mosques in Christchurch, New Zealand. In free, open and democratic societies, governments cannot justifiably regulate what citizens think, feel, believe or value, but do have a duty to protect citizens from harmful communication that incites discrimination, active hostility and violence. Written by a public policy advisor for fellow practitioners in politics and public life, this book discusses significant practical and moral challenges regarding internet governance and freedom of speech, particularly when responding to content that is legal but harmful. Policy makers and professionals working for governmental institutions need to strike a fair balance between protecting from harm and preserving the right to freedom of expression. And because merely passing laws does not solve complex social problems, governments need to invest, not just regulate. Governments, big tech and the private sector, civil society, individual citizens and the fourth estate all have roles to play, and counter-speech is everyone's responsibility. This book tackles hard questions about internet governance, hate speech, cancel culture and the loss of civility, and illustrates principled pragmatism applied to perplexing policy problems. Furthermore, it presents counter-speech strategies as alternatives and complements to censorship and criminalisation.

Paths to the Prevention and Detection of Human Trafficking Andrews, Sharon K. 2022-06-10 Much has already been published to better understand the problems associated with human trafficking such as why it occurs, where it occurs, and the horrendous tolls it takes on individuals and society. However, further study on the latest innovative ideas, research, and real-world efforts towards the detection and prevention of human trafficking analysis as well consideration of the success or

failure of the current approaches is required in order to understand the necessary future improvements and how to best achieve them. *Paths to the Prevention and Detection of Human Trafficking* presents innovative and potentially transformational concepts and research results that discuss current, or developing, approaches that address the identification, reporting, and prevention of human trafficking, including important identified enablers of trafficking. Covering a range of topics such as machine learning and child exploitation, this reference work is ideal for policymakers, government officials, hospital administrators, researchers, academicians, scholars, practitioners, instructors, and students.

*Asia-Pacific Regional Security Assessment 2022* The International Institute for Strategic Studies (IISS) 2022-06-10 The *Asia-Pacific Regional Security Assessment* examines key regional security issues relevant to the policy-focused discussions of the IISS Shangri-La Dialogue, Asia's premier defence summit convened by the International Institute for Strategic Studies. It is published each year in association with the Dialogue and the issues analysed within its covers are central to discussions at the event. Among the topics explored are: US Indo-Pacific strategy, alliances and security partnerships; Chinese perspectives on regional security; Taiwan's security and the possibility of conflict; the continuing challenges posed by North Korea's nuclear and missile programmes; the nuclear dynamics of Sino-American security relations; air and naval operations in the Asia-Pacific; Sino-American technology competition; Japan's competition and cooperation with China; India's role in the Quadrilateral Security Dialogue (Quad); the evolving regional security engagement of European states and the European Union; China's role as an upstream state in the Mekong sub-region; and the climate crisis and Asia-Pacific security. As this volume goes to press, the war in Ukraine overshadows the international security landscape and many chapters in this volume touch on the conflict's ramifications for security in the Asia-Pacific. Authors include leading

regional analysts and academics at the forefront of research and analysis: Aidan Foster-Carter, James Crabtree, Peter A. Dutton, Brian Eyler, Michael Green, Sheryn Lee, Jeffrey G. Lewis, Tanvi Madan, Jeffrey Mazo, Ben Schreer, Yun Sun, Nicholas Szechenyi, Brendan Taylor, Ashley Townshend and Paul Triolo.

