Manufacturing Government Communication on Covid-19 Philippe J. Maarek 2022-10-12 This book presents a comparative perspective on different government communication strategies to COVID-19 around the globe. Scholars from twenty parts of the world specialized in political and government communication analyze initiatives and methods of various governments' communicative responses to the pandemic. In their contributions to this volume, they examine a wide range of distinct attitudes and reactions facing the crisis. Today's omnidirectional contact allowed by social media, with its load of contradictory rumors and fake news, often obliterates the citizens' ability to comprehend reality. The book frames a broad canvas on how government communication may deal with that and manage similar crises — bound to happen as climate changes and war menaces are generating more and more worries about the future of humanity. This makes this volume a must-read for scholars and students of political communication, health policies and communication, crisis

marketing and communication. It will also be of utmost interest for practitioners and policy-makers from these fields willing to better understand government communication and its answer to global crises.

Reject Self-Serving Power James Michael Matthew 2022-05-06
James Michael Matthew builds on his teachings from *Prophecy before Vision* to expand on the JM Prophecies Leadership Code, which is: 1. Prophecy must come before vision. Learn to see and alter the future. 2. Embrace leadership, which is all about helping others be successful. 3. Reject self-serving power as it always ends badly for everyone involved. The author applies the Code to explain how JM Prophecies Corporation seeks to invert the global wealth inequality pyramid. You will learn about a variety of proactive projects and ideas designed to rebuild the United States of America. You'll find out how accumulating self-serving power to the detriment of others drives wealth inequality. Whether you work for a public institution, commercial organizations, or elsewhere, you'll find strategies to help others as you find more meaning in your daily life. Join the author as he shares contrarian thoughts and strategies to invert the global wealth inequality pyramid.

An Unmitigated Disaster: America's Response to COVID-19 Robert O. Schneider 2022-01-31
An Unmitigated Disaster chronicles and explains the U.S. response to the COVID-19 pandemic. Emergency management expert Robert O. Schneider considers the quality of U.S. pandemic planning and preparedness; the quality and effectiveness of national, state, and local response efforts; and the performance of national leaders during this historic public health crisis. The book culminates in an assessment of how a predictable public health threat became an unprecedented health, economic, and security disaster. Schneider convincingly shows that conscious decisions were made by governmental authorities, beginning with the president, to ignore expert information and security intelligence in pursuit of other objectives. In other words, Schneider argues, if

the U.S. was ill-prepared for or slow to respond to the crisis, it was because its leaders consciously chose to be ill-prepared or slow to respond. Readers will be fascinated by this behind-the-scenes exposé of a pandemic year.

China and Taiwan in Africa Sabella O. Abidde 2022-04-22 This edited volume discusses the contest and contestation between China and Taiwan for diplomatic recognition and supremacy on the African continent. Written by a diverse group of international scholars, this volume provides insight into five interlocking questions and areas: the origins of China and Taiwan's continent-wide competition for supremacy; China and Taiwan's foreign policy towards Africa during and after the Cold War; the shift in dominance from Taiwan to China; the changing allegiances of African governments; and the implications of ongoing China-Africa-Taiwan relations on the global system, especially on countries in the Global South. This book is divided into three parts. Part One deals primarily with the early history of both Chinas on the continent. Chapters in Part Two discuss the foreign policy of China and Taiwan toward the African continent. Part Three focuses on the shifting alliances and diplomatic allegiance of African countries towards the People's Republic of China (PRC) and the Republic of China (ROC). Filling the gap in Africa-China-Taiwan studies, this volume will be of interest to researchers and students in the social sciences especially political science, comparative politics, international relations, foreign policy, politics of developing nations, area studies, and Taiwanese/Chinese studies.

Protecting Yourself During A Pandemic Susan Zeppieri This guide targets people who want to know everything about the pandemic, what they need to do to protect themselves against it, as well as what additional vitamins and supplements they need to take after they have their vaccinations to remain healthy. We will explain in detail what a pandemic is, the signs and symptoms of COVID, what to do if you or a loved one has tested positive for the virus, and what you can do on a daily basis to keep safe. We

will explore various supplements and vitamins you can take to boost your immune system, answer questions on the positive and negative effects of the different vaccine options, and exactly what it means once you have gone for your jab. We explore vaccine side effects and which vitamins you can add to your daily diet to decrease symptoms related to severe side effects after inoculation. Our goal is to debunk any myths around vaccines, to offer you the true facts of the Coronavirus, and to steer you in the right direction when it comes to protecting yourself and your family against this illness.