Laser Communication with Constellation Satellites, UAVs, HAPs and Balloons Arun K. Majumdar  
2022-06-24 This book presents a solution to the current limitations in global connectivity by introducing a global laser/optical communication system using constellation satellites, UAVs, HAPs and Balloons. The author outlines how this will help to satisfy the tremendous increasing demand for data exchange and information between end-users worldwide including in remote locations. The book provides both fundamentals and the advanced technology development in establishing worldwide communication and global connectivity using, (i) All-Optical technology, and (ii) Laser/Optical Communication Constellation Satellites (of different types, sizes and at different orbits), UAVs, HAPs (High Altitude Platforms) and Balloons. The book discusses step-by-step methods to develop a satellite backbone in order to interconnect a number of ground nodes clustered within a few SD-WAN (software-defined networking) in a wide area network (WAN) around the world in order to provide a fully-meshed communication network. This book pertains to anyone in optical communications, telecommunications, and system engineers, as well as technical managers in the aerospace industry and the graduate students, and researchers in academia and research laboratory. Proposed a solution to the limitations in global connectivity through a global laser/optical communication system using constellation satellites, UAVs, HAPs and Balloons; Provides both fundamentals and the advanced technology development in establishing global communication connectivity using optical technology and communication

constellation satellites; Includes in-depth coverage of the basics of laser/optical communication constellation satellites.

Journalism and Foreign Policy Jesse Owen Hearn-Branaman 2022-09-09 This edited collection brings together critical and up-to-date assessments of how mainstream American and British media cover their respective foreign policies, paying special attention to 'official enemies'. In the age of the internet and social media, the reporting and commentary on world events by mainstream Western media remains tightly bound by the way in which Western governments promote their framing. This book explores the extent to which historical and recent Western media coverage has reflected and continues to reflect the foreign policies of the United States and the United Kingdom towards ten non-Western countries: Afghanistan, China, Cuba, Haiti, Iran, Palestine, Russia, Serbia, Syria, and Vietnam. Chapters analyse media coverage before, during and after war and geo-political and economic conflicts. Drawing from diverse perspectives and methods, including historical analysis, content analysis, critical discourse analysis, and critical linguistics, Journalism and Foreign Policy offers original insight into the Western media's representation of important global events and developments, as well as the key scholarly issues of propaganda and digital media, across a wide range of recent coverage. This volume is key reading for academics and students in the areas of foreign policy and international politics, international communication, media content analysis, and journalism.

The Woking Dead A.J. Rice 2022-07-26 Donald J. Trump was the vaccine America needed. He fought for America against the Deep State and the woke maniacs relentlessly destroying everything Americans love. They're attacking George Washington. They're attacking Dave Chappelle and Abraham Lincoln. They have taken over the New York Times and the NBA. Trump understood this, and he stood, seemingly alone at times, against the cancel culture hordes clawing

to take down the United States from within. Rice understood the importance of Trump and why America needed him. This explains why many of Trump's closest advisors have sought out A.J. Rice's media advice and publicity help. If he wasn't helping you today, chances are he will tomorrow. Rice has fought behind the scenes for years, in ways you saw and heard but never understood—until now. A creative mind behind some of the nation's most important talk radio stars and the strategist behind the America First books you love to read. Like it or not, his content has been around you in some form for decades. He was in your favorite publications and behind some of America's most courageous culture warriors and institutions, crafting strategy and winning the battles you care about. You've seen A.J. Rice's work for years...you just never knew it. In *The Woking Dead*, Rice reveals it all. This bracing, hilarious, biting, hard-hitting collection takes you deep into the fight to make America great again. Rice, a contributor to many popular publications and the CEO of Publius PR in Washington, DC, seeks to save America from Joe Biden and his woke zombie battalions in government, entertainment, academia, sports, and media. *The Woking Dead* will wake you up to what's happening in your culture and help you gird your loins for the crazy years ahead.

*Fighting the Last War Tamir Bar-On 2021* This book argues that the political and security threats posed by the domestic radical right in Western countries have been consistently exaggerated since 1945. This has allowed governments to justify censoring and repressing their political opponents, including many who cannot be fairly described as being affiliated with the radical right.

*Covid-19 and the Global Political Economy Tim Di Muzio 2022-09-26* Covid-19 and the Global Political Economy investigates and explores how far and in what ways the Covid-19 pandemic is challenging, restructuring, and perhaps remaking aspects of the global political economy. Since

the 1970s, neoliberal capitalism has been the guiding principle of global development: fiscal discipline, privatisations, deregulation, the liberalisation of trade and investment regimes, and lower corporate and wealth taxation. But, after Covid-19, will these trends continue, particularly when states are continuing to struggle with overcoming the pandemic and violating one of neoliberalism's key principles: balanced budgets? The pandemic has exposed the fragility of the global political economy, and it can be argued that the intensification of global trade, tourism, and finance over the past 30 years has facilitated the spread of infectious diseases such as Covid-19. Therefore, economies in lockdown, jittery markets, and massive government spending have sparked interest in potentially re-evaluating certain features of the global political economy. This volume brings together leading and upcoming critical scholars in international relations and international political economy to provide novel, timely, and innovative research on how the Covid-19 pandemic is impacting (and will continue to impact) the global economy in important dimensions, including state fiscal policy, monetary policy, the accumulation of debt, health and social reproduction, and the future of austerity and the fate of neoliberalism. This book will be of great interest to students, scholars, and experts in international relations and international political economy, as well as history, anthropology, political science, sociology, cultural studies, economics, development studies, and human geography.

**Teaching Anti-Fascism Michael Vavrus** This timely book examines how fascist ideology has taken hold among certain segments of American society and how this can be addressed in curriculum and instruction. Vavrus presents middle, secondary, and college educators and their students with a conceptual framework for enacting a critical multicultural pedagogy by analyzing discriminatory discourse and recommending civic anti-fascist steps people can take right now. For teacher education programs and policymakers, anti-fascist civic assessment rubrics are provided. To help

clarify contemporary debates over what can be taught in public schools, an advance organizer highlights contested and misunderstood terminology. Featuring historical and contemporary patterns of fascist politics, this accessible text is organized in four parts: "Good Trouble," Unpacking Ideological Orientations, Indicators of Colonial Proto-Fascism and U.S. Fascist Politics, and An Anti-Fascist "Reading the World." Readers will come away with a deeper knowledge base that marshalls a century of anti-fascist actions in response to contemporary acts of racism, anti-Semitism, Islamophobia, gender and sexuality discrimination, bias against Latinx and migrant populations, and other actions that undermine our democracy and harm marginalized students and their families and communities. Book Features: A groundbreaking framework for incorporating anti-fascist pedagogical concepts into multicultural education. Descriptions of common characteristics of historical fascism, far-right extremism, and anti-fascism. Anti-fascist assessment rubrics for teacher educators. Guidance to assist classroom teachers in contextualizing current anti-democracy events. Recommended and annotated anti-fascist background readings informed by critical, theoretical, and intersectional perspectives.

Why Me? Janson Yap 2022-08-29 The book is a reflection of a post-COVID world, workplace, work and worker. It focuses on the stresses COVID has created, especially in the context of the accelerated, rapidly changing work environment. The book adopts a Singaporean perspective in viewing the nexus between the forces of change, culture and management as it relates to work. In considering how best to increase employee engagement, employee motivation and productivity, it proposes a framework through which leaders, talent practitioners and managers can organise worker collaboration and generate synergy in the process, cumulatively encapsulated by the notion of workplace culture. The book concludes with a view of the futures of work, the main forces

of change, complex (wicked) change and a way forward.

Plants Zena Cumpston 2022-09-27 What do you need to know to prosper as a people for at least 65,000 years? The First Knowledges series provides a deeper understanding of the expertise and ingenuity of Indigenous Australians. Plants are the foundation of life on Earth. Aboriginal and Torres Strait Islander peoples have always known this to be true. For millennia, reciprocal relationships with plants have provided both sustenance to Indigenous communities and many of the materials needed to produce a complex array of technologies. Managed through fire and selective harvesting and replanting, the longevity and intricacy of these partnerships are testament to the ingenuity and depth of Indigenous first knowledges. *Plants: Past, Present and Future* celebrates the deep cultural significance of plants and shows how engaging with this heritage could be the key to a healthier, more sustainable future. 'Plants: Past, Present and Future calls for new ways of understanding and engaging with Country, and reveals the power and possibility of Indigenous ecological expertise.' - BILLY GRIFFITHS 'An enlightening read on the power of plants and the management practices of Indigenous people.' - TERRI JANKE