The Woking Dead A.J. Rice 2022-07-26 Donald J. Trump was the vaccine America needed. He fought for America against the Deep State and the woke maniacs relentlessly destroying everything Americans love. They're attacking George Washington. They're attacking Dave Chappelle and Abraham Lincoln. They have taken over the New York Times and the NBA. Trump understood this, and he stood, seemingly alone at times, against the cancel culture hordes clawing to take down the United States from within. Rice understood the importance of Trump and why America needed him. This explains why many of Trump's closest advisors have sought out A.J. Rice's media advice and publicity help. If he wasn't helping you today, chances are he will tomorrow. Rice has fought behind the scenes for years, in ways you saw and heard but never understood—until now. A creative mind behind some of the nation's most important talk radio stars and the strategist behind the America First books you love to read. Like it or not, his content has been around you in some form for decades. He was in your favorite publications and behind some of America's most courageous culture warriors and institutions, crafting strategy and winning the battles you care about. You've seen A.J. Rice's work for years...you just never knew it. In *The Woking Dead*, Rice reveals it all. This bracing, hilarious, biting, hard-hitting collection takes you deep into the fight to make America great again. Rice, a contributor to many popular publications and the CEO of Publius PR in Washington,

DC, seeks to save America from Joe Biden and his woke zombie battalions in government, entertainment, academia, sports, and media. The Woking Dead will wake you up to what's happening in your culture and help you gird your loins for the crazy years ahead.

The Responsible Investor Anna Hyske 2022-10-31 The Responsible Investor is a practical introductory guide for private as well as institutional investors and financiers interested in environmental, social and governance (ESG) issues. The authors have academia, advisory, asset management, asset owner and central bank backgrounds, bringing diverse perspectives and extensive senior-level experience in implementing Responsible Investment across different types of portfolios. Together, they have distilled what can seem a complex area into a clear guide to the topic, accessible to readers who don't necessarily have prior in-depth knowledge in the field of Responsible Investment but are interested to know more. The book presents the development of Responsible Investment, its different approaches and the drivers of Responsible Investment, as well as the implementation opportunities in different asset classes. The book introduces Responsible Investment trends that investors can take into consideration in their investment decisions. In addition, the book covers ESG data and assessment, impact and reporting for Responsible Investments. This book suits both rookies and veterans – be they private investors, managers of investment funds or institutional investors or financiers. It is also valuable reading for students in finance, Responsible Investment and corporate social responsibility as an accessible overview of the topic.

Spin Doctors Nora Loreto 2021-11-24T00:00:00Z As Canada was in the grips of the worst pandemic in a century, Canadian media struggled to tell the story. Newsrooms, already run on threadbare budgets, struggled to make broader connections that could allow their audience to better understand what was really happening, and why. Politicians and public health officials were

mostly given the benefit of the doubt that what they said was true and that they acted in good faith. This book documents each month of the first year of the pandemic and examines the issues that emerged, from racialized workers to residential care to policing. It demonstrates how politicians and uncritical media shaped the popular understanding of these issues and helped to justify the maintenance of a status quo that created the worst ravages of the crisis. Spin Doctors argues alternative ways in which Canadians should understand the big themes of the crisis and create the necessary knowledge to demand large-scale change.

Space, Mobility, and Crisis in Mega-Event Organisation Rodanthe Tzanelli 2022-11-25 This book advances an alternative critical posthumanist approach to mega-event organisation, taking into account both the new and the old crises which humanity and our planet face. Taking the delayed Tokyo 2020 Olympic Games as a case study, Tzanelli explores mega-event crisis and risk management in the era of extreme urbanisation, natural disasters, global pandemic, and technoscientific control. Using the atmospheric term 'irradiation' (a technology of glamour and transparency, as well as bodily penetration by harmful agents and strong affects), the book explores this epistemological statement diachronically (via Tokyo's relationship with Western forms of domination) and synchronically (the city as a global cultural-political player but victim of climate catastrophes). It presents how the 'Olympic enterprise's' 'flattening' of indigenous environmental place-making rhythms, and the scientisation of space and place in the Anthropocene lead to reductionisms harmful for a viable programme of planetary recovery. An experimental study of the mega-event is enacted, which considers the researcher's analytical tools and the styles of human and non-human mobility during the mega-event as reflexive gateways to forms of posthuman flourishing. Crossing and bridging disciplinary boundaries, the book will appeal to any scholar interested in mobilities theory, event and environment

studies, sociology of knowledge and cultural globalisation.

Children's Experience, Participation, and Rights During COVID-19

Ruby Turok-Squire 2022-10-18 This edited volume examines how opportunities to realise children's rights and the experience of childhood itself have been changed by the pandemic. It brings together the voices of leading scholars, policy advisors, psychologists, charities engaged in empowering children, and children and young people themselves. By exposing children's own perspectives and ideas for change, the book aims to suggest ways in which children could be better supported during this crisis. Chapters connect the experiences of under-represented groups, including children with disabilities and housing-distressed children. Authors illuminate ways to see and hear children more clearly and enable children's participation during and beyond COVID-19. This book is part of a mini-series that explores the effects of COVID-19 on children's education, rights and participation. These books will expose and connect the struggles faced by particularly vulnerable children, including children with disabilities, housing-distressed children, and refugee and displaced children. They will explore how best to listen to and support children in diverse situations, in order to enable them to realise their rights more effectively.

Populism, Eco-populism, and the Future of Environmentalism
James R. Stone Jr. 2022-05-13 Populism, Eco-populism, and the Future of Environmentalism analyzes the history and language of populism in order to fully comprehend the threat of eco-fascism – paradoxically revealing that it is possible for there to be both progressive eco-Populist and right-wing sham eco-Populist discourses. The book highlights the harrowing prospect that the crises of democracy now confronting countries such as the United States may culminate in forms of eco-fascism in a world increasingly divided over issues of economic and social inequality, immigration, and competition for dwindling resources. The author reveals that there is a language of eco-populism that accompanies Populist and sham Populist discourses of the left

and right as ecological crises have assumed a more prominent role in national and global politics. These crises are exacerbated by the willingness of the fossil fuel industry to destabilize democracy in order to forestall government-imposed limits on carbon emissions and elimination of fossil fuel subsidies that threaten their profits. The book, primarily a work of political and ecological theory, draws on the history of populism as well as the history of conservation and modern environmental movements to make an innovative argument – that a radical form of right-wing sham eco-populism that emerged out of the crucible of the energy crisis and recession of the 1970s has substantially contributed to the crises we now face. The author maintains that the only plausible solution to current political and ecological crises is a progressive eco-populism that combines environmental justice and sustainability with economic and social justice, and offers resources that can help construct a democratic and inclusive movement and culture. A progressive eco-Populist vision has led to proposals for a Green New Deal and the development of the Build Back Better Act currently being considered by the U.S. Congress, but the stalemate between progressive and conservative Democrats over the bill reveals both the compromised state of U.S. representative democracy and the need for a stronger movement to hold politicians and government accountable. This book will be of great interest to students, scholars, and researchers of environmental politics, environmental history, and environmental philosophy, as well as sociology, political science, and history.

Public Administration in America Michael E. Milakovich 2022-01-01 Combining emerging trends, challenges and ethical considerations with current research, Milakovich/Gordon's PUBLIC ADMINISTRATION IN AMERICA, 12th edition, gives you a behind-the-scenes look at day-to-day operations of government administrative agencies as it examines policies and procedures across various levels of U.S. government. The most current concerns in public administration are analyzed from the

second Obama administration, the Trump presidency and the beginning of President Biden's term. The Festival Cities of Edinburgh and Adelaide Sarah Thomasson 2022-08-20 The Festival Cities of Edinburgh and Adelaide examines how these cities' world-famous arts events have shaped and been shaped by their long-term interaction with their urban environments. While the Edinburgh International Festival and Adelaide Festival are long-established, prestigious events that champion artistic excellence, they are also accompanied by the two largest open-access fringe festivals in the world. It is this simultaneous staging of multiple events within Edinburgh's Summer Festivals and Adelaide's Mad March that generates the visibility and festive atmosphere popularly associated with both places. Drawing on perspectives from theatre studies and cultural geography, this book interrogates how the Festival City, as a place myth, has developed in the very different local contexts of Edinburgh and Adelaide, and how it is challenged by groups competing for the right to use and define public space. Each chapter examines a recent performative event in which festival debates and controversies spilled out beyond the festival space to activate the public sphere by intersecting with broader concerns and audiences. This book forges an interdisciplinary, comparative framework for festival studies to interrogate how festivals are embedded in the social and political fabric of cities and to assess the cultural impact of the festivalisation

phenomenon.

Why Me? Janson Yap 2022-08-29 The book is a reflection of a post-COVID world, workplace, work and worker. It focuses on the stresses COVID has created, especially in the context of the accelerated, rapidly changing work environment. The book adopts a Singaporean perspective in viewing the nexus between the forces of change, culture and management as it relates to work. In considering how best to increase employee engagement, employee motivation and productivity, it proposes a framework through which leaders, talent practitioners and managers can organise worker collaboration and generate synergy in the process, cumulatively encapsulated by the notion of workplace culture. The book concludes with a view of the futures of work, the main forces of change, complex (wicked) change and a way forward.