Japan as a Global Military Power Christopher W. Hughes 2022-09-30 Japan is emerging as a more prominent global and regional military power, defying traditional categorisations of a minimalist contribution to the US-Japan alliance, maintaining anti-militarism, seeking an internationalist role, or carving out more strategic autonomy. Instead, this Element argues that Japan has fundamentally shifted its military posture over the last three decades and traversed into a new categorisation of a more capable military power and integrated US ally. This results from Japan's recognition of its fundamentally changing strategic environment that requires a new grand strategy and military doctrines. The shift is traced across the national security strategy

components of Japan Self-Defence Forces' capabilities, US-Japan alliance integration, and international security cooperation. The Element argues that all these components are subordinated inevitably to the objectives of homeland security and re-strengthening the US-Japan alliance, and thus Japan's development as international security partner outside the ambit of the bilateral alliance remains stunted. This title is also available as Open Access on Cambridge Core.

The Making of a Pandemic John Ehrenreich 2022-05-30 The Making of a Pandemic provides a systematic account of how societal and psychological forces shaped the Covid-19 pandemic. The first part focuses on how biological and societal factors interact to create a pandemic. The second part explores how characteristics of the American economy, the American approach to public health, and domestic and international inequality combined to prolong the pandemic, hamper mitigation efforts, and arouse opposition to cooperation with public health measures. The third part examines the psychological processes that led to resistance to efforts to mitigate the pandemic and linked the resistance to right-wing ideologies. The book concludes by looking at the limits of the technical and medical reforms others have proposed to protect us from repetitions of the Covid-19 disaster and by calling for a “deep confrontation” with the societal and psychological factors that created and shaped the pandemic.

Map of Hope and Sorrow Helen Benedict 2022-06-09 Helen Benedict, award-winning British-American professor of journalism at Columbia University, teams up with Syrian writer and refugee, Eyad Awadawnan, to present the stories of five refugees who have endured long and dangerous journeys from the Middle East and Africa to Greece. Hasan, Asmahan, Evans, Mursal and Calvin each tell their story, tracing the trajectory of their lives from homes and families in Syria, Afghanistan, Nigeria and Cameroon to the brutal refugee camps, where they are trapped in a strange and hostile world. These are compelling, first-person stories of resilience, suffering and

hope, told in a depth rarely seen in non-fiction, partly because one of the authors is a refugee himself, and partly because both authors spent years getting to know the interviewees and winning their trust. The women and men in this book tell their stories in their own words, retaining control and dignity, while revealing intimate and heartfelt scenes from their lives. There are more displaced people on the globe than ever since World War Two, fleeing a combination of war, civil unrest, religious conflict, dire poverty, local violence and climate change - forces often inextricably intertwined - just at a point when anti-immigrant, authoritarian governments are rising all over the world, threatening democracies and breaking their postwar commitments to protect refugees and uphold human rights. As a result, refugees today are being persecuted, demonised and denied their legal rights, both within Europe and the USA, the very places that are supposed to protect them, and that, in some cases, caused them to become refugees in the first place. This is the scenario being played out in Greece, the major gateway to Europe for refugees from the Middle East and Africa - a gateway that Europe has deliberately turned into a trap.

Social Media, Freedom of Speech, and the Future of Our Democracy Lee C. Bollinger 2022-08-05  
A broad explanation of the various dimensions of the problem of bad speech on the internet within the American context. One of the most fiercely debated issues of this era is what to do about bad speech-hate speech, disinformation and propaganda campaigns, and incitement of violence-on the internet, and in particular speech on social media platforms such as Facebook and Twitter. In Social Media, Freedom of Speech, and the Future of our Democracy, Lee C. Bollinger and Geoffrey R. Stone have gathered an eminent cast of contributors--including Hillary Clinton, Amy Klobuchar, Sheldon Whitehouse, Mark Warner, Newt Minow, Tim Wu, Cass Sunstein, Jack Balkin, Emily Bazelon, and others--to explore the various dimensions of this problem in the American context. They stress how difficult it is to develop remedies given that some of these forms of bad

speech are ordinarily protected by the First Amendment. Bollinger and Stone argue that it is important to remember that the last time we encountered major new communications technology—television and radio—we established a federal agency to provide oversight and to issue regulations to protect and promote the public interest. Featuring a variety of perspectives from some of America's leading experts on this hotly contested issue, this volume offers new insights for the future of free speech in the social media era.