Celebrity in the Time of Covid Christina S. Beck 2022-07-25 This work describes the crucial role celebrities played in the emergence of two competing narratives about COVID-19, one a pro-science narrative that advocated for preventive measures and the other a skeptical counter narrative that denied the disease's existence or downplayed its severity. During the first postmodern pandemic, a slew of interactions took place across a variety of platforms between prominent figures and those who connected with them, forming parasocial communities that framed perspectives on COVID-19. The author first describes how COVID-19 unfolded in the world of sports, then goes on to explain how supportive behavior toward public officials fueled the two competing narratives, emphasizing how celebrities themselves aided in the development of common perspectives. The text concludes with a description of how citizens initially regarded health care professionals as "heroes," but even the most powerful public appeals could not persuade some that COVID-19 posed a genuine threat. Exploring the polarity of publicly held beliefs, this book documents how celebrity advocacy had a lasting effect on people's health choices during a global

pandemic.

Overreach
Research Professor and Chair of the 21st Century China Center
Susan L Shirk 2022-10-18

For decades, China's rise to power was characterized by its reassurance that this rise would be peaceful. Then, as Susan L. Shirk, shows in this sobering, clear-eyed account of China today, something changed. For three decades after Mao's death in 1976, China's leaders adopted a restrained approach to foreign policy. They determined that any threat to their power, and that of the Chinese Communist Party, came not from abroad but from within--a conclusion cemented by the 1989 Tiananmen crisis. To facilitate the country's inexorable economic ascendance, and to prevent a backlash, they reassured the outside world of China's peaceful intentions. Then, as Susan Shirk shows in this illuminating, disturbing, and utterly persuasive new book, something changed. China went from fragile superpower to global heavyweight, threatening Taiwan as well as its neighbors in the South China Sea, tightening its grip on Hong Kong, and openly challenging the United States for preeminence not just economically and technologically but militarily. China began to overreach. Combining her decades of research and experience, Shirk, one of the world's most respected experts on Chinese politics, argues that we are now fully embroiled in a new cold war. To explain what happened, Shirk pries open the "black box" of China's political system and looks at what derailed its peaceful rise. As she shows, the shift toward confrontation began in the mid-2000s under the mild-mannered Hu Jintao, first among equals in a collective leadership. As China's economy boomed, especially after the Global Financial Crisis of 2008, Hu and the other leaders lost restraint, abetting aggression toward the outside world and unchecked domestic social control. When Xi Jinping took power in 2012, he capitalized on widespread official corruption and open splits in the leadership to make the case for more concentrated power at the top. In the decade following, and to the present day--the eve of the 20th CCP Congress when he

intends to claim a third term--he has accumulated greater power than any leader since Mao. Those who implement Xi's directives compete to outdo one another, provoking an even greater global backlash and stoking jingoism within China on a scale not seen since the Cultural Revolution. Here is a devastatingly lucid portrait of China today. Shirk's extensive interviews and meticulous analysis reveal the dynamics driving overreach. To counter it, she argues, the worst mistake the rest of the world, and the United States in particular, can make is to overreact. Understanding the domestic roots of China's actions will enable us to avoid the mistakes that could lead to war.

Meeting the Needs of Nontraditional Undergraduate Students

Babb, Stephanie 2022-06-10 Nontraditional students are a rapidly growing population in universities and educational institutions. These students require specialized solutions and considerations as they face a number of difficulties traditional students do not. Further study is needed to truly comprehend this population's needs and challenges and to develop and implement institutional-level changes to reduce their rate of attrition and increase their academic success. Meeting the Needs of Nontraditional Undergraduate Students has the potential to impact the field of adult higher education and nontraditional students by advancing and further honing already identified differences between nontraditional and traditional students. The book also considers tools and techniques to address these students' requirements to meet their educational goals. Covering topics such as gender, stressors, and flexible learning, this reference work is ideal for administrators, school faculty, academicians, scholars, practitioners, instructors, and students.

Conspiracy Theories in the Time of Covid-19 Clare Birchall 2022-11-04 Conspiracy Theories in the Time of Covid-19 provides a wide-ranging analysis of the emergence and development of conspiracy theories during the Covid-19 pandemic, with a focus on the US and the UK. The book combines digital methods analysis of large datasets assembled from social media with politically and culturally contextualised close readings informed by cultural studies. In contrast to other studies which often have an alarmist take on the "infodemic," it places Covid-19 conspiracy theories in a longer historical perspective. It also argues against the tendency to view conspiracy theories as merely evidence of a fringe or pathological way of thinking. Instead, the starting assumption is that conspiracy theories, including Covid-19 conspiracy theories, often reflect genuine and legitimate concerns, even if their factual claims are wide of the mark. The authors examine the nature and origins of the conspiracy theories that have emerged; the identity and rationale of those drawn to Covid-19 conspiracism; how these conspiracy theories fit within the wider political, economic and technological landscape of the online information environment; and proposed interventions from social media platforms and regulatory agencies. This book will appeal to anyone interested in conspiracy theories, misinformation, culture wars, social media, and contemporary society.

A State of Fear Laura Dodsworth 2021-05-17 This is a book about fear. Fear of a virus. Fear of death. Fear of losing our jobs,

our democracy, our human connections, our health and our minds. It's also about how the government weaponised our fear against us – supposedly in our best interests – until we were one of the most frightened countries in the world. But why did the government deliberately frighten us? How has this affected us as individuals and as a country? Who is involved in the decision-making that affects our lives? How are behavioural science and nudge theory being used to subliminally manipulate us? How does the media leverage fear? What are the real risks to our wellbeing? Ahead of any official inquiry into the handling of the Covid-19 pandemic, Laura Dodsworth explores all these questions and more, in a nuanced and thought-provoking discussion of an extraordinary year in British life and politics. With stories from members of the general public who were impacted by fear, anxiety and isolation, and revealing interviews with psychologists, politicians, scientists, lawyers, Whitehall advisers and journalists, *A State of Fear* calls for a more hopeful, transparent and effective democracy.

Political Populism in the Twenty-First Century Maria Hsia Chang 2021-04-06 At the end of the Cold War, which was ushered in by the disintegration of the Soviet Union, the West celebrated the “end of history”—“the endpoint of mankind’s ideological evolution”—only to find itself caught in internal conflicts of political populism. This book focuses on so-called “right wing” populist movements and parties in democratic polities—those in Russia, Central and Western Europe, and the United States. Central to the definition and dynamics of populism are its anti-globalism and anti-elitism, the latter a reaction against the elites’ arrogance and dismissive contempt.

Natural Law & Government Joseph Drew 2022-05-14 Since the dawn of civilisation philosophers and sages alike have been concerned about the potential for government to become a Leviathan-like monster. In this book Professor Drew shows how a careful application of natural law principles can mitigate this threat of Leviathan and also contribute to the flourishing of people. To do so Natural Law and Government examines the trade-off between human dignity and the common good during the public policy response to COVID-19. Specifically, Professor Drew details his concerns regarding the emergence of concentrations of power and competence in government – changes that have sadly given rise to the repression of the vitality of citizens. This ground-breaking work explains the changes to thinking, institutions and public management that are necessary for people to reclaim their right to thrive as humans. In sum, this is a handbook for what needs to be done after the COVID-19 revolution.

The Price for Wealth CHARLES AKUJIEZE 2022-03-19 Wait a minute! Do you really want to be poor for the rest of your life? If “yes”, then this book is not for you. However, if your answer is “no”, I’m happy to inform you that the principles of success and wealth in this book will lead you to access wealth the right way.

Experience has shown that among the few winners in life are fewer numbers of those who command success – winning “within” and “without”. The rest of them command one-sided or one-legged winning – either winning “within” or “without”. Some win in spiritual matters at the expense of economic, biological, emotional, health and other important aspects of life because they have not been able to pay the full price for creating, maintaining and sustaining real and complete wealth. True and complete wealth is made up of three essential components which are: •Health: this consists of spiritual, emotional, physical and mental. •Cash-flow and riches: this includes savings, investments and your earnings or revenue. •Power: inclusive of spiritual and temporal influence. Most importantly, we must appreciate three important truths – (a) there is a wealthy place; (b) there are paths that lead to the wealthy place; (c) discovering the paths and embarking on the journey guarantees that you’ll get to the wealthy place. There are three bus stops (or stations) to the wealthy place – (a) financial intelligence; (b) financial planning; (c) financial discipline. Any other means employed to attempt to circumvent these eternal principles through “short-cut” lead to gate-crashing which would ultimately lead to crash-landing. Unknown to many, using “short-cuts” most times leads to the longest path in the journey of life.

How Covid Crashed the System David B. Nash 2022-10-15 "An influential, big-picture thinker and a science writer investigate why America's health care system failed so tragically during the Covid pandemic and how the forces unleashed by the crisis could be just the medicine for its long-term cure"--