The Routledge Handbook of Media Education Futures Post-Pandemic Yonty Friesem 2022-09-08

This handbook showcases how educators and practitioners around the world adapted their routine media pedagogies to meet the challenges of the COVID-19 pandemic, which often led to significant social, economic, and cultural hardships. Combining an innovative mix of traditional chapters, autoethnography, case studies, and dialogue within an intercultural framework, the handbook focuses on the future of media education and provides a deeper understanding of the challenges and affordances of media education as we move forward. Topics range from fighting disinformation, how vulnerable communities coped with disadvantages using media, transforming educational TV or YouTube to reach larger audiences, supporting students' wellbeing through various online strategies, examining early childhood, parents, and media mentoring using digital tools, reflecting on educators' intersectionality on video platforms, youth-produced media to fight injustice, teaching remotely and providing low-tech solutions to address the digital divide, search for solutions collaboratively using social media, and many more. Offering a unique and broad multicultural perspective on how we can learn from the challenges of addressing varied pedagogical issues that have arisen in the context of the pandemic, this handbook will allow researchers, educators, practitioners, institution leaders, and graduate students to explore how media education evolved during 2020 and 2021, and how these experiences can shape the future

direction of media education.

Hashtag Campaigns during the COVID-19 Pandemic in Malaysia Pauline Pooi Yin Leong 2021-12-15 Hashtag campaigns on social media enable users to express their sentiments on various issues and mobilize people to be part of a movement or cause; they have been used effectively by disenfranchised members of society against powerful elites. While some are of the opinion that online campaigns are ineffective due to "slacktivism", such campaigns can spill over to offline

protests, especially if there are strong emotions such as anger, or a sense of injustice, or social deprivation, spurring people on. The earlier hashtag campaigns in Malaysia—#AntaraDuaDarjat (#BetweenTwoStatus) and #DengkiKe (#AreYouJealous)—were expressions of unhappiness over perceived double standards in the enforcement of COVID-19 public safety protocols. Later hashtag campaigns such as #KerajaanGagal (#FailedGovernment), #KerajaanZalim (#CruelGovernment), and #KerajaanPembunuh (#MurdererGovernment) became increasingly negative as public disenchantment grew due to the government's weak handling of the pandemic and the consequent economic fallout. Public frustration that manifested itself in the #BenderaHitam (#BlackFlag) and #Lawan (#Protest) movements soon transitioned into offline campaigns and protests against the government. Apart from political hashtag campaigns, there were also welfare movements such as #KitaJagaKita (#WeTakeCareOfOurselves), #BenderaPutih (#WhiteFlag), and #RakyatJagaRakyat (#CitizensTakeCareOfCitizens), which enabled Malaysians to help the less fortunate affected financially by the COVID-19 lockdowns, by rendering food aid and other assistance. A key conclusion of this study is that online hashtag campaigns have served as an early warning of trending public sentiment. They also have the potential to hype up emotions online and subsequently galvanize support for offline campaigns and protests. As #Lawan and #BenderaHitam showed, these can have direct political outcomes.

Death Before Sentencing Andrew R Klein 2022-07-15 America's jails have a long history of killing inmates, most of whom die in jails before they are even convicted of a crime. Deaths behind bars are a direct result of abysmal, correctional facilities' policies, mostly for-profit medical providers, largely absent administrators, and unchecked brutality by jail deputies.