Academic Leadership and Governance of Higher Education James T. Harris 2022-03-29 Winner of the 2012 ASHE/CAHEP Barbara Townsend Lecture Award To prosper and thrive in an increasingly unpredictable national and global environment, U.S. higher education will need to adapt, innovate, and evolve once again, as it has during every major societal change over the past four centuries. The purpose of this new edition, published a

turbulent decade after the first, is to provide institutional leaders -- from department chairs to trustees -- with a broad understanding of the academic enterprise, strategic guidance, and key principles, to assist them in navigating the future and drive the success of their institutions as they confront the unimagined. Recognizing that the hallmark of higher education in the U.S. is the diversity of institution types, each of which is affected differently by external and internal influences, the authors provide examples and ideas drawn from the spectrum of colleges and universities in the not-for-profit sector. This book covers the major functions and constituent departments and units within institutions; the stakeholders from students and faculty through the echelons of administration; the external environment of elected officials, foundations, philanthropists, and the new changing media; and innovations in teaching, technology, data analytics, legal frameworks, as well as economic, demographic, and political pressures. The book is informed by the proposition that adhering to four principles--which the authors identify as having enabled institutions of higher education to successfully navigate ever-changing and volatile pasts--will enable them to flourish in the coming decades: The four principles are: 1. Be mission centric by making all key decisions based on a core mission and set of values. 2. Be able to adapt to environmental change in alignment with the mission and core values. 3. Be committed to democratic ideals by seeking to promote them and modeling democratic practices on and off campus. 4. Be models for inclusion, equity, and positive social change.

Active Learning in Political Science for a Post-Pandemic World
Jeffrey S. Lantis

Digital Economy, Business Analytics, and Big Data Analytics Applications
Saad G. Yaseen 2022-10-28 This book is about turning data into smart decisions, knowledge into wisdom and business into business intelligence and insight. It explores diverse paradigms, methodologies, models, tools and techniques of the emerging knowledge domain of digitalized business

analytics applications. The book covers almost every crucial aspect of applied artificial intelligence in business, smart mobile and digital services in business administration, marketing, accounting, logistics, finance and IT management. This book aids researchers, practitioners and decisions makers to gain enough knowledge and insight on how to effectively leverage data into competitive intelligence.

Trafficking Data Aynne Kokas 2022-11 "Trafficking Data argues that the movement of human data across borders for political and financial gain is disenfranchising consumers, eroding national autonomy, and destabilizing sovereignty. Focusing on the United States and China, it traces how US government leadership failures, Silicon Valley's disruption fetish, and Wall Street's addiction to growth have yielded an unprecedented opportunity for Chinese firms to gather data in the United States and quietly send it back to China, and by extension, the Chinese government. Such "data trafficking," as the book names this insidious phenomenon, is enabled by the competing governance models of the world's two largest economies: mass government data aggregation in China and impenetrable corporate data management policies in the United States. China is stepping up its data trafficking efforts through national regulations, soft power persuasion, and tech investment, extending the scope of state control over domestic and international data and tech infrastructure, and thereby expanding its global influence. The United States, by contrast, is retreating from participation in foreign alliances, international organizations, and the systemic regulation of the tech industry-practices with the potential to counter data trafficking. Confronting data trafficking as the defining international competition of the twenty-first century, this book ultimately advocates for an alternative future of data stabilization. To stem data trafficking and stabilize data flows, it shows, policymakers can synthesize tools from across the private sector, public sector, multi-national organizations, and consumers to protect users, secure national sovereignty, and establish

valuable international standards"--

COVID-19, the LGBTQIA+ Community, and Public Policy

Wallace Swan 2022-10-28 The COVID-19 pandemic has exposed and exacerbated long-standing inequities, both in the United States and throughout the world. As studies emerge to help us understand the effects of the COVID-19 pandemic on every facet of modern life, it is critical that the effect of the pandemic on the Lesbian, Gay, Bisexual, Transgender, Queer, Intersexual, and Asexual (LGBTQIA+) communities not be overlooked. While some pioneering studies analyzing the impacts of the pandemic upon LGBTQIA+ communities have been conducted, and some efforts are being made to collect data which can impact the development of policy, reliable data resources are limited to a few enterprising states, and this data has not been systematically shared with public policy-makers or with the public to date. COVID-19, the LGBTQIA+ Community, and Public Policy explores precisely how the pandemic has affected these communities and what concrete steps need to be taken to ameliorate its effects. As the chapters in this book demonstrate, the unusual nature of the pandemic has significantly impacted state and local LGBTQIA+ infrastructure, leading to closure of some institutions and reductions in functioning for many others. The contributors examine the ways the pandemic has highlighted preexisting challenges on accessing adequate healthcare (including mental healthcare and substance abuse treatment), employment, education, secure housing, and other societal resources. Together, these chapters present a state-of-the-field overview of health disparities in the LGBTQIA+ community, and demonstrate the particular need for serious, timely, public policy interventions.

Access and Benefit Sharing of Genetic Resources, Information and Traditional Knowledge Charles Lawson 2022-10-14

Addressing the management of genetic resources, this book offers a new assessment of the contemporary Access and Benefit Sharing (ABS) regime. Debates about ABS have moved

on. The initial focus on the legal obligations established by international agreements like the United Nations Convention on Biological Diversity and the form of obligations for collecting physical biological materials have now shifted into a far more complex series of disputes and challenges about the ways ABS should be implemented and enforced. These now cover a wide range of issues, including: digital sequence information, the repatriation of resources, technology transfer, traditional knowledge and cultural expressions, open access to information and knowledge, naming conventions, farmers' rights, new schemes for accessing pandemic viruses sharing DNA sequences, and so on. Drawing together perspectives from an interdisciplinary range of leading and emerging international scholars, this book offers a new approach to the ABS landscape; as it breaks from the standard regulatory analyses in order to explore alternative solutions to the intractable issues for the Access and Benefit Sharing of genetic resources. Addressing these modern legal debates from a perspective that will appeal to both ABS scholars and those with broader legal concerns in the areas of intellectual property, food, governance, Indigenous issues, and so on, this book will be a useful resource for scholars and students as well as those in government and in international institutions working in relevant areas.

COVID-19 and Foreign Aid Viktor Jakupec 2022-11-24 This book provides a timely, critical, and thought-provoking analysis of the implications of the disruption of COVID-19 to the foreign aid and development system, and the extent to which the system is retaining a level of relevance, legitimacy, or coherence. Drawing on the expertise of key scholars from around the world in the fields of international development, political science, socioeconomics, history, and international relations, the book explores the impact of the COVID-19 pandemic on development aid within an environment of shifting national and regional priorities and interactions. The response is specifically focused on the interrelated themes of political analysis and soft power,

the legitimation crisis, poverty, inequality, foreign aid, and the disruption and re-making of the world order. The book argues that complex and multidirectional linkages between politics, economics, society, and the environment are driving changes in the extant development aid system. COVID-19 and Foreign Aid provides a range of critical reflections to shifts in the world order, the rise of nationalism, the strange non-death of neoliberalism, shifts in globalisation, and the evolving impact of COVID as a cross-cutting crisis in the development aid system. This book will be of interest to researchers and students in the field of health and development studies, decision-makers at government level as well as to those working in or consulting to international aid institutions, regional and bilateral aid agencies, and non-governmental organisations.

The Roads to Congress 2020 Sean D. Foreman 2021-11-20 This book analyzes changes to campaigning and voting in the United States in 2020. The global pandemic caused by COVID-19 upended traditional campaign strategies, posed unprecedented challenges to candidates, and possessed the potential to fundamentally alter how campaigns think about running for office. At the same time, the Trump administration's divisive handling of twin crises stemming from the pandemic and rising racial tensions loomed over congressional races as the most disruptive election cycle in living memory. The ramifications of the 2020 congressional elections for the direction of public policy in America—and perhaps for American democracy itself—cannot be overstated. The Roads to Congress 2020 examines key House and Senate campaigns, candidates, and controversies in the 2020 election to reveal what accounts for the outcomes and point the way to America's political future.

Democracy Disrupted: Communication in the Volatile 2020 Presidential Election Benjamin R. Warner 2022-09-30 Leading scholars analyze three disruptions in the 2020 presidential campaign and election: disruptions to the status quo caused by the renewed quest for racial justice and greater diversity of

candidates; pandemic disruptions to traditional campaigning; and disruptions to democratic norms.

Reconstructing Care in Teacher Education after COVID-19

Melanie Shoffner 2022-07-22 This collection explores the changing meaning and enactments of care in teacher education in light of the COVID-19 pandemic, from preservice teachers and teacher candidates to in-service teachers and education faculty. Over fifty international teacher educators explore the complicated concept of care in different content areas, learning contexts, and communities of learners, using different conceptual frameworks and methodological orientations. Throughout, this book situates research and reflection at the nexus of teacher education, care, and COVID-19 in order to reconstruct care in post-pandemic teacher education. Timely and incisive, this collection raises important questions and offers relevant examinations to consider how post-pandemic teacher education as a field will move forward in preparing and caring for those who will, in turn, care for their future students. The book is essential reading for teacher educators, scholars, and anyone interested in the notion of care in education.

Colonialism and the COVID-19 Pandemic Arthur W. Blume 2022

This book views responses to the Covid 19 virus through the lens of indigenous thinking which sheds light on some of the failures in dealing with the pandemic. Colonial societies maintain beliefs that hierarchies are part of the natural order, and that certain people are entitled to privileges that others are not. These hierarchies have contributed to racism as well as health, and wealth disparities that have increased vulnerabilities to the virus. Indigenous societies, on the other hand, view individuals as interdependent, and hold an optimistic view that this tragedy can yield important lessons for future improvement. This book examines the legacy of colonial societies in contributing to existing vulnerabilities, and incorporates an indigenous perspective in re-imagining the problem and its solutions.