States United Joanna Lydgate 2022-10-15 The Laurence and Lynne Brown Democracy Medal, presented by the McCourtney Institute for Democracy at Penn State, recognizes outstanding

individuals, groups, and organizations that produce innovations to further democracy in the United States or around the world. Elections are the bedrock of any democracy, but they are under attack in the United States. State legislatures are moving to limit voting rights and seize control of election administration, candidates are refusing to accept election results, and antidemocracy forces are sowing lies and encouraging political violence. The States United Democracy Center is fighting back by equipping state and local officials, law enforcement leaders, and prodemocracy partners with the tools and resources they need to protect free, fair, and secure elections. For this important work, its cofounders are the recipients of the 2022 Brown Democracy Medal. States United was founded during the 2020 election and continues to be led by Joanna Lydgate, former chief deputy attorney general of Massachusetts; Norman Eisen, former ambassador to the Czech Republic and special assistant to President Barack Obama for ethics and government reform; and Christine Todd Whitman, former New Jersey governor and Environmental Protection Agency administrator.

Media Literacy, Equity, and Justice Belinha S. De Abreu 2022-07-20 Offering a new and thought-provoking look at media literacy education, this book brings together a range of perspectives that address the past, present, and future of media literacy, equity and justice. Straddling media studies, literacy education, and social justice education, this book comes at a time when the media's role as well as our media intake and perceptions are being disrupted. As a result, questions of censorship, free speech, accountability abound, and nuance is often lost. This book is an antidote to the challenges facing media literacy education: chapters offer a careful examination of important and hot topics, including AI, authenticity, representation, climate change, activism and more. Addressing the continually evolving role of media and its impact on our society and shared knowledge base, the volume is organized around five themes: Misinformation and Disinformation;

Media Representation; Civic Media, Politics and Policy; Eco Media Literacy; Education and Equity, Ethical Quandaries and Ideologies; and Emerging Technologies. Ideal for courses on media literacy and new literacies, this book furthers the conversation on the ways literacy and social justice are connected to educational communities in local and global contexts.

America's End Game for the 21st Century LTG Thomas McInerney 2022-09-28 America's long-standing principles and traditional values are under attack by leftist ideologues who reject them outright and are working hard to replace them. We are fast becoming a nation of socialists, secular humanists, atheists, agnostics, and anarchists who want to tear down every virtue enshrined by our Founding Fathers. They want to replace limited government and self-government with big government, an over-reaching monstrosity controlling every aspect of daily American life. America's Endgame shows us how to counter every element of this domestic attack and return to our First Principles.

Colonialism and the COVID-19 Pandemic Arthur W. Blume 2022 This book views responses to the Covid 19 virus through the lens of indigenous thinking which sheds light on some of the failures in dealing with the pandemic. Colonial societies maintain beliefs that hierarchies are part of the natural order, and that certain people are entitled to privileges that others are not. These hierarchies have contributed to racism as well as health, and wealth disparities that have increased vulnerabilities to the virus. Indigenous societies, on the other hand, view individuals as interdependent, and hold an optimistic view that this tragedy can yield important lessons for future improvement. This book examines the legacy of colonial societies in contributing to existing vulnerabilities, and incorporates an indigenous perspective in re-imagining the problem and its solutions.

The Independent Voter Thom Reilly 2022-09-30 Independent voters—the 40–50 percent of

Americans who reject identification with either of the two major parties or with any party—are increasing in number and impact. Independents are determining the outcome of major elections, upending the long-held categories of political science. Drawing on historical and contemporary data (including survey data, participant observation, interviews, and current writings and scholarship) and providing timely new analysis, the authors argue that independents are an engine for a transformation of US democracy, perhaps even its saviors. Rather than “leaning” to a party or an ideology, independents vary on issues but share a deep distrust of the partisan system. What are the consequences of this distrust? What about shifting trends among Black, Latino, and Asian communities regarding party loyalty? What of young voters who eschew party identification wanting a different kind of political culture? For a wide variety of audiences, this book gives students, scholars, campaign professionals, activists, and media analysts an insight into current voting dynamics and future possibilities.