Inkjet Printing in Industry Werner Zapka 2022-10-10 A landmark

reference on industrial-scale inkjet printing This handbook provides an indispensable overview of all essential aspects of industrial-scale inkjet printing. Inkjet printing, as a scalable deposition technique, has grown in popularity due to its being additive, digital, and contact-free. Given these advantages, the technology can now be used in stable and mature industrial-scale applications, for example, in the electronics and sensors industry. As the mechanisms for inkjet printing have improved, so too have the versatility and applicability of this machinery within industry. The handbook's coverage includes, but is not limited to, inks, printhead technology, substrates, metrology, software, as well as machine integration and pre-and postprocessing approaches. This information is complemented by an overview of printing strategies and application development and provides a review of novel technological advances, such as printed electronics, robotics, 3D printing, and bioprinting. Readers will also find:

- * The most comprehensive work on the topic with over 75 chapters and more than 1,500 pages relating to inkjet printing technology
- * The inkjet-printing expertise of academic researchers and corporate development engineers in one manual
- * A hands-on approach utilizing case studies, success stories, and practical hints that allow the reader direct, first-hand experience with the power of inkjet printing technology

The ideal resource for material scientists, engineering scientists in industry, electronic engineers, and surface and solid-state chemists, *Inkjet Printing in Industry* is an all-in-one tool for modern professionals and researchers alike.

COVID-19, the Global South and the Pandemic's Development Impact Gerard McCann 2022-10-03 EPDF and EPUB available Open Access under CC-BY-NC-ND licence. Though a globally shared experience, the COVID-19 pandemic has affected societies across the world in radically different ways. This book examines the unique implications of the pandemic in the Global South. With international contributors from a variety of disciplines including health, economics and geography, the book investigates the pandemic's effects on development, medicine,

gender (in)equality and human rights, among other issues. Its analysis illuminates further subsequent crises of interconnection, a pervasive health provision crisis and a resulting rise in socioeconomic inequality. The book's assessment offers an urgent discourse on the ways in which the impact of COVID-19 can be mitigated in some of the most challenging socioeconomic contexts in the world.

Making Sense of Diseases and Disasters Lee Trepanier 2022-07-31 This book examines diseases and disasters from the perspective of social and political theory, exploring the ways in which political leaders, social activists, historians, philosophers, and writers have tried to make sense of the catastrophes that have plagued humankind from Thucydides to the present COVID pandemic. By adopting the perspective of political theory, it sheds light on what these individuals and events can teach us about politics, society, and human nature, as well as the insights and limitations of political theory. Including thinkers such as Thucydides, Sophocles, Augustine, Bacon, Locke, Hume, Rousseau, Publius, Bartolomé de las Casas, Jane Addams, Camus, Saramago, Baudrillard, Weber, Schmitt, Voegelin and Agamben, it considers a diverse range of events including the plagues of Byzantium and 14th century Europe, 9/11, the hurricanes of Fukushima, Boxing Day, and New Orleans, and the current COVID pandemic. An examination of past, present, and future diseases and disasters, and the ways in which individuals and societies react to them, this volume will appeal to scholars of politics, sociology, anthropology and philosophy with interests in disaster and the social body.

A Disrupted World Dr Sukant Das 2022-06-10 A mysterious virus from China takes the whole world in its grip within weeks, creating an unprecedented global pandemic. Third year into the pandemic, the world is still grappling to know mysteries behind origin of the virus. Did it come from the Wuhan animal market? Did it leak from the Wuhan Institute of Virology? Was it accidental or deliberate? With millions of lives lost, billions of lives shattered,

and trillions lost in economy, geopolitical power equations are being rewritten every other day. In the spectre of a post-pandemic disruption, can the humbled superpower the United States of America, hold itself as the leader of free nations or lose its dominance to a resurgent China? The meticulously researched book 'A Disrupted World,' covers such tantalising topics in a gripping manner. It then unravels grim milestones in India's tryst with the pandemic, the unlearnt lessons from the first wave that ultimately led to a catastrophic second wave, leaving behind a trail of despair, devastation, and death. It also highlights the plight of the common man caught between a pandemic on the one hand and an infodemic on the other, his world shattered by fear, loss, and grief. The book touches upon the basics of the structure of the virus and its variants, highlighting the amazing science behind the development of Covid 19 vaccines in record time, reiterating the dangers arising out of emerging variants and critically asking how long the existing vaccines can save us from these emerging variants? And how far are we from the arrival of an elusive cure? And finally, it takes us all through the most pertinent question- Can we ever win the war against the pandemic, or Will it go on forever?
